

ASSOCIATION OF POPULATION CENTERS

2022 An Independent Group of Universities
and Research Centers

ASSOCIATION OF POPULATION CENTERS

Greetings,

On behalf of the Association of Population Centers (APC), I am proud to share with you the 2022 edition of the APC Resource Guide, a compendium of individual profiles of the nation's premier independent population research organizations. In these pages, you will find a comprehensive overview of the current state of population science including research subject matter, interdisciplinary and cross-institutional collaborations, and applications to real-world decision-making and policy development.

Founded in 1991, the Association of Population Centers is an independent group of university-based centers and private sector research organizations whose mission is to:

- foster collaborative demographic research and data sharing;
- translate basic population research for public policy decision-makers;
- and provide educational and training opportunities in population studies.

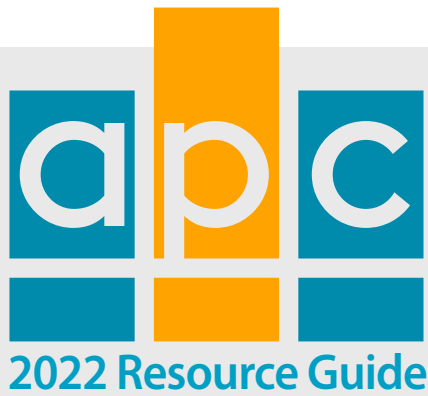

More than 40 distinct entities comprise the APC, including broad-based population centers as well as several centers focused specifically on aging populations. All of our member centers are by design interdisciplinary, drawing faculty and research staff from diverse fields such as demography, economics, geography, medicine, public health, anthropology, biology, public policy, statistics, and sociology. Scholars at APC centers conduct research on the individual, societal, and environmental implications of population change. Their diverse interests include topics such as aging and retirement, minority health, adolescent health, childcare, immigration and migration, family formation and dissolution, fertility, morbidity and mortality, post-disaster resilience, housing and homelessness, rural and urban populations, and population forecasting. This research, in turn, serves to inform planning, policy formulation, and decision-making at the local, regional, national, and even international levels.

APC centers rely on a multitude of public and private funding sources to support their scientists' research. *The National Institute on Aging* and the *Eunice Kennedy Shriver National Institute of Child Health and Human Development* at the *National Institutes of Health* provide most of the competitive federal funding for demographic research. *The National Science Foundation* and the *Agency for International Development* are two other important sources of federal support. Population researchers also rely on accessible data produced by the *Census Bureau*, the *National Center for Health Statistics*, the *National Center for Education Statistics*, and the *Bureau of Labor Statistics* to conduct their research.

For more information about the Association of Population Centers, please visit www.popcenters.org.

Sincerely,

Sara R. Curran
President
Association of Population Centers

ASSOCIATION OF POPULATION CENTERS

CONTACTS:

President: *Dr. Sara R. Curran*, University of Washington, scurran@uw.edu

Vice President: *Dr. William H. Dow*, University of California, Berkeley, wdow@berkeley.edu

Secretary: *Dr. Jennifer Glick*, Pennsylvania State University, jeg115@psu.edu

Treasurer: *Dr. Jennifer Karas Montez*, Syracuse University, jmontez@syr.edu

Mission Statement

Berkeley CEDA promotes the discovery and dissemination of knowledge on the economics and demography of aging. We support the infrastructure and pilot studies necessary for larger research projects; the expansion of national and international networks of researchers; and the development of methods for the analysis of state-of-the-art, often longitudinal, social science data. Through publications, conferences, and public appearances, Berkeley CEDA's affiliates share their findings with policy makers, other academics, and the general public. Berkeley CEDA is one of fifteen centers on the economics and demography of aging nationwide supported by the National Institute on Aging.

Number of Faculty Affiliates: 40+

Departmental Affiliations

- Berkeley Interdisciplinary Migration Initiative
- Berkeley Population Center
- Center for Effective Global Action
- Department of Agricultural and Resource Economics
- Department of Demography
- Department of Economics
- Department of Sociology
- Goldman School of Public Policy
- Haas School of Business
- Institute for Research on Labor and Education
- School of Public Health
- Social Science Matrix

Key Areas of Research

- Mortality Measurement
- Policy and Behavioral Determinants of Adult Health
- Biodemography of Aging
- Macro Consequences of Global Aging

Domestic Research Projects

- [United States Mortality Database \(USMDB\)](#): the premier source for complete state life table data since 1959, allowing the study of state variations in mortality
- [CenSoc](#): studies longevity through linking mortality data from the Social Security Administration with 1940 census records
- [UC Berkeley Social Networks Study \(UCNETS\)](#): assesses how people's social connections affect their health

International Research Projects

- [Human Mortality Database \(HMD\)](#): the premier source creating life table data across 41 countries, used in over 6,000 publications, with more than 60,000 registered users
- [National Transfer Accounts \(NTA\)](#): creates and analyzes data elucidating how population growth and changing population age structure influence economic growth and gender/generational equity, across 97 countries
- [The Caribbean American Dementia and Aging Study \(CADAS\)](#): collects and analyzes data on life-course determinants and consequences of dementia in the Spanish Caribbean in comparison to U.S. Hispanic immigrant populations

Regional Research Projects

- Enhancing Energy Assistance in Michigan
- Fair Housing in the Midst of the COVID-19 Pandemic and the Impact on Migrant and Seasonal Farmworkers, Employment, and Migrant Housing Labor Camps
- Social Determinants of COVID-19 in Ford Employees in Southeastern Michigan: A Longitudinal Study
- Curation, Linkage, and Dissemination of the Flint Registry
- The Effects of Unintended Pregnancy on Children
- Detroit Metropolitan Area Communities Study

Research to Policy

- The Human Mortality Database has facilitated many [analyses](#) on excess mortality during the COVID-19 pandemic, providing research underpinning public health measures in the United States and Europe.
- Joshua Goldstein and Ronald Lee's [PNAS paper](#) shows that prioritizing COVID-19 vaccinations for the elderly saves the most years of life.
- [A UC Nets study](#) indicates a direct and buffering role of social network support on sleep quality, this study provides evidence for incorporating social interventions for sleep health.
- [A series of studies](#) suggest that programs that target social determinants of health have a direct impact on health outcomes, promoting models where primary care settings integrate food and housing assistance (Amanda Brewster, principal researcher).
- [Analysis of the impact of school integration](#) after Brown v. Board of Education indicates higher annual earnings as adults and better health outcomes. This research bolsters the continued adoption of desegregation policies across the United States (Rucker Johnson, principal investigator).
- [Opinion article in The New York Times](#) advocating raising the minimum wage to reduce racial inequality (Ellora Derenoncourt, principal investigator).
- William Dow's [study](#) showed that California's lack of personal protective equipment (PPE) cost the state money and residents their lives, contributing to passage of a new California law mandating PPE stockpiles.

Organizational Collaborations

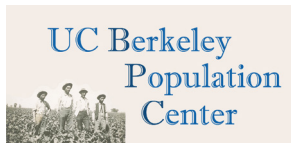

- UC Berkeley Social Networks Study: The Henne Group; Center for Economic and Social Research, University of Southern California; Nexant, Inc.
- Human Mortality Database: Max Planck Institute for Demographic Research, Germany; French Institute for Demographic Studies; and 60 organizations worldwide
- National Transfer Accounts: East-West Center; Counting Women's Work; AGENTA, European Union; Hewlett Foundation; United Nations, Economic Commission for Latin America; United Nations Population Fund
- The Caribbean American Dementia and Aging Study: Universidad Nacional Pedro Henríquez Ureña; Universidad de Puerto Rico, Escuela de Medicina

Mission Statement

The Berkeley Population Center facilitates interdisciplinary collaboration and innovation in population research, while providing essential and cost-effective resources in support of the development, conduct, and dissemination of our work. Our center enhances the quality and quantity of population research conducted at Berkeley; and develops new research capabilities to advance population research through innovative approaches.

Key Areas of Research

- Data Science
- Family Policy
- Formal Demography
- Population Health
- Reproductive Health and HIV

Domestic Research Projects

- **The Heterogenous Effects of Education on Health and Productivity (David Card).** This project studies how education has shaped the life course of health and economic well-being for the generation of Americans born in the 1920s and 1930s. The premise is that education is determined by three factors: First, it is shaped by parents' decisions and circumstances. Second, local institutions and community characteristics also matter. And third, these contextual factors can interact with family background, strengthening or weakening the intergenerational transmission of health and economic well-being.
- **Primary Care Interventions to Support Reproductive Decision-making Among Black and Latina Women With Type 2 Diabetes (Cassandra Marshall).** This research advances our understanding of clinical and health system approaches to improving reproductive health outcomes and delivering reproductive health care to reproductive-aged Black and Latina women with type 2 diabetes.
- **Entering the Job Market in a Recession (Jesse Rothstein).** In this research area, the effects of young adults entering a bleak job market of the Great Recession was shown to have lasting effects on earnings.
- **Community Violence and Disparities in Maternal and Infant Health: Effects and Mechanisms (Jennifer Ahern).** This research reduces disparities by informing both health care approaches to address maternal and infant health disparities by race/ethnicity and foreign-born status as well as violence prevention programs that reduce immediate injuries and deaths and improve maternal and infant health.

International Research Projects

- **Strengthening the Continuity of HIV Care in Tanzania With Economic Support (Sandra McCoy).** An evaluation of an incentive-based intervention for Tanzanian adults to support engagement in HIV care and adherence to antiretroviral treatment.
- **Intergenerational Impacts of Health Investments in Kenya (Edward Miguel).** To measure the causal impact of health, skills, and financial investments made during childhood and adolescence on recipients' long-run life outcomes, as well as on the health and cognitive development of recipients' children, leading to a better policy for youth human capital and financial interventions that can improve long-run living standards, and help break the intergenerational transmission of poverty.
- **Effects in Middle Childhood of Early Exposure to Water and Sanitation Interventions (Lia Fernald).** Hundreds of millions of children worldwide live in poverty and are exposed to poor water and sanitation (WASH), inadequate nutrition, and insufficient caregiving. In our ongoing study in Bangladesh, we found that WASH-Nutrition intervention improved cognitive and language function in very young children, and we are now looking at the same children to see if the early effects are still present in middle childhood when the children are 6-8 years old.

Regional Research Projects

- Community Violence in California and Maternal Health (Jennifer Ahern, Will Dow)
- Removing Firearms From the Community Can Reduce Homicide From Guns (Steve Raphael and Colleagues)

Research to Policy

- Hilary Hoynes (Public Policy) provided briefs to NAS on the importance of SNAP (food support) and how it reduces poverty and increases health and other aspects of well-being.
- Barbara Laraia's (Public Health) work on SNAP shows that in addition to the funding, families need time to prepare food, now part of the President's Thrifty Food Plan.
- Edward (Ted) Miguel (Economics) is providing evaluations to USAID for better future design and implementation of USAID policies.

Mission Statement

The California Center for Population Research at UCLA (CCPR) is an interdisciplinary research organization. CCPR supports and fosters innovative and ambitious research and training in population science. We provide research resources, services, and environment to enhance research quality. CCPR trains the next generation of population scientists to carry out informed research in social, economic, and public health. CCPR seeks deeper understanding of the demographic and social determinants of health and the effects of health on population dynamics and socioeconomic well-being.

University of California, Irvine
Social Science Plaza 3125B
Irvine, CA 92617
cpip.uci.edu
(P): 949.824.8851

Mission Statement

The Center for Population, Inequality, and Policy at UCI is focused on advancing research on socioeconomic factors that directly impact inequality. Faculty in the center investigate the causes and consequences of this inequality as well as policies and other strategies designed to improve well-being of the less advantaged – including employment, education, health, housing and income. UCI researchers across the social sciences, public health, education, social ecology, and natural sciences have a track record of high-quality population research on inequality – research that spans disciplinary boundaries and important areas of public policy.

broom center for demography

University of California, Santa Barbara

Maria Charles, *Director* • Shelly Lundberg, *Associate Director*

University of California, Santa Barbara

www.broomcenter.ucsb.edu/

mcharles@soc.ucsb.edu

(P): 805.893.7281

(F): 805.893.8830

Mission Statement

The Leonard and Gretchan Broom Center for Demography facilitates research and training in social demography and population studies, with particular emphasis on social and economic inequalities and health disparities. Key issues include inequalities across social groups defined by gender, sexuality, race, ethnicity, and immigration status; population-environment interactions; the determinants of population health; migration flows; spatial demography; and the allocation of resources within and across families, workplaces, schools, and other social institutions.

University of Colorado Boulder
483 UCB Boulder, CO 80309-0483
www.cupc.colorado.edu
CUPC@colorado.edu
(P): 303.492.5548
(F): 303.492.2151

Mission Statement

CUPC brings together an interdisciplinary community of scholars, across three University of Colorado campuses, dedicated to research and training in population science with broad focus on health, migration and environmental demography. By providing administrative, technical and development support, CUPC facilitates collegial interaction and nourishes collaboration across several departments, institutes, and universities. An important aspect of the Center is a high level of collaboration between faculty and graduate students. Center affiliates explore demographic processes in the U.S. and a variety of international settings while applying their expertise to yield high quality, policy-relevant research and training. Current initiatives focus on large-scale research initiatives, complex data collection efforts, and new methodological and statistical approaches.

POPULATION RESEARCH CENTER

THE UNIVERSITY OF CHICAGO

Kathleen A. Cagney, *Director*

The University of Chicago
1155 East 60th Street, 3rd Floor
Chicago, IL 60637
popcenter.uchicago.edu

Mission Statement

The Population Research Center at the University of Chicago is an interdisciplinary research center designed to facilitate high-quality population research within its signature theme—human and social capital in the urban context—and conducted by its researchers in economics, sociology, health, and other disciplines.

**Number of Research
Faculty: 70**

**Number of Research
Affiliates: 11**

Departmental Affiliations

- Argonne National Laboratory
- Chicago Booth School of Business
- Department of Comparative Human Development
- Department of Economics
- Department of Psychology
- Department of Public Health Sciences
- Department of Sociology
- Harris School of Public Policy Studies
- Pritzker School of Medicine
- School of Social Service Administration

Key Areas of Research

- **Signature Theme: Human and Social Capital in Urban Context**
- **Sex and Reproductive Health**
- **Economics, Education, and Labor Market Outcomes**
- **Health and Disease Across the Lifespan**
- **Measurement and Methods**

Domestic Research Projects

- Variable Selection Model for Studying the Predictive Validity of Measures of Classroom Quality
- Enhancing Sleep and Physical Activity in the HRS Family of Studies
- Advancing Spatial Evaluation Methods to Improve Health Care Efficiency and Quality
- Disparities in Reproductive Health
- Developing Tools to Engage Adolescent Men Who Have Sex With Men
- Getting on Track Early for School Success: Formative Assessment and Instruction of Mathematics in Preschool Classrooms
- Models of Infectious Disease Agent Study (MIDAS) Research Network
- Determinants of Subsidy Stability and Continuity of Child Care in Illinois and New York
- General Social Survey (GSS)
- National Social Life, Health, and Aging Project (NSHAP)
- National Longitudinal Survey of Youth 1997 (NLSY97)
- Data-Driven Multiscale Coupled Urban Systems Modeling and Urban Sensing
- Activity Space, Social Interaction, and Health Trajectories in Later Life
- Network on the Determinants of Life Course Outcomes
- Suicide Clusters in Schools and Communities
- An Intervention to Improve Women's Reproductive Health
- Remediating Academic and Nonacademic Skills Deficit Among Disadvantaged Youth
- Network Support to Engage and Retain Younger Black MSM in PrEP Care
- Culture, Family Process, and Developmental Outcomes in Asian American Youth
- Computerized Adaptive Testing of Suicidality in LGBT Young Adults
- Data Analysis for Family Homelessness in Chicago
- Increasing Degree Attainment of Low-Income Community College Students
- Inequality in Preschool Support for Families During the Novel Coronavirus Pandemic
- Postsecondary and Civic Outcomes of K–12 Students in Chicago

International Research Projects

- Internal and International Migration in Asia, Africa, and Latin America
- Social Protection and Labor Market Outcomes in South Africa: Employment and Youth Transitions to the Marketplace
- Following Up for Better Health: Improving Noncommunicable Disease Compliance in Urban India
- Evaluation of USAID/Uganda Literacy and Health Education Program
- Optimizing Prevention Approaches for Children Reintegrating From Orphanages in Azerbaijan
- Public (Mis)perceptions in the United States and China
- Human Capital and Economic Opportunity Global Working Group

Regional Research Projects

- Oral Health in Community Context: Health Status and Access to Care on Chicago's South Side
- An Urban Sciences Research Coordination Network for Data-Driven Urban Design and Analysis
- Strengthening Mentoring Programs for At-Risk Youth Through Human Capital Supports: A Large-Scale Randomized Field Experiment in Chicago
- Underground Gun Markets in Chicago
- Southside Health and Vitality Studies (University of Chicago Medical Center)
- Diabetes and Aging in a Multiethnic Population
- Translational Research at the University of Chicago
- Contraceptive Use Among Teens
- Paths to Purposeful Parenting: A Pilot Study Leveraging Neuroscience and Technology to Promote Low-Income Parents' Attention and Focus
- Addressing Truancy Through a Descriptive Social Norms Intervention
- Oral Health, Systematic Health, Well-being, and the Social Sciences
- Development of an Urban-Scale Instrument for Interdisciplinary Research

Research to Policy

- Robert Vargas examines how redistricting laws, bureaucracies, and public policies shape the conditions in cities, including Chicago, with a particular focus on violence and health care.
- David Meltzer and Harold Pollack serve as faculty directors of University of Chicago's Health Lab. The Health Lab partners with civic and community leaders to identify, evaluate, and scale programs and policies that improve health outcomes for low-income and disadvantaged urban residents.
- Luc Anselin uses data science to examine geographic disparities in health care and serves as director of the Center for Spatial Data Science.

Johns Hopkins University

3505 N. Charles Street
Baltimore, MD 21218
popcenter.jhu.edu
hpc@jhu.edu

Mission Statement

The Hopkins Population Center (HPC) aims to promote and facilitate innovative research that combines core strengths in social scientific research, public health research, biomedical and biostatistical research, engineering, and computer sciences. The HPC supports methodological developments that extend beyond traditional demographic methods and translational interdisciplinary research to inform policy makers. The HPC places priority on the development of early stage and early established investigators.

**Number of Faculty
Affiliates: 69**

Departmental Affiliations

- Bloomberg School of Public Health
- Carey School of Business
- Krieger School of Arts and Sciences
- School of Education
- School of Medicine
- School of Nursing
- Whiting School of Engineering

Key Areas of Research

- **Poverty and Inequality**
- **Sexual and Reproductive Health**
- **Family, Maternal, and Child Health**

Domestic Research Projects

- Generating and Validating State-Level Estimates of Fertility Determinants
- Sustainment of Suicide Prevention Programs in American Indian Settings
- Black Men's Health Project (Thorpe)
- Prevention of Dating Violence With Adolescents
- Maternal Cord Blood Metabolome, Infant Feeding, and Food Allergy in a Prospective Birth Cohort
- Multifactorial Breast Cancer Risk Prediction Accounting for Ethnic and Tumor Diversity
- Exposure to Low-Level Mercury, Metabolome, and Child Cardiometabolic Risk in Multi-ethnic Prospective Birth Cohorts
- Reducing Racial Disparities in AD/ABRD: Addressing Structural Discrimination and Resilience
- Creating Protective Higher Education Environments for Sexual Violence Prevention: Practice-Based Evidence and Evaluation
- Research Highlight: Housing Characteristics and Child Health

International Research Projects

- Surviving an Epidemic: Families and Well-being, Malawi
- Global Early Adolescent Study
- ART Diversion in Rakai, Uganda
- Developing Innovative Analytics to Estimate Age- and Cause-Specific Child Mortality for Low- and Middle-Income Countries
- An Anxiety-Focused Early Prenatal Intervention for the Prevention of Common Mental Disorders in Pakistan
- Research Highlight: Preventing Intimate Partner Violence in Kenya

Regional Research Projects

- Barriers and Facilitators to COVID-19 Testing Among Women Who Use Drugs
- Housing Mobility, Environmental Exposures, and Asthma Morbidity Among Low-Income Minority Children
- Open Contest and Neuro-Influence Experiments to Evaluate PrEP Promotion Messages for High-Risk Men
- Building Evidence for Relationship-Centered Approaches to Engage Families in Equitable and Integrated Well-Child Care
- Cardiovascular Disease in Pregnancy and Postpartum in Maryland
- Resiliencies to Physical Stressors in Older Adults
- Research Highlight: Adolescents Affected by Parental Drug Use

Research to Policy

- HPC faculty associate Robert Moffitt's research on food stamps was cited by the U.S. House of Representatives Committee on Agriculture in 2021 hearings on the future of the Supplemental Nutrition Assistance Program (SNAP) after the pandemic, and his research on the Earned Income Tax Credit (EITC) was included in hearings on the SNAP benefit cliff.

Mission Statement

The Harvard Center for Population and Development Studies (HCPDS) is dedicated to improving well-being around the world by better understanding the interaction of demographic changes with social and economic development. Our goal is to produce population-based evidence that will better inform policy to create healthy and resilient societies.

Number of Faculty Affiliates: 70

Research to Policy

- Professor S. V. Subramanian, PhD, in collaboration with an interdisciplinary team of researchers, launched the Geographic Insights Lab to collect and analyze precision data for more effective, evidence-based policymaking. By curating and making more granular-level data publicly available—from COVID-19 vaccine tracking by U.S. congressional district and Indian parliamentary constituency, to village-level child undernutrition in India—a key aim of the Lab is to help shape public policies that better meet the specific needs of constituents.
- As part of the Work and Well-Being Initiative, a public-facing website was launched to share evidence-based strategies and research-tested examples with employers and policymakers on how to create work environments that can foster worker health and well-being. With a special focus on low- and moderate-wage workers, the website features a practical toolkit that employers can use to improve worker health, as well as employee engagement, retention, and productivity.
- Harvard Bell Fellow Brittney Butler, PhD, who holds a dual appointment as an FXB Health and Human Rights Fellow at the Harvard T.H. Chan School of Public Health, testified before the Massachusetts State Racial Inequities in Maternal Health Commission on October 25, 2021, to help shed light on the state of maternal health in the Metro West and Central Massachusetts regions. In her testimony, Dr. Butler cited research on maternal mortality and morbidity, specifically highlighting the important role that neighborhood plays in shaping pregnancy outcomes.

Mission Statement

The mission of the NBER Center is to develop, coordinate and advance research by economists on health and aging issues. Center research considers the health and wellbeing of people as they age, how health and wellbeing are affected by the changing environment in which people live, and what interventions might be effective in improving health and wellbeing.

Number of Faculty Affiliates: 100+

Departmental Affiliations

The NBER is a consortium of economists from research universities around the country. The Center's researchers are drawn largely from the NBER's aging and health care program areas.

Key Areas of Research

Mission Statement

The Life Course Center (LCC) at the University of Minnesota is an incubator for innovative research on the demography and economics of aging. As an NIA-supported University-wide cooperative, LCC recruits and fosters connections among researchers across disciplines; develops leading-edge collaborative pilot studies on aging contexts, trends, dynamics, and disparities; provides technical and administrative support for research development; and supports a research network to leverage large-scale population data to advance interdisciplinary scholarship on social determinants and contexts of aging and health.

MINNESOTA POPULATION CENTER

Theresa Osypuk, *Director* • Kathryn Grace, *Associate Director* • Ann Meier, *Training Director*

University of Minnesota

50 Willey Hall
225 – 19th Avenue South
Minneapolis, MN 55455
pop.umn.edu
mpc@umn.edu
(P): 612.624.5818
(F): 612.626.8375

Mission Statement

The Minnesota Population Center develops and sustains innovative, high-quality, and transformative interdisciplinary population science. It empowers and trains researchers to study and solve the population issues and problems of yesterday, today, and tomorrow.

Number of Faculty Affiliates: 95

Departmental Affiliations

- Applied Economics
- Carlson School of Management
- Educational Psychology

Princeton University, Office of Population Research (OPR)

Sanyu A. Mojola, *Director* • Nancy Cannuli, *Associate Director*

Princeton University

Wallace Hall
Princeton, NJ 08544-2091
opr_inquiries@princeton.edu
(P): 609.258.4870

Mission Statement

The Office of Population Research (OPR) at Princeton University has fostered cutting-edge research and training in population science since it was founded in 1936. It is one of the world's oldest existing population research centers. Our mission is to provide the resources and environment that will facilitate the creation and dissemination of fundamental demographic knowledge and the highest quality learning opportunities for doctoral and postdoctoral trainees.

CUNY INSTITUTE FOR DEMOGRAPHIC RESEARCH

Deborah Balk, *Director* • Frank Heiland, *Associate Director*

City University of New York
Box D-901
One Bernard Baruch Way
New York, NY 10010
www.cuny.edu/cidr

Mission Statement

The CUNY Institute for Demographic Research, which is at the core of New York's first demographic research and training program, facilitates the exchange of ideas among scholars in the field of demography—faculty, students, and other researchers—from within and outside the University in the New York metropolitan area, and provides support necessary to train future demographers and to accomplish the research agendas its affiliates establish.

Number of Faculty Affiliates: 40

Departmental Affiliations

- Ph.D. Programs at the CUNY Graduate Center
 - Criminal Justice
 - Earth and Environmental Science
 - Economics
 - Sociology
 - Social Welfare
- A range of departments at various CUNY colleges:
 - Baruch College
 - Brooklyn College
 - Hunter College
 - Lehman College
 - Queens College
- Austin W. Marx School of Public and International Affairs at Baruch College
- CUNY Graduate School of Public Health and Health Policy

Key Areas of Research

- Spatial Demography, Population, and Climate Change
- Immigration, Migration, and Urbanization
- Aging, Disability, and Mortality
- Poverty and Racial Inequality
- Formal and Informal Unions

Domestic Research Projects

- COVID-19 Vaccine Preferences
- Health Insurance and Poverty
- Family Transitions, Health, and Disability at Middle and Older Ages
- Couple Stability, Transitions to Adulthood, and Same-Sex Unions
- Demography of Despair, Employment, and Economic Anxiety
- Residential Mobility, Racial Segregation, and Increasing Income Inequality and Poverty
- Refugee Resettlement and Integration
- Race, Ethnicity, Migration, and Well-being
- Urbanization and Urban Classification
- Future Extreme Heat Exposure, Vulnerability, and Mortality

International Research Projects

- Spatial Forecasting of Global Urban Population
- At-Risk Populations Along an Urban Continuum in the Low Elevation Coastal Zone
- West Africa's Climate Change and Migration Futures
- Change in Crops and Water on Population Redistribution in Mexico and Ethiopia
- Cohort Evidence on Unequal Retirement Life Spans in High-Income/Transition Countries
- Work Limitations and Disability Benefit Receipt in Europe and the United States Using Vignettes
- Urbanization, Built Environment, and Rising Obesity in Low- and Middle-Income Countries

Regional Research Projects

- The Impact of COVID-19 on New York's Poorest: An Analysis of Excess Mortality During the Pandemic Using Burial Records From Hart Island
- Academic Performance of Undocumented Students in Higher Education
- What Predicts Instability in Postsecondary Enrollment in New York City?
- Managing Illegality on Campus at CUNY: Undocumented Mismatch Between Students and Staff
- Impact of Urban Indoor Air Quality and Thermodynamics on Social Vulnerability
- Housing and Work Experiences of Immigrants in NYC During the COVID-19 Pandemic

Research to Policy

- National Academies of Sciences, Engineering, and Medicine have convened an expert panel to evaluate the Supplemental Poverty Measure developed by S. Korenman and D. Remler.
- The World Bank has adopted B. Jones' methodology for estimating human migration in order to prepare for the looming policy challenge of climate change.
- A. Hsin and R. Smith contributed to an Amicus Brief to the Supreme Court of the United States documenting the benefits of the DACA program.
- D. Balk contributes demographic perspectives to the New York Panel on Climate Change Fourth Assessment and the New York State Climate Impacts Assessment.

- Support for Child and Family Well-being: A Randomized Experiment of Subsidized Housing in NYC
- UPK Implementation: Variation by Setting and Auspice

Research to Policy

- Dr. Christopher Wimer and colleagues at the Center on Poverty and Social Policy estimated that an increased Child Tax Credit (CTC) would cut child poverty by more than 40%. This research informed the Biden Administration's 2021 increase in the CTC.
- Dr. Liz Ananat's research on the impact of rent assistance on children living in public housing communities likely influenced policy decisions to create government rent assistance programs during the COVID-19 pandemic.
- Dr. Sonali Rajan's research on gun violence focuses on creating safer learning environments and healthy experiences for children at school by identifying the impact of over two dozen safety tactics and policies on gun violence in schools across the United States. This work will inform best practices for schools to ensure the safety and well-being of students, teachers, and staff.
- Dr. Julien Teitler's findings in his reproductive health research suggest that delaying birth beyond 39 weeks and avoiding delivery interventions when not medically necessary would improve infant health and reduce health care costs.

(F): 607.255.4071

Mission Statement

CPC coordinates and promotes national and international population research, encourages cross-disciplinary innovation, supports grant-getting, provides cutting-edge demographic training to students and postdocs, and disseminates research findings to policy practitioners and the public.

Grant Development Program

CPC's Grant Development Program supports grant submissions to population-related external funding agencies through mentorship, training, seed funding, and administration.

Seminar Series and Events

CPC hosts a seminar series that expands networks of population scientists and brings innovations in population research to campus. Other regular events include methods mini-courses, conferences, and an annual workshop for population scholars from Upstate New York.

Undergraduate and Graduate Demography Minors

CPC's multidisciplinary training program provides students with opportunities to develop fundamental demographic tools and insights from a range of perspectives. In addition to coursework, the training core offers professional development, research support, and guided mentorship.

Frank H. T. Rhodes Fellowship Program

CPC runs a postdoctoral training program with support from the Atlantic Philanthropies' endowment in honor of former Cornell president, Frank H.T. Rhodes.

Key Areas of Research

- **Population and Policy**
- **Immigration and Diversity**
- **Poverty and Inequality**
- **Health Behaviors and Disparities**
- **Families and Children**

Domestic Research Projects

- COVID-19 Vulnerability and Implications
- Changing Family Patterns, Fatherhood, and Child Well-being
- Health Inequalities and Health Care Reform
- Race/Ethnicity and Intergenerational Economic Mobility
- Gender Inequality at Home and at Work
- Economic and Social Well-being of Immigrants
- Aging and State Policies Affecting Caregiving Strategies
- Impact of Obesity on Medical Costs and Labor Market Outcomes
- Incarceration and Its Effects on Children and Families
- Urban Older Adults and Health Inequalities

International Research Projects

- International Food Security and Agri-Food Systems
- Sub-Saharan African Social Mobility
- Family and Gender Dynamics in Developing Countries
- Family Policy in Europe
- Immigration in the Technology Economy
- Global Asylum and Deportation Policy
- Impacts of the Coronavirus Pandemic in Developing Countries

Regional Research Projects

- COVID-19 Vulnerability, Data Collection, Health, and Economic Effects
- Unmet Caregiving Need Across State Policy Contexts
- Criminal Justice, Immigration Enforcement, and Child Welfare Systems
- Vulnerable Families and Intergenerational Poverty
- Health Behaviors, Implications for Inequality, and Interventions
- Opioid Abuse and Impact on Families
- New York Tobacco Tax Revenues and Regulations
- Medicaid and the U.S. Health Care Safety Net

Research to Policy

- K. Bischoff and L. Tach advanced research on school choice, neighborhood change, and racial imbalance between public elementary schools and surrounding neighborhoods.
- E. York Cornwell and A. Reyes examined how COVID-19 affects the daily mobility patterns and health outcomes of urban older adults.
- R. Dunifon analyzed the historic trends in children living in multigenerational households in the United States.
- P. Eloundou-Enyegue is exploring how empowering Cameroonian youth helps lead the global conversation on population and development.
- S. Gleeson advocated for migrant workers' rights and the role sending states have begun to play in international migration, residents' labor, and human rights.
- J. Michener is working on a study to build community power through tenant organizing.
- D. Miller studied how machine learning may be a prediction of tax evasion.
- B Park is examining how online foci can shape the collaborative research conversation.
- K Pillemer examined the incidence of older adults at risk of elder abuse.
- P. Rich researched the complexities of charter schools and segregated neighborhoods and schools.

Guttmacher Center for Population Research Innovation and Dissemination

Kathryn Kost, *Director* • Ann Moore, *Associate Director*

Guttmacher Institute

125 Maiden Lane, 7th Floor
New York, NY 10038
www.guttmacher.org
popcenter@guttmacher.org
(P): 212.248.1111
(F): 212.248.1951

Mission Statement

The Guttmacher Institute is a leading research and policy organization committed to advancing sexual and reproductive health and rights (SRHR) in the United States and globally in ways that help create more just and equitable societies. We do this through positioning SRHR as essential to the achievement of health and development goals; examining the social determinants of health that underlie SRHR inequities to continue to make disparities seen; and elevating the centrality of legitimate science and evidence in the public discourse.

The Guttmacher Center for Population Research Innovation and Dissemination enhances the quality of research carried out at the Institute by providing opportunities for interdisciplinary idea generation, building the skills of a new generation of scientists, and encouraging collaboration and partnerships with external colleagues. It also ensures that the Institute's work and data are made available to a wide range of audiences.

**Number of Center
Affiliates: 37**

**Number of Doctoral
Affiliates: 19**

Key Areas of Research

- **Fertility Preferences, Pregnancy Intentions, and Pregnancy Outcomes**
- **Sexual Behavior, Contraceptive Use, and Reproductive Health Services**
- **Large Scale Data Collection and Surveillance of Key Reproductive Health Indicators**
- **Adolescent Sexual and Reproductive Health**
- **Policy Impacts on Reproductive Health Outcomes**
- **Measurement of Fertility-Related Behavior and Pregnancy Outcomes**

Domestic Research Projects

- Monitoring the Incidence of Unintended Pregnancy at the National and State Levels
- Calculating New Estimates of Contraceptive Failure
- Monitoring Trends in the Use of Contraception
- Measuring Key Reproductive Health Indicators Among Immigrant Women
- Studying Publicly Funded Family Planning Clinics and Clients to Document the Impact of Policy Changes and COVID-19
- Developing New Survey Questions for Tracking Contraceptive Use at the State Level
- Tracking the Impact of COVID-19 on Fertility Attitudes and Behaviors
- Developing and Testing New Survey Questions for Measuring the Completeness of Abortion Reporting in a Nationally Representative Survey

International Research Projects

- Estimating the Incidence and Trends of Unintended Pregnancy and Abortion Worldwide
- Quantifying the Impact on Sexual and Reproductive Health Services of the Global Gag Rule
- Documenting Cost of Unsafe Abortion in Countries With Restrictive Abortion Laws
- Advancing Methods for Measuring Abortion
- Using the Platform of the Guttmacher-Lancet Commission to Help Develop a Broader and Evidence-Based Vision for SRHR Worldwide Over the Next 15 Years
- Estimating the Need for and Coverage, Costs, and Impact of Providing Comprehensive Contraception, Pregnancy-Related, and Newborn Health Care in Low- and Middle-Income Countries
- Estimates of and Data on the Impact on Sexual and Reproductive Health of the COVID-19 Pandemic

Regional Research Projects

- National and State-Level Pregnancy Statistics, Including Unintended Pregnancy Rates, Adolescent Pregnancy, and Childbearing Trends
- Abortion Incidence and Services in States and Metropolitan Areas
- State and County-Level Tracking of Contraceptive Needs and Services
- Investigating the Impact of Federal and State Policy Changes on the Provision of Family Planning Services and on Individuals' Access to Contraception
- Documenting Current Contraceptive Use Patterns Across States
- Producing Estimates of the Potential and Realized Impacts of States' Restrictive Abortion Policies on Access to Abortion Care

Research to Policy

- Monitored Reproductive Health Policy Developments Nationally and in Each State
- Using Several Channels, Including the Guttmacher Institute's Policy Analysis, Brought Data, and Research, to Public Policy Debates on Sexual and Reproductive Health Issues
- Used Data and Analysis by Guttmacher Researchers to Assess the Impact of the Evolving COVID-19 Pandemic on Sexual and Reproductive Health and Rights at Multiple Levels

CENTER FOR AGING AND POLICY STUDIES

Cornell • Syracuse • UAlbany

Jennifer Karas Montez, *Director*

Syracuse University

314 Lyman Hall
Syracuse, NY 13244
asi.syr.edu/caps/
(P): 315.443.2703

Mission Statement

The Center for Aging and Policy Studies is a collaboration between Syracuse University, Cornell University, and University at Albany. It aims to improve the health, well-being, and independence of older adults by conducting innovative and rigorous research, providing state-of-the-art training to scientists, and disseminating research findings to scientists, decision makers, and the public.

Number of Faculty Affiliates: 42

Departmental Affiliations

- Anthropology

- Public Health, Food Studies, and Nutrition
- School of Social Work
- Sociology

Key Areas of Research

- Population Health and Well-being
- Family and Intergenerational Supports
- Cross-Cutting: Policy, Place, and Specific Populations

Domestic Research Projects

Population Health and Well-being

- Trends and Disparities in Health
- Mortality Among Adults With Developmental Disability
- Personality Traits and Age Trajectories of Health
- Impact of COVID-19 Policies on Psychological Health, Drug Overdose, and Suicide
- Health, Longevity, and Cognition Among Subgroups of Older Latino Adults
- Health and Economic Well-being of Older LGBT Adults
- Long-Term Health Effects of Military Service
- U.S. State Policy Polarization and Life Expectancy
- Race-Ethnic Disparities in Cognitive Function
- Rural-Urban Disparities in Health Care Access and Outcomes
- Vascular Aging in African American Adults
- Geographic Disparities in Substance Misuse and Mortality
- Hearing Loss, Technology, and Cognitive Function
- Life Course Influences on Cardiovascular and Metabolic Health
- Pay-for-Performance and Long-Term Care
- Food Insecurity, Food Policies, and Disability

Family and Intergenerational Supports

- Grandparenting, Grandparent Care Work, and Family Well-being
- Children's Help to Aging Parents During COVID-19
- Cognitive Function and Housing Transitions
- Older Adults' Activity Spaces, Social Networks, and Health
- Union Formation Among Elderly Couples
- Reciprocity in Parent-Child Relations Over the Adult Life Course
- Parental Health Decline and Adult Children Migration
- Social Disconnectedness and Isolation Among Older Adults
- Kin Support and Mortality Among Older Adults
- Technology and Intergenerational Communications
- Intergenerational Time and Money Transfers
- Social Security, Pensions, and Retirement Well-being
- Paid Family Leave and Nursing Home Use
- Medicaid Expansion and Older Mothers' Birth Outcomes

International Research Projects

- Cross-National Differences in Provision of Care and Support to Older Parents
- Cross-National Differences in Experiences of LGBT Breast Cancer Survivors
- Family Relationships and Living Arrangements of Older Adults in China
- Stress and Health Problems Among Older Workers in the Netherlands
- U.S.–Finland Comparison of Women’s Mortality

Regional Research Projects

- Cognitive Screening Tools for the Onondaga County Office for Aging
- Geographic Variation in Veteran Mortality
- U.S. State Policy Influences on Coding of Causes of Death
- Aging and Well-being in Rural America
- Geographic Variation in Drug, Alcohol, and Suicide Mortality
- Racial Segregation and Health in Philadelphia

Research to Policy

- Marc Garcia gave a congressional briefing on “Living, Working, Dying: Demographic Insights Into COVID-19” to discuss the impact of the pandemic and federally-funded relief efforts on Latinx and Black communities.
- Dan Lichter joined the U.S. Census Bureau National Advisory Committee on Racial, Ethnic, and Other Populations.
- Pinka Chatterji reported that gaining access to Medicare at age 65 is linked to increased use of outpatient care, driven by adults who were uninsured before turning 65.
- Jennifer Karas Montez met with U.S. state legislators to discuss how state policy polarization is affecting life expectancy.
- Colleen Heflin testified before Congress on the hunger crisis among veterans and military families.
- Maria Brown identified needs of long-term survivors and people aging with HIV in New York.

Mission Statement

The Duke University Population Research Institute (DUPRI) is an interdisciplinary research organization bringing together researchers from biological, statistical, behavioral, social and policy sciences at Duke. The Institute seeks to advance knowledge in demography and population science, to expand the current boundaries of demographic investigation through highly innovative interdisciplinary research, and to foster the development of the next generation of researchers.

Mission Statement

At the Carolina Population Center (CPC) we believe that understanding how and why populations change over time is key to advancing the well-being of all people. Our faculty, staff, and students conduct research on population, health, aging, and the environment, and share data and findings that push the field forward and train the next generation of population scholars.

cfdrr@bgsu.edu

(P): 419.372.7279

(F): 419.372.3179

Mission Statement

Committed to understanding the well-being of children and families, the Center for Family and Demographic Research (CFDR) integrates demographic methods, data, and perspectives with other social scientific approaches. The CFDR is dedicated to demographic training, research and service.

Number of Faculty

Affiliates: 42

Departmental Affiliations

- Criminal Justice
- Economics
- Educational Foundations & Inquiry
- Gerontology
- Human Development & Family Studies
- Psychology

- Sociology

Key Areas of Research

- **Fertility and Family Demography**
- **Social Relationships and Well-being**
- **Deviance, Crime, and Violence in Social Context**

Domestic Research Projects

- The Coronavirus Pandemic: Predictors and Consequences of Compliance With Social Distancing Recommendations
- U.S. Fertility and the Pandemic: Changing Fertility Plans in an Era of Uncertainty and Stress
- Tracing the Health Consequences of Family Support During the COVID-19 Pandemic
- Consistency of Retrospectively Reported Fertility Data
- Health and Well-being Effects on Later-Life Divorce and Subsequent Repartnering
- Life Course, Relationship, and Situational Contexts of Teen Dating Violence
- Measuring Marriage and Divorce at the County Level
- Senior Hunger and Food Insecurity Infrastructure
- Mechanisms Underlying Desistance From Crime
- Social Influences on the Long-Term Cessation of Violence
- Mechanisms Underlying Sexual Minority Health Disparities
- Police Crime Database
- Gender, Race, and Sexual Minority Disparities in Family Stress and Health During Crises
- Older Adult Dementia Risk and Offspring Education

Regional Research Projects

- Women's Health in Ohio
- Social Determinants of Health in Ohio

Research to Policy

As part of the Executive Committee for the Ohio Medicaid Assessment Survey (OMAS), Balistreri regularly met with agency representatives from the Ohio Departments of Health, Medicaid, Aging, and Minority Health to review key findings on her research on the social determinants of health in Ohio, and the health and well-being of women in Ohio. The results of OMAS projects such as these assist the Ohio Department of Medicaid and other health-associated state and local agencies in developing strategies for improving health services to Ohio's population.

Columbus, OH 43210
ipr.osu.edu
(P): 614.292.2858

Mission Statement

The Institute for Population Research is a multi-disciplinary research center that nurtures population and health research at The Ohio State University. IPR serves as a bridge between behavioral and biomedical departments at OSU; fosters collaborative, multidisciplinary research projects; and mentors and trains junior scholars.

Number of Faculty Affiliates: 99

- Precarious Work and Mental Well-being Among Bhutanese Refugees in Columbus, Ohio
- Socioeconomic Transition in the Appalachian Coal Region
- Prevention and Treatment of Substance Use and Sexually Transmitted Infections in Appalachian Ohio

Research to Policy

- IPR affiliates worked with local K–12 school districts and universities on measures to curb the spread of COVID-19.
- IPR affiliates are part of a team of OSU scientists and local partners acting to rapidly roll out COVID-19 testing programs among minority and vulnerable populations as part of NIH's RADx-UP initiative (Rapid Acceleration of Diagnostics – Underserved Populations).
- IPR affiliates presented evidence on the impact of bind over laws (transferring juvenile cases to be tried in adult courts) to the Ohio State Supreme Court Sub-Committee on Juvenile Justice.
- IPR affiliates are designing new ways to measure death rates and causes of death in low-income countries in collaboration with the United Nations Population Division, the Bloomberg Data for Health Initiative, national governments, and NGOs.

Mission Statement

The Population Research Institute is a multidisciplinary center that delivers resources that support innovative population research. PRI promotes a dynamic, talented, and collaborative research community with over 100 faculty researchers. Established over four decades ago at the Pennsylvania State University and funded by the National Institutes of Health since 1992 with generous supplemental support from PSU, this vibrant, multidisciplinary center provides strategic resources to support innovative, high impact population research.

Mission Statement

The PSC's mission is to remain a national and world leader in research and training. Our goal is to link core research in the social and behavioral sciences to issues on the growth and structure of human populations and the role of socioeconomic stratification and human/social diversity in population health. The PSC is characterized by continuity, innovative and high-quality population-related research and maintains a flexible research infrastructure that enhances interaction, builds collaborations and encourages understanding of evolving issues. The training program is a leader in the preparation and mentoring of Ph.D. students and Post-Doctoral fellows and reflects a vision of the population sciences and health in which a strong background logic of demographic process is the gateway to an array of topics of public/scientific interest.

www.pstc.brown.edu
population_studies@brown.edu
(P): 401.863.2668
(F): 401.863.3351

Mission Statement

The Population Studies and Training Center promotes and supports innovative research on the causes and consequences of population size, composition, distribution, and wellbeing in the U.S. and globally. The Center carries out this mission by providing state-of-the-art facilities and research support to associates; maintaining a forum for intra- and interdisciplinary exchange on population science; supporting a high-quality graduate and postdoctoral training program; mentoring a diverse and inclusive community of population scholars at Brown; engineering and seeding promising new areas of population research; and developing cross-unit collaborations on campus and with partners in Rhode Island (RI) and around the world.

(P): 512.471.5514

Mission Statement

The overarching mission of The Center on Aging and Population Sciences (CAPS) is to galvanize novel research that illuminates how biological, psychosocial, and environmental factors intersect and cascade throughout the life course to generate disparities in health and well-being at older ages. The Center promotes collaborations among scholars, supports pilot projects to address complex aging and population health issues, and works to grow the number and diversity of researchers who study aging at all career stages.

The University of Texas at San Antonio

Downtown Campus
501 W. César E. Chávez Blvd
San Antonio, Texas 78207-4415
idser.utsa.edu

Mission Statement

IDSER stimulates and supports transdisciplinary research that extends knowledge on five key areas and informs both policies and practices at the local, state, and national levels. Several of our affiliates teach and mentor MS and PhD students from UTSA's Department of Demography. Housed within IDSER is the Texas Demographic Center, a state entity, which distributes demographic, economic, and related data and information to private and public sector clients in Texas and other parts of the nation. Faculty associated with IDSER are leaders in population science through a variety of positions, including the State Demographer of Texas, the President of the Southern Demographic Association, an Elected Member of the Population Association of America Board of Directors, and the Editors of Population Research and Policy Review.

Yun Kim Population Research Laboratory

Sojung Lim, *Director* • Erin Hofmann, *Associate Director*

Utah State University

Department of Sociology and Anthropology
0730 Old Main Hill
Logan, UT 84322-0730
chass.usu.edu
sojung.lim@usu.edu
(P): 435.797.8458
(F): 435.797.1240

Mission Statement

Since its inception in 1968, The Yun Kim Population Research Laboratory (PRL) has served as a center for demographic research and training at Utah State University. Today, the primary mission of the PRL is to stimulate and support quality scientific research on a range of population issues affecting our state, nation, and world. Research productivity among our faculty facilitates another key mission of the PRL – to train and mentor the next generation of applied demographers and population scholars through the M.S. and Ph.D. programs in Sociology. Through seminars and research support, the PRL serves to create a vibrant community of population scholars at Utah State University.

The Center for Studies in Demography and Ecology

Sara Curran, *Director*

University of Washington
206 Raitt Hall – Box 353412
Seattle, WA 98195
csde.washington.edu
csde@u.washington.edu
(P): 206.616.7743

Mission Statement

The Center for Studies in Demography and Ecology (CSDE) supports the advancement of population science through research and training. As a federally funded research center with over 70 years of experience, the CSDE scientists develop new demographic measures and methods, advance knowledge about population dynamics, generate new data and evidence to support population science, and train the next generation of demographers.

- Estimating Subnational Mortality Among Children Under 5

Regional Research Projects

- Seattle and King County Population and Housing Tract-Level Forecasts
- Puget Sound Health and Wellness Project

Research to Policy

- In a quasi-experimental design, CSDE researchers evaluated how increases in the Earned Income Tax Credit (EITC) significantly decrease incidences of child neglect and maltreatment (Kovski, Hill, Rowhani).
- Poverty is growing in rural and suburban communities, but nonprofit social service network is not growing with it. Urban areas have higher concentrations of social service providers per capita than do rural and suburban communities. The mismatch is keeping rural poverty hidden (Allard and Pelletier).
- Lack of broadband access is associated with higher undercount of Native American populations on remote tribal lands (Swanson).
- A recent UK cut to family planning resources led to a substantial decline in contraceptive use, an increase in unmet need, and unintended pregnancies (Darroch).
- Crowdfunding provides substantially higher benefits only in wealthier counties with higher levels of education, demonstrating how a market-oriented digital technology used to respond to large-scale crisis can exacerbate inequalities and further benefit already privileged groups (Kenworthy).
- The eviction moratorium has been successful in preventing a surge in formal evictions during the pandemic in Seattle. However, methods of informal evictions and forced moves, such as landlords changing door locks and refusing to renew leases, have significantly increased (Fyall and Fowle).
- Mothers who witness a shooting exhibit higher levels of depression than mothers who have not. Racial disparities in exposure to gun violence further widen the health and wellness disparities gap, especially for mothers (Leibbrand and Rowhani).

Center for Public Information on Population Research

Linda A. Jacobsen, *Director* • Mark Mather, *Associate Director*

Population Reference Bureau

1875 Connecticut Avenue, NW
Suite 520

Washington, DC 20009

www.prb.org/cpipr

ljacobsen@prb.org

(P): 202.483.1100

(F): 202.328.3937

Mission Statement

The Center for Public Information on Population Research (CPIPR) at the Population Reference Bureau (PRB) serves as the Coordinating Center for the NICHD Population Dynamics Centers Research Infrastructure Program to improve the translation and dissemination of major findings from population dynamics research, and to improve communication and cooperation across the Centers.

Number of Faculty Affiliates: 69

Departmental Affiliations

- Bloomberg School of Public Health
- Carey School of Business
- Krieger School of Arts and Sciences
- School of Education
- School of Medicine
- School of Nursing
- Whiting School of Engineering

Key Areas of Research

As a Coordinating Center, our activities include:

- Facilitating coordination and cooperation across the NICHD-funded Population Dynamics Research Centers to enhance the productivity and scientific impact of the Centers and of population dynamics research overall.
- Translating and disseminating major peer-reviewed findings, methods, and perspectives from population dynamics research to other scientists, and to nontechnical audiences including policymakers, program directors, practitioners, educators, journalists, and students.
- Developing and maintaining a Population Dynamics Research Centers website that includes nontechnical summaries of recent research from the Population Dynamics Centers.
- Promoting Population Dynamics Centers research through Twitter, Facebook, and other social media platforms.
- Organizing workshops at professional meetings and providing training materials that empower Population Dynamics Centers researchers to effectively communicate their own research results to policy, media, and nontechnical audiences.
- Collaborating with Population Dynamics Research Centers and other organizations to organize and host symposia, congressional briefings, or other events to raise the visibility of population dynamics research and link major findings to important policies and programs.

- Aging and the Life Course
- Biodemography and Social Genomics
- Determinants of Disparities of Aging Trajectories
- Health Economics and Health Services Research
- Impacts of Place on Aging Processes

Domestic Research Projects

- Applying Biodemography Methods to Advance our Understanding of Socioeconomic Risk Factors for Alzheimer's Disease: Uses Findings From Genetics, Education Research, Health Economics, and Econometrics to Estimate the Effects of Educational Attainment on Alzheimer's Disease
- Educational and Early-Life Predictors of Mild Cognitive Impairment: New Evidence About Mediators and Moderators From High School and Beyond: Examines the Impacts of Education on Cognitive Functioning in Later Life by Studying Genetic Data From Participants in a National Longitudinal Study (High School & Beyond)
- Genomic and Metabolomic Data Integration in a Longitudinal Cohort at Risk for Alzheimer's Disease: Works to Identify Novel Genes, Metabolic Profiles, and Interactions Between the Two That Will Help Develop Precision Medicine for Alzheimer's
- The Importance of Place in Determining Health and Mortality at Older Ages: Studies the Impacts of Early-Life Geographic Context on Old Age Health, Disability, and Mortality by Using Data on Millions of Individuals Linked to Their State/County of Birth Over the Twentieth Century
- The Importance of Place of Birth in Determining Old Age Cognitive Health: Aims to Increase Understanding of the Impacts of Early-Life Geographic Context on the Levels of and Disparities in Old Age Cognitive Health and Alzheimer's
- Life Course Determinants of Epigenetic Age Acceleration and Subsequent Dementia: Examines the Impact of Interactions Between Socioeconomic Status, Genotype, and Health Behaviors on Disparities in Epigenetic Age Acceleration and Cognitive Decline or Alzheimer's
- Neighborhood Socioeconomic Contextual Disadvantage and Alzheimer's Disease: Explores the Effect of Neighborhood Disadvantage on the Development of Dementia
- Retirement in the Context of Intergenerational Transfers: Explores the Motivations and Consequences of Retirement by Examining Intergenerational Relationships

International Research Projects

- Understanding the Importance of Place of Birth on Alzheimer's Disease Outcomes in the United States and United Kingdom: Uncovers the Relationship Between Place of Birth and Later Health by Focusing on Mobility and Early Exposures
- Latin American Mortality Database (LAMbDA): Supports the Study of Mortality Trends in Latin American Countries: 1848–2014

Regional Research Projects

- A Novel Longitudinal Study of the Association Between the Gut Microbiome and Aging (Wisconsin): Characterizes the Variations of Gut Microbial Composition With Advancing Age and Age-Related Chronic Inflammation and Associated Diseases Using the Wisconsin Longitudinal Study
- Researching Epigenetics, Weathering, Aging and Residential Disadvantage (REWARD) (Wisconsin): Explores How Different Dimensions of Disadvantage Shape Health Disparities Through Epigenetic Mechanisms
- Robust Mendelian Randomization Methods to Identify Causal Risk Factors for Alzheimer's Disease (Wisconsin): Identifies Risk Factors for Alzheimer's Using the Wisconsin Registry for Alzheimer's Prevention
- Wisconsin Longitudinal Study 2020 and Beyond: An Expansion of the Wisconsin Longitudinal Study That Examines How Early Exposures to Pollution and Toxicants Predict Mortality
- Wisconsin Longitudinal Study—Initial Lifetime's Impact on Alzheimer's Disease and Related Dementias (WLS-ILIAD Study): Tracks the Progression Into Dementia of Participants in the Wisconsin Longitudinal Study. The Project Uncovers How the Early-Life Period Affects Dementia Risk—as Well as Adult Behaviors That Can Offset Risk
