Greetings –

On behalf of the Association of Population Centers (APC), I am delighted to share with you the 2017 edition of the APC Resource Guide, a compendium of individual profiles of the nation’s premier independent population research organizations. In these pages you will find a comprehensive overview of the current state of population science, including: areas of inquiry; interdisciplinary and cross-institutional collaborations; and, applications to real-world decision-making and policy development.

Founded in 1991, the Association of Population Centers (APC) is an independent group of universities and research organizations whose mission is to:

• Foster collaborative demographic research and data sharing
• Translate basic population research for public policy decision-makers
• Provide educational and training opportunities in population studies

Approximately three dozen academic and private research institutions nationwide comprise the APC. The centers are inherently interdisciplinary, drawing faculty and research staff from diverse fields such as biology, demography, economics, geography, history, medicine, public health, public policy, and sociology. Scholars at APC centers are committed to studying and communicating the implications of population change. Their diverse interests include topics such as retirement, minority health, aging, adolescent health, childcare, immigration and migration, family formation and dissolution, fertility, morbidity and mortality, and population forecasting. This research, in turn, serves to inform planning, policy formulation and decision-making at the local, regional and national levels.

APC centers rely on a number of public and private funding sources to support their scientists’ research. The National Institute on Aging and the National Institute of Child Health and Human Development at the National Institutes of Health provide most of the competitive federal funding for demographic research. The National Science Foundation and the Agency for International Development are two other important sources of federal support. Population researchers also rely on accessible data produced by the Census Bureau, the National Center for Health Statistics, the National Center for Education Statistics, and the Bureau of Labor Statistics to conduct their research.

For more information about the Association of Population Centers, please visit www.popcenters.org.

Sincerely,

Steve Ruggles, Ph.D.
President
Association of Population Centers
CONTACTS:

President: Dr. Steve Ruggles, University of Minnesota, Ruggles@umn.edu

Vice President: Dr. Jennifer Van Hook, Pennsylvania State University, jxv21@psu.edu

Secretary: Dr. Sara Curran, University of Washington, scurran@uw.edu

Treasurer: Dr. Andrew Foster, Brown University, afoster@brown.edu

Mission Statement
CCPR research increases scientific knowledge of population dynamics and their effects on reproductive and population health. Future improvements in public health require deeper understanding of the demographic and social determinants of health and, conversely, the effects of health on population dynamics and socioeconomic status. CCPR research seeks to understand these processes to improve public health.

Mission Statement
The Irvine Center for Demographic and Social Analysis (CDASA) advances innovative, collaborative, and multi-disciplinary research by strengthening research infrastructure and training population scientists. Research includes early educational interventions that create productive adults, social and economic determinants of child health and well-being, how the criminal justice system impacts families, and immigrant incorporation. CDASA brings timely information on the changing face of America to population professionals, policymakers, and the public.

Mission Statement
CUPC brings together an interdisciplinary community of scholars dedicated to research and training in population science with broad focus on health, migration and environmental demography. By providing administrative, technical and development support, CUPC facilitates collegial interaction and nourishes collaboration across several departments, institutes, and universities. An important aspect of the Center is a high level of collaboration between faculty and graduate students. Center affiliates explore demographic processes in the US and a variety of international settings while applying their expertise to yield high quality, policy-relevant research and training. Current initiatives focus on large-scale research initiatives, complex data collection efforts, and new methodological and statistical approaches.

Departmental Affiliations
• Anthropology
• Economics
• Environmental Studies
• Geography
• Health and Behavioral Sciences (CU Denver)
• History
• Institute for Behavioral Genetics
• Integrative Physiology
• Psychology and Neuroscience
• Sociology

Number of Faculty Affiliates: 50 total, 32 at CU Boulder, 18 at other institutions

Key Areas of Research
• Child and Adolescent Transitions to Healthy Adulthood
• Gene-Environment Interplay and Health
• Environmental Demography
• Health and Health Behavior Disparities
• Historical Demography
• HIV/AIDS in Africa
• Migration and Spatial Demography

Domestic Research Projects
• Adolescent substance abuse and risky sexual behavior
• Health lifestyles among children and youth
• Social norms and teen pregnancy
• Genome-wide association models of body-mass index
• Genetic risks, pathways to adulthood, and health inequalities
• Social and genetic epidemiology of health behaviors
• Age, period, and cohort models of obesity disparities and mortality
• Medical decision-making
• Impact of contraceptive access on life course outcomes
• Migration and climate change
• Geo-located micro data for high spatial resolution population studies
• Environmental inequality in urban areas
• Community resilience following disasters
• Changes in racial health differences across periods and cohorts
• Migration in the 1930s: Beyond the Dust Bowl
• Environmental implications of land use change in the Great Plains
• Gender and HIV
• Natural resource use among HIV-impacted households
• Immigrants’ mobility in response to labor demand conditions
• Health outcomes of Mexican immigration to the United States
• Neighborhoods and spatial models for small area estimation with census data

International Research Projects
• Decentralized governance, health care systems, and health in Honduras
• Conditional cash transfers, education, and young adults in Nicaragua
• Climate change and migration in Mexico
• Cohort change, educational disparities, and smoking in Europe
• Epidemiology of non-communicable diseases in South Africa
• Adaptation to climate change in East Africa
International Research Projects Con't

- Changing environmental conditions and societal conflict in East Africa
- Adolescent problem behavior in informal settlements in Kenya
- HIV, aging, and livelihoods in rural South Africa
- HIV and fertility, and HIV after 40, in South Africa and Malawi
- Long-term effects of family planning interventions for health in rural Bangladesh
- Children’s migration and the health of elderly kin in East Asia
- Drinking water and arsenic poisoning in Bangladesh
- World economy and greenhouse gas emissions
- Role of population size, composition, and distribution in global climate change

Regional Research Projects

- Population, the environment, and migration on the U.S. Great Plains
- Built and social environment and the health in Denver neighborhoods
- Access to medical marijuana and substance use in Colorado
- Wildfire mitigation risks and policies in the American West
- Teen pregnancy prevention among Native Americans

Research to Policy

- Climate change mitigation in low-income communities
- Evaluating the impact of ART access on health in South Africa
- Effect of Removal of Planned Parenthood from the Texas Women’s Health Program
- Health policies to increase physical activity in the Rocky Mountain region
- Eliminating agricultural greenhouse gas emissions in the Great Plains region
- Extending a successful maternal, neonatal, and child health program into the government health system in Bangladesh

In the News

- “Genetics affect whether a person “feels” fat or skinny.” Denver Post, August 31, 2016. (Jason Boardman and Robbee Wedow)
- “Inmates work to renounce gangs, escape solitary confinement. State explores new methods to help inmates escape gangs.” By Dane Schiller, Houston Chronicle. (David Pyrooz)

- University of Colorado Denver, Department of Health and Behavioral Sciences
- University of Colorado School of Public Health
- University of the Witwatersrand
**Mission Statement**
The Population Research Center at NORC at the University of Chicago is an interdisciplinary research center designed to facilitate high-quality population research within its signature theme—human and social capital in the urban context—and conducted by its researchers in economics, sociology, health, and other disciplines.

**Departmental Affiliations**
- Chicago Booth School of Business
- Computation Institute
- Department of Comparative Human Development
- Department of Economics
- Department of Public Health Sciences
- Department of Psychology
- Department of Sociology
- Harris School of Public Policy Studies
- Pritzker School of Medicine
- School of Social Service Administration

**Number of Research Faculty:** 54 (+10 Research Affiliates)

**Key Areas of Research**

**Signature Theme: Human and Social Capital in Urban Context**
- Education and Human Capital Production
- Neighborhood Social Context, Social Capital and Crime
- Health and Health Care
- Computational Demography

**Domestic Research Projects**
- Variable Selection Model for Studying the Predictive Validity of Measures of Classroom Quality
- Enhancing Sleep and Physical Activity in the HRS Family of Studies
- Advancing Spatial Evaluation Methods to Improve Healthcare Efficiency and Quality
- Disparities in Reproductive Health
- Developing Tools to Engage Adolescent Men who have Sex with Men
- Getting on Track Early for School Success: Formative Assessment and Instruction of Mathematics in Preschool Classrooms
- Tracing and Linking Contextual and Psychological Factors to STEM Career Choice
- Models of Infectious Disease Agent Study (MIDAS) Research Network
- Intergenerational Caregiving Transitions for Individuals with Intellectual Disabilities
- Social Network Dynamics, HIV, and Risk Reduction
- Health and Economic Development
- Determinants of Subsidy Stability and Continuity of Child Care in Illinois and New York
- General Social Survey (GSS)
- National Social Life, Health, and Aging Project (NSHAP)
- National Longitudinal Survey of Youth 1997 (NLSY97)
- Human Capital and Economic Opportunity Global Working Group
- Data-driven Multiscale Coupled Urban Systems Modeling and Urban Sensing
- Activity Space, Social Interaction and Health Trajectories in Later Life
International Research Projects

- Internal and International Migration in Asia, Africa and Latin America
- HIV/AIDS, Stress, and Productivity: Evidence from Manual Workers in Malawi
- Social Protection and Labor Market Outcomes in South Africa: Employment and Youth Transitions to the Marketplace
- Parental Interventions for Home Computers in Chile
- Following Up for Better Health: Improving Non-Communicable Disease Compliance in Urban India
- Fertility Timing and Women’s Economic Outcomes in South Africa
- Evaluation of USAID/Uganda Literacy and Health Education Program

Regional Research Projects

- Oral Health in Community Context: Health Status and Access to Care on Chicago’s South Side
- An Urban Sciences Research Coordination Network for Data-Driven Urban Design and Analysis
- Strengthening Mentoring Programs for At-Risk Youth Through Human Capital Supports: A Large-Scale Randomized Field Experiment in Chicago
- Underground Gun Markets in Chicago
- Southside Health and Vitality Studies (University of Chicago Medical Center)
- Diabetes and Aging in a Multi-Ethnic Population
- Translational Research at the University of Chicago
- Contraceptive Use Among Teens
- Paths to Purposeful Parenting: A Pilot Study Leveraging Neuroscience and Technology to Promote Low-Income Parents’ Attention and Focus
- Addressing Truancy through a Descriptive Social Norms Intervention
- Oral Health, Systematic Health, Well-Being and the Social Sciences

Research to Policy

- Linda Waite, Martha McClintock, and William Dale’s work on the National Social Life, Health, and Aging Project (NSHAP) will be featured in a book that re-conceptualizes health and it’s impact on social policy
- Harold Pollack and David Meltzer participated in a conference alongside members of the Obama Administration to discuss The Affordable Care Act
- Rayid Ghani is using his work on data science to address policing challenges

Mission Statement
Hopkins Population Center (HPC) stimulates and facilitates innovative, impactful research that combines the core strengths in social science, public health, medical science, and biostatistics in emerging areas of population research. HPC promotes innovative methodology beyond traditional demography to integrate systems science and computational modeling. HPC promotes exemplary interdisciplinary research that is translational to inform policy makers, with a priority on the growth of young investigators.

Departmental Affiliations
HPC comprises faculty associates from seven schools: Krieger School of Arts and Sciences, Bloomberg School of Public Health, School of Medicine, School of Nursing, Whiting School of Engineering, School of Education, and Carey School of Business.

Number of Faculty Affiliates: 71

Key Areas of Research

- Poverty and Inequality
- Sexual and Reproductive Health
- Family, Maternal and Child Health
- Computational Population and Health Sciences

Domestic Research Projects

- Effectiveness of a Safety Intervention for Dating Violence
- Housing Trade-offs as they are Perceived and as they Affect Children's Well-being
- Housing Effects on Children's Development
- How Housing Vouchers Affect Biology & Health
- Geographic Variation in the Determinants and Outcomes of Elective Surgery
- Using Consumer Credit Data to Identify Precursors and Consequences of Cognitive Impairment
- A Structural HIV Prevention Intervention Targeting High-risk Women
- Prenatal Multilevel Stressors and Alternations in Maternal and Fetal Epigenomes
- Novel Approaches to Characterize Depressive Symptoms and Cognitive outcomes
- A Diabetes Networking Tool to Enhance Self-management through Social Networks
- Childhood Obesity and Cardiovascular Disease Risk: An Intergenerational Approach
- Preterm Birth, Maternal and cord Blood Metabolome, and Child Metabolic Risk
- Early Life Determinants of Obesity in U.S. Urban Low Income Minority Birth Cohort
- Medicaid and the US Transfer System after the Great Recession
- Assessing Place-based and Place-conscious Interventions on Economic Mobility
- Housing-opportunity Programs and Long-term Healthcare Use and Medicaid Spending
- Brokering the Geography of Opportunity: How Landlords Affect Access to Housing
- The General Social Survey (GSS) and International Social Survey Programme
- Estimating Population Effects: Incorporating Propensity Scores with Complex Survey Data
- Using Rigorous Evaluation Results to Improve Local Education Policy Decisions
- Engaging Families to Improve the Quality and Outcomes of Care for Children

Harvard Center for Population and Development Studies
Lisa Berkman, Director

Mission Statement
The Harvard Center for Population and Development Studies is dedicated to improving well-being around the world by better understanding the interaction of demographic changes with social and economic development. Our goal is to produce population-based evidence that will better inform policy to create healthy and resilient societies.

Departmental Affiliations
• Center for Geographical Analysis
• Faculty of Arts and Sciences
• Department of Economics
• Department of Psychology
• Department of Sociology
• T.H. Chan School of Public Health
• Institute for Quantitative Social Science
• Kennedy School
• Medical School
• Graduate School of Education
• Graduate School of Design

Number of Faculty Affiliates: 62

Key Areas of Research
• Social & Environmental Determinants of Population Health
• Aging Societies
• Workplace & Well-being
• Social & Family Demography

Domestic Research Projects
• Adversity and Resilience: Understanding the Effects of Hurricane Katrina on Vulnerable Populations
• The Sloan Fellowship on Aging and Work
• Archiving the Occupational Cohorts in the Work, Family & Health Network
• The Spatial and Multi-level Association of Alcohol Exposure, Alcohol Misuse, and HIV outcomes
• Health Disparities and Inequality of Opportunity in the United States
• The Construction of a New Measure to Assess Bonding and Bridging Social Capital to be Used in Public Health Settings
• Falling Behind: The Black-White Wealth Gap in Life Course and Intergenerational Perspective
• Welfare Effects of Policies to Balance the Social Security and Medicare Budgets
• How Rigid is the Wealth Structure: Intergenerational Correlations in Family Wealth and the Role of Homeownership

International Research Projects
• Can Microfinance Improve Health Outcomes? Experimental Evidence from India
• Health and Aging in Africa: Longitudinal Studies of INDEPTH Communities
• Program on the Global Demography of Aging
• Social Protection, Work, and Family Strain: Cumulative Disadvantage Effects in the US and Europe
• The Effect of Family Planning on Fertility, Reproductive Health, and Economic Development in Africa
• The Impact of Reproductive Health and Family Planning Services on Health and Poverty
• An Innovative Language Controlled Tablet-Based Cognitive Test: Harmonizing Dementia Screening Across High and Low Literacy Countries
• A Comparison of Social, Biological and Economic Predictors of Cognitive Impairment, Cardiovascular Disease and HIV Among Older Adults
• Treatment Needs Among Older Adults in Agincourt South Africa
• Epidemiology of Alzheimer’s Disease and Cognition: Innovative Approaches to Global Harmonization
Regional Research Projects

- How Older Latino Immigrants Access and Experience Social Services in Massachusetts
- Economics of Immigration

Research to Policy

- An expert paper, commissioned by The National Academy of Medicine’s Vital Directions for Health and Health Care Initiative and co-authored by Lisa Berkman, tackles the topic of how the U.S. can get ready for its aging population as part of a series focused on 19 priority focal areas for U.S. health policy.
- The findings of an analysis led by Harvard Pop Center faculty member Steven Gortmaker, PhD, that projected the health impacts of a soda tax were used to sway Philadelphia’s City Council to take the historic step to become the first major U.S. city to tax sodas and other sweetened beverages.
- In a JAMA Forum, Ashish Jha, MD, an HCPDS faculty member, expresses praise – and some words of caution – regarding a new government program dedicated to exploring the social determinants of health. The Accountable Health Communities (AHC) project will assess whether addressing health-related social needs among Medicare and Medicaid beneficiaries can reduce health care costs at the community level.

Mission Statement
The Office of Population Research (OPR) at Princeton University has fostered research and training in population since it was founded in 1936 as the world’s first population research center. Our mission is to provide the resources and environment that will result in the creation and dissemination of fundamental demographic knowledge and the highest quality learning opportunities for doctoral and postdoctoral trainees.

Mission Statement
The mission of the CPRC is to (1) nourish a vibrant intellectual community of population researchers at Columbia University; (2) advance population research in our four primary research areas; (3) become a leading population center specializing in research on the health and well-being of vulnerable populations locally, nationally, and internationally, and on public policies relevant to those populations; and (4) take advantage of Columbia’s location in New York City.

Lawrence Finer, Director • Ann Moore, Associate Director

Key Areas of Research

- Fertility preferences, pregnancy intentions and pregnancy outcomes
- Sexual behavior, contraceptive use and contraceptive services
- Adolescent sexual and reproductive health

Domestic Research Projects

- Studying the consequences of unintended childbearing for parents and children
- Calculating contraceptive failure rates for a variety of methods and population subgroups
- Documenting the need for family planning and other reproductive health services in the United States, the adequacy of services to meet those needs, and the benefits from such services
- Conducting a survey of a nationally representative sample of abortion patients in the U.S.
- Studying publicly funded family planning clinics and clients to document the impact of the Affordable Care Act and remaining gaps in coverage
- Conducting a census of all known abortion providers in the United States to assess the number of abortions and abortion rates at both the national level
- Developing new techniques and improving existing methodologies for measuring the completeness of abortion reporting in our nation’s primary fertility-related surveys
- Examining the extent to which SRH behaviors and outcomes among adolescents differ according to their socioeconomic background and context, using individual and neighborhood factors

International Research Projects

- Analysis of the incidence, trends and safety of abortion worldwide
- Assessing the incidence and health impact of unsafe abortion in developing countries in Africa and Asia
- Examining reasons for unmet need for contraception in developing countries and assessing implications to improve current methods and develop new ones
- Exploring adolescents’ use of reproductive health services and barriers to meeting their needs
- Assessing sexuality education policy and practice to determine the extent that practice is consistent with policy in Guatemala, Peru, Ghana, and Kenya
- Undertaking new analysis of the costs and benefits of meeting the contraceptive needs of adolescent women in developing countries

Mission Statement

The Guttmacher Institute is a leading research and policy organization committed to advancing sexual and reproductive health and rights in the United States and globally.

The Guttmacher Center for Population Research Innovation and Dissemination enhances the quality of research carried out at the Institute by providing opportunities for interdisciplinary idea generation, collaboration among center affiliates and with external colleagues, and staff training. It also ensures that the Institute’s work and data are made available to a wide range of audiences.

Number of Faculty Affiliates

- 23 doctoral-level
- 42 total
International Research Projects

- Assessing the characteristics and reasons of women having abortions worldwide
- Establishing the Guttmacher-Lancet Commission to help develop a broader and evidence-based vision for SRHR worldwide over the next 15 years

Regional Research Projects

- Estimating state unintended pregnancy rates
- Documenting abortion incidence and services in states and metropolitan areas
- Tracking state-by-state teen pregnancy data

In the News

- “1,000 Reasons Why It’s Becoming Incredibly Difficult to Get an Abortion,” Nina Liss-Schultz, Mother Jones, January 13, 2016

- “5 Things to Consider About the Supreme Court’s Decision on Texas Abortion Law,” Julie Rovner, NPR, July 1, 2016

Research to Policy

- Monitoring reproductive health policy developments nationally and in each state
- Using several channels, including the Guttmacher Institute’s policy journal, the Guttmacher Policy Review, to bring data and research to public policy debates on sexual and reproductive health issues
- Used data and analyses by Guttmacher researchers and others to author a friend-of-the-court brief arguing that the U.S. Supreme Court should hold that religiously affiliated nonprofits cannot invoke their religious views to block their employees and their employees’ dependents from receiving the contraceptive insurance coverage that is guaranteed under the Affordable Care Act (ACA)

pubinfo@popcouncil.org
www.popcouncil.org

Mission Statement
The Population Council, an international, nonprofit, nongovernmental organization, seeks to improve the well-being and reproductive health of current and future generations around the world and to help achieve a humane, equitable, and sustainable balance between people and resources. The Mission is accomplished through three program areas: Reproductive Health (RH); HIV and AIDS; and Poverty, Gender and Youth (PGY).

Research to Policy
• The Council’s evidence on disrespectful and abusive care in maternal and reproductive health settings was instrumental in the development of the Respectful Maternity Care (RMC) Charter on the Universal Rights of Childbearing Women and informed the World Health Organization’s 2014 statement on the Prevention and Elimination of Disrespect and Abuse during Childbirth.
• The Council will share findings and policy and program recommendations from research on the quality and effectiveness of strategies to reduce gender-based violence in Bihar and support the government in the expansion of successful interventions.

Key Areas of Research
• Vulnerable populations, including youth & adolescents
• Social aspects of poverty
• Gender, gender inequality, and gender-based violence
• Social science and health-related research into the social, behavioral, and biomedical aspects of HIV and AIDS and reproductive health
• Development of testing and innovative contraceptive technologies
• Methodological innovations
• Early marriage and strategies to increase the age at marriage
• Development and testing of microbicides to prevent transmission of HIV and other sexually transmitted infections (STIs)

International Research Projects
• Developing strategies for reaching indigenous girls and other vulnerable adolescents in Guatemala
• Generating comprehensive data on what works to get girls into school, ensure that they are learning while in school, and support healthy transitions to adulthood after they leave school
• Developing and testing the effectiveness and acceptability of new reproductive health technology designed to benefit women and men globally
• Developing collaborative relationships with pharmaceutical companies to license, register, and/or manufacture technologies developed by the Council in support of increased access and choice in reproductive health programs in developing countries
• Building an evidence base of effective programs that increase the age at marriage in sub-Saharan Africa and Bangladesh
• Evaluating health voucher-and-accreditation interventions in East Africa and South Asia to improve reproductive health service delivery business models
• Generating and synthesizing evidence to strengthen and contribute to the scale-up of high-quality family planning and reproductive health services
• Building upon existing knowledge and refining what is known about girl-centered programs
• Assessing interventions to address sex selection in Asia
• Community-based operations research in Nigeria to improve coverage, demand, and continuum of care for prevention of mother-to-child transmission of HIV services
**International Research Projects Con't**

- Building social, health, and economic assets through safe spaces, financial education, and savings for adolescent girls in Zambia
- Strengthening Evidence for Programming on Unintended Pregnancy (STEP UP): A multi-site study to expand access to quality family planning and safe abortion services in Bangladesh, Ghana, India, Kenya, and Senegal
- Monitoring the quality of maternal health care through appropriate indicators
- Tackling abuse in facility-based childbirth and promoting dignified care during childbirth
- Reviewing the evidence and identifying gaps in family planning research to shape the conversation about investment
- Shaping and advancing an operations research agenda for women-centered ARV-based prevention products

Duke Population Research Institute
Angela M. O’Rand, Director • M. Giovanna Merli, Associate Director

Mission Statement
The Duke University Population Research Institute (DUPRI) is an interdisciplinary research organization bringing together researchers from the biological, economic, mathematical, psychological, statistical, sociological, and policy sciences at Duke. The Institute seeks to advance science in the area of demography and population science, as well as expand the current boundaries of demographic investigation. DUPRI was created to produce highly innovative interdisciplinary research in the population sciences and to foster the development of the next generation of researchers.

Key Areas of Research

Health & Human Development
- Developmental Processes of Population Health and Well-being
- Social Connections and Network Positions in Population Health Processes
- Identifying Causal Effects in Individual Behavior and Population Processes

Aging
- Biodemography
- Life Course Perspective on Aging
- Intergenerational Studies

Domestic Research Projects
- Adolescent Health Parent Study
- A Week in the Life Study
- Duke Social Security/Medicare Dataset
- Core Longitudinal Infrastructure Population Project (CLIPP)
- The Effects of Admissions Preferences in Higher Education
- The Impact of Regulations on the Supply and Quality of Care in Child Care Markets
- Improving Data Dissemination Practice in the Federal Statistical System
- Controlling Crime: Strategies and Tradeoffs
- Strategic Parenting, Birth Order & School Performance
- Generational Structure of U.S. Families & Their Intergenerational Transfers
- Resources, Composition & Family Decision-Making
- Network Effects on Smoking & Drinking, as part of the PROSPER Project
- Models and Tools for Dynamic Health-Relevant Diffusion over Complex Networks
- Extremal Quantile Regression for Selection Models & the Black-White Wage Gap
- Financial and Medical Literacy Effects on Future Planning in an Aging Population

International Research Projects
- The Mexican Family Life Survey (MxFLS)
- The Study of the Tsunami Aftermath and Recovery (STAR) in Indonesia
- Shanghai Sexual Networks Survey (SSNS)
- The Chinese Longitudinal Healthy Longevity Survey (CLHLS)
- Network-based sampling of Chinese immigrants in the U.S., France and Tanzania
- Bihar Evaluation of Social Franchising and Telemedicine (BEST) in India

Mission Statement
Committed to understanding the well-being of children and families, the Center for Family and Demographic Research (CFDR) integrates demographic methods, data, and perspectives with other social scientific approaches. The CFDR is dedicated to training, research and service in family demography.

Departmental Affiliations

The primary mission of the Population Studies and Training Center is to produce and disseminate innovative research on the causes and consequences of population size, composition, distribution, and well-being in the U.S. and globally. The Center carries out this mission by providing state-of-the-art facilities and research support to associates; maintaining a forum for intra- and interdisciplinary exchange on population science; supporting a high-quality graduate training program; mentoring and supporting a diverse and inclusive community of population scholars at Brown; engineering and seeding promising new areas of population research; and developing cross-unit collaborations on campus and with institutional partners around the world.

Mission Statement
The mission of the Population Research Center (PRC) is to provide the resources and culture that are necessary to facilitate the highest level of population-related research and training activities through the submission of federal and foundation grants, the production and publication of population-related knowledge, and the dissemination of this work through scholarly meetings, presentations, workshops, teaching, media outlets, and the web. The PRC is an NICHD-funded center.

The Yun Kim Population Research Laboratory
Eric N. Reither, Director

Mission Statement
Since its inception in 1968, The Yun Kim Population Research Laboratory (PRL) has served as a center for demographic research and training at Utah State University. Today, the primary mission of the PRL is to stimulate and support quality scientific research on a range of population issues affecting our state, nation and world. Research productivity among our faculty facilitates another key mission of the PRL – to train and mentor the next generation of applied demographers and population scholars through the M.S. and Ph.D. programs in Sociology. Through seminars and research support, the PRL serves to create a vibrant community of population scholars at Utah State University.

Key Areas of Research

- U.S. and International Migration
- Population Health and Quality of Life
- Mortality Determinants and Longevity Forecasts
- Social Inequality and Health Disparities
- Family Challenges Facing the U.S. and Southeast Asia
- The Demographic Consequences of Labor Market Disruptions

Domestic Research Projects

- The impact of obesity on mortality among U.S. adults
- Associations between job quality and divorce risks
- Aging, ethnicity and land use change in rural communities
- Gendered immigration patterns in new U.S. destinations
- Mother’s nonstandard employment and children’s health
- Sleep deprivation and dietary choices among U.S. adolescents
- The impact of “bad jobs” on marriage
- Ethnic variation in associations between short sleep duration and obesity among U.S. adolescents

International Research Projects

- People, power and conflict in the Eurasian migration system
- Marriage and women’s health in Japan
- The effects of education on labor force transitions among married women in Japan
- Age, period and cohort effects on suicide mortality in Japan and South Korea
- Gender ideology, migration decisions, and destination selection in the Republic of Georgia
- Educational differences in early childbearing: a cross-national comparative study
- Infant mortality in Kyrgyzstan before and after the dissolution of the Soviet Union

Key Areas of Research

- Demographic Measurements and Methods
- Environments and Populations
- Health of People and Populations
- Migrations and Settlements
- Wellbeing of Families and Households

Domestic Research Projects

- Health care provider recommendation, HPV vaccine uptake, and race/ethnicity in the National immunization survey
- Egalitarianism, housework, and sexual frequency in marriage
- Neighborhood racial diversity and white residential segregation in the United States
- Reconstructing past populations with uncertainty from fragmentary data
- Discrimination and psychological distress among recently released male prisoners
- Social networks and the job search: Focusing on people asked to provide job assistance
- Setting an agenda for future research on military service and the life course
- Patterns of alcohol use and expectancies predict sexual risk taking among non-problem drinking women
- Moving for opportunities? Changing patterns of migration in North America
- Do wealth disparities contribute to health disparities within racial/ethnic groups?
- Exploring courtesy stigma among frontline care providers serving sex workers
- Gender sorting across K12 schools in the United States

International Research Projects

- Armed conflict, refugees and migration
- Design of an agent-based model to examine population-environment interactions in Nang Rong District, Thailand
- Internal labor migration in China: Trends, geography and policies
- Social context and the production of immigrant status based health inequalities: A comparative study of the United States and Canada
- Bayesian population projections for the United Nations
- UK health performance: Findings of the Global Burden of Disease Study
- Prevalence of HIV among those 15 and older in rural South Africa
- Race/ethnic and nativity disparities in child overweight in the US & England
- Child mobility, maternal status, and household composition in rural South Africa
- Association of iodized salt usage with malnutrition among young children in India
Regional Research Projects

- Northwest Census Research Data Center
- Checking the pulse of diversity among healthcare professionals: an analysis of west coast hospitals
- Help from family, friends, and strangers during hurricane Katrina: the limits of social networks
- Effects of high school course-taking on secondary and post-secondary success
- Seattle to Spokane: mapping perceptions of English in WA
- Developmental influences on adult intellectual development: The Seattle longitudinal study
- Variation in the sustained effects of the Communities that Care prevention system on adolescent smoking, delinquency, and violence

Research to Policy

- Poverty, stress, and trauma: Implications for mental health and mental health intervention
- Being a positive bystander: male anti-violence allies’ experiences of ‘stepping up’
- The role of community organizations in addressing health inequities through participatory processes
- The 9th grade shock and the high school dropout crisis
- Acquaintance sexual assault and sexual harassment treatment and prevention among teens
- The effect of Seattle’s mandatory sick leave policy on city employment and business
- Engaging communities to prevent underage drinking
- Legislating change? Responses to criminalizing female genital cutting in rural Senegal

Center for Public Information on Population Research
Linda A. Jacobsen, Director • Mark Mather, Associate Director

Key Areas of Research

As primarily a dissemination center, our activities include:

• Writing, producing, and disseminating web articles and Population Bulletins highlighting recent demographic research findings from other population centers
• Hosting webinars to raise awareness of population issues and research findings in the U.S. and internationally
• Organizing and hosting symposia and Congressional Briefings on population topics with policy implications, and posting webcasts and videos of symposia and briefings on the CPIPR website
• Using social media to make demographic research findings accessible to a broad audience

Mission Statement
The Center for Public Information on Population Research (CPIPR) at the Population Reference Bureau (PRB) explains and publicizes the findings of population research and their implications. The Center serves the entire field of population sciences, by translating research into information that can be used by individuals, families, and decision makers in the public and private sectors.

Departmental Affiliations
CPIPR is connected to the research community through its advisory committee drawn from universities and other institutions engaged in population research as well as through the PRB staff. The Center is based at PRB, an institution that specializes in communication about population issues to nontechnical audiences around the world. Staff in PRB’s Communications, International, and U.S. Programs departments have developed and implemented activities that increase awareness and understanding of population issues and research among government and private-sector decision makers, journalists, educators, the media, and interested citizens.

Domestic Research Projects

• Understanding the Dynamics of Family Change in the United States
• Trends and Challenges Facing America’s Latino Children: Report and Online Database
• Tracking the Well-Being of Girls in the United States
• KIDS COUNT Data Book and Data Center
• Measuring the Well-being of Children in California Counties, Cities, and School Districts
• Analyzing Trends in Low-Income Working Families
• Women’s Well-Being Across Generations

International Research Projects

• 2016 World Population Data Sheet and Interactive Graphics
• Policy, Advocacy, and Communication Enhanced for Population and Reproductive Health (PACE)
• Communicating the Critical Link Between Youth and Noncommunicable Disease Prevention in Asia
• Achieving a Demographic Dividend
• Communicating Nutrition Data and Information to Policymakers in Nigeria
• Evidence to End FGM/C: Research to Help Girls and Women Thrive
• Strengthening Family Planning/Reproductive Health Programming through Implementation Science
• Strengthening Developing Country Policy, Advocacy, and Governance for Strategic, Equitable, and Sustainable Health Programming
• Creating Innovative, Evidence-Based Advocacy Communication and Information Products to Improve Youth Reproductive Health
Regional Research Projects

- The Appalachian Region: A Data Overview From the 2010-2014 American Community Survey
- Forecasting Regional Growth for the Association of Monterey Bay Area Governments

Research to Policy

In the News

- North Korea Infant Mortality Rate Higher Than South,” BBC (British Broadcasting Corp) and Korea Times, Toshiko Kaneda and Kristin Bietsch, Sept. 7, 2016.
- “Census Data Show Rising Young Latin Workforce Whether Texas is Ready or Not,” Dallas News (Dallas Morning News), Mark Mather, June 23, 2016.

Mission Statement
CDE is a multi-disciplinary cooperative for social scientific demographic research whose membership includes scholars from various departments, especially Economics, Population Health Sciences, Public Affairs, Social Work, Sociology, and Statistics. CDE is one of the leading centers of demographic research in the world, as indicated by the scholarly productivity of its faculty, the level of extramural funding, the production and distribution of widely-used demographic data, and the quality of its graduate training program. CDE faculty affiliates and students conduct research in the center’s five research areas: the demography of inequality; fertility, families, and households; health and mortality; biodemography; and environmental and spatial demography.

Departmental Affiliations
- Agricultural & Applied Economics
- Bacteriology
- Community & Environmental Sociology
- Consumer Science
- Economics
- Educational Leadership & Policy Analysis
- Educational Psychology
- Geography
- Gender & Women’s Studies
- Human Development & Family Studies
- Medicine - Geriatrics
- Obstetrics & Gynecology
- Political Science
- Population Health Sciences
- Public Affairs
- Sociology
- Social Work
- Statistics

Key Areas of Research
- Demography of Inequality
- Fertility, Families, & Households
- Health & Mortality
- Biodemography
- Environmental & Spatial Demography

Domestic Research Projects
- A Longitudinal Resource for Genetic Research in Behavioral & Health Sciences
- Causal Health Spillover Effects in Substance Use Outcomes & Implications for Cost Effectiveness Analysis
- Child Support Noncustodial Parent Employment Demonstration Evaluation (CSPED)
- Contraception & Sexual Acceptability
- Does Work History Influence Multimorbidity Trajectories?
- Family Complexity, Resources, & the Transition to Adulthood
- High School & Beyond: Human Capital over the Life Cycle as a Foundation for Working Longer
- Linking 1940 US Census Data to Five Modern Surveys of Health & Aging
- Neighborhood Socioeconomic Disadvantage & Medicare Re-hospitalization
