

ASSOCIATION  
OF POPULATION  
CENTERS

2023 An Independent Group  
of Universities  
and Research Centers

## ASSOCIATION OF POPULATION CENTERS

Greetings,

On behalf of the Association of Population Centers (APC), I am proud to share with you the 2022 edition of the APC Resource Guide, a compendium of individual profiles of the nation's premier independent population research organizations. In these pages, you will find a comprehensive overview of the current state of population science including research subject matter, interdisciplinary and cross-institutional collaborations, and applications to real-world decision-making and policy development.

Founded in 1991, the APC is an independent group of university-based centers and private sector research organizations whose mission is to

- foster collaborative demographic research and data sharing;
- translate basic population research for public policy decision-makers;
- and provide educational and training opportunities in population studies.

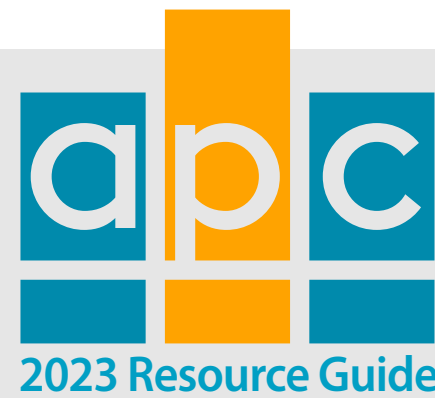

More than 40 distinct entities comprise the APC, including broad-based population centers as well as several centers focused specifically on aging populations. All member centers are interdisciplinary, drawing faculty and research staff from diverse fields such as demography, public health, sociology, economics, geography, epidemiology, medicine, anthropology, biostatistics, public policy, and statistics. Scholars at APC centers conduct research on the individual, societal, and environmental implications of population change. Their diverse interests include topics such as child and adolescent health, health disparities, childcare, education, labor market conditions, immigration and migration, racial and ethnic inequalities, family formation and dissolution, fertility, morbidity and mortality, aging and retirement, disruptive events, housing and homelessness, rural and urban populations, and population forecasting. This research, in turn, serves to inform planning, policy formulation, and decision-making at the local, regional, national, and even international levels.

APC centers rely on a multitude of public and private funding sources to support population scientists' research. The National Institute on Aging and the Eunice Kennedy Shriver National Institute of Child Health and Human Development at the National Institutes of Health provide most of the competitive federal funding for demographic research. The National Science Foundation and the Agency for International Development are two other important sources of federal support. Population researchers also rely on accessible data produced by the Census Bureau, the National Center for Health Statistics, the National Center for Education Statistics, and the Bureau of Labor Statistics to conduct their research.

For more information about the Association of Population Centers, please visit [www.popcenters.org](http://www.popcenters.org).

Sincerely,

Jennie Brand  
President  
Association of Population Centers

# Berkeley Center on the Economics and Demography of Aging

William Dow, *Director* • Ronald Lee, *Associate Director*

**University of California, Berkeley**  
360 Social Sciences Hall  
Berkeley, CA 94720-3880  
[www.populationsciences.berkeley.edu/ceda](http://www.populationsciences.berkeley.edu/ceda)  
[ceda-demog@berkeley.edu](mailto:ceda-demog@berkeley.edu)

### Mission Statement

Berkeley CEDA promotes the discovery and dissemination of knowledge on the economics and demography of aging. We support infrastructure and pilot studies necessary for larger research projects; the expansion of national and international networks of researchers; and the development of methods for the analysis of state-of-the art, often longitudinal, social science data.

### Number of Faculty Affiliates: 52

Through publications, conferences, and public appearances, Berkeley CEDA affiliates share their findings with policy makers, academics, and the general public. Berkeley CEDA is one of fifteen centers on the economics and demography of aging nationwide supported by the National Institute on Aging.

### Departmental Affiliations

- Berkeley Population Center

### Key Areas of Research

- **Mortality Measurement**
- **Policy and Behavioral Determinants of Adult Health**
- **Biodemography of Aging**
- **Macro Consequences of Global Aging**

### Domestic Research Projects

- United States Mortality Database: The Premier Source for Complete State Life Table Data Since 1959, Allowing the Study of State Variations in Mortality
- CenSoc: Studying Longevity Through Linking Mortality Data From the Social Security Administration With 1940 Census Records

### Regional Research Projects

- UC Berkeley Social Networks Study: Assessing How People’s Social Connections Affect Their Health

### International Research Projects

- Human Mortality Database: The Premier Source Creating Life Table Data Across 41 Countries, Used in More Than 6,000 Publications, With More Than 60,000 Registered Users
- National Transfer Accounts: Creating and Analyzing Data That Elucidates How Population Growth and Changing Population Age Structure Influence Economic Growth and Gender/Generational Equity, Across 97 Countries
- The Caribbean American Dementia and Aging Study: Collects and Analyzes Data on Life Course Determinants and Consequences of Dementia in the Spanish Caribbean in Comparison to U.S. Hispanic Immigrant Populations

### Research to Policy

- Ron Lee gave the opening presentation on Population Aging and Fiscal Stability in the EU at an European Union meeting of high-level representatives of European and international institutions, national treasuries, independent fiscal institutions, and market actors.
- Gretchen Donehower presented at a United Nations statistics division Beyond GDP meeting on accounting for unpaid care work in improving our understanding of GDP measures.
- Hilary Hoynes testified before the House Budget Committee in July 2022 on the long-term benefits of investing in early childhood, via higher education and earnings, better adult health, and less criminal behavior, which together result in long-term fiscal payoffs.
- Josh Goldstein and Ron Lee advised Congressional Budget Office staff on how the Dodds abortion ruling might affect fertility projections.
- Will Dow presented on RESEARCH-BASED LESSONS from California’s First-in-the-Nation Paid Leave Program at a policy webinar sponsored by New America.

## Mission Statement

The Berkeley Population Center facilitates interdisciplinary collaboration and innovation in population research, while providing essential and cost-effective resources in support of the development, conduct, and dissemination of our work. Our center enhances the quality and quantity of population research conducted at Berkeley; and develops new research capabilities to advance population research through innovative approaches.

## Number of Faculty

- **Family Policy**
- **Formal Demography**
- **Population Health**
- **Reproductive Health and HIV**

## Domestic Research Projects

- Identifying Predictors of Opioid Overdose Death at a Neighborhood Level With Machine Learning
- The Economic and Health Costs of Employment Segregation: Evidence From the U.S. Federal Government
- Longitudinal Associations Between Objective and Perceived Healthy Food Environment and Diet: The Multi-Ethnic Study of Atherosclerosis
- Predictors of COVID-19 Vaccination Likelihood Among Reproductive-Aged Women in the United States
- The COVID Era Is the Latest Episode of Medical Scapegoating of Asian Immigrants
- Entering the Job Market in a Recession

## Regional Research Projects

- The Paid Parental Leave Ordinance and Parents' Health
- How the Expanded Child Tax Credit Helped California Families
- The Center for the Health Assessment of Mothers and Children of Salinas Study

## International Research Projects

- All-Cause Excess Mortality Across 90 Municipalities in the State of Gujarat, India, During the COVID-19 Pandemic
- Machine Learning and Phone Data Can Improve the Targeting of Humanitarian Aid
- The Economics of the COVID-19 Pandemic in Poor Countries

## Research to Policy

- David Harding's (Sociology) work on prisoner reentry and the effects of incarceration is helping to better understand the experiences of former prisoners as they return to society, and the impact of incarceration on employment and future criminal activity.
- Hilary Hoynes (Public Policy) provided briefs to NAS on the importance of SNAP (food support) and how it reduces poverty and increases health and other aspects of well-being.
- Anu Gomez (Social Welfare) is evaluating the impact of and evidence base for policies related to reproductive health and is describing the relationship between psychosocial stress and preterm birth in Black and Hispanic/Latina women.

## Research to Policy (cont'd)

- Edward (Ted) Miguel (Economics) is providing evaluations to USAID for better future design and implementation of USAID policies.
- Barbara Laraia's (Public Health) work on SNAP shows that in addition to the funding, families need time to prepare food, now part of the President's Thrifty Food Plan.

Mission Statement

The California Center for Population Research at UCLA (CCPR) is an interdisciplinary research organization. CCPR supports and fosters innovative and ambitious research and training in population science. We provide research resources, services, and environment to enhance research quality. CCPR trains the next generation of population scientists to carry out informed research in social, economic, and public health. CCPR seeks deeper understanding of the demographic and social determinants of health and the effects of health on population dynamics and socioeconomic well-being.

## Mission Statement

The Center for Population, Inequality, and Policy at UCI is focused on advancing research on socioeconomic factors that directly impact inequality. Faculty in the center investigate the causes and consequences of this inequality as well as policies and other strategies designed to improve well-being of the less advantaged – including employment, education, health, housing and income. UCI researchers across the social sciences, public health, education, social ecology, and natural sciences have a track record of high-quality population research on inequality – research that spans disciplinary boundaries and important areas of public policy.

Mission Statement

At the Center on Gender Equity and Health, we believe gender equity, health, and dignity for all people is achievable. Our mission is to build action-oriented collaborative research to understand and counteract gender inequities, locally and globally. To achieve this mission and support use of our work for large-scale and sustainable advancement of population health in California and across multinational settings, GEH maintains partnerships with governmental and non-governmental organizations around the world.

Number of Faculty  
**Affiliates: 23**

Department Affiliations

- Medicine: Global Health
- OB/GYN
- Public Health
- Global Policy
- Education Studies
- Economics

Key Areas of Research

- **Gender and Health: SRH and MCH**
- **Gender-Based Violence**
- **Gender and Adolescence: Development and Empowerment**
- **Women’s Gendered Social and Economic Opportunity**

Domestic Research Projects

- We are working with partners across California, including the California Department of Public Health and VALOR [Coalition to End Sexual Violence] to conduct statewide research to generate population estimates of gender-based violence and discrimination and to provide qualitative insights into vulnerable populations such as immigrants and refugees as well as adolescents to understand experiences of violence in these groups. We also evaluate community and structural interventions designed to prevent gender-based violence.
- GEH researchers have supported infection disease prevention and management efforts in California and San Diego, including that related to COVID-19, in schools, and management of infections among socially vulnerable groups including racial/ethnic minority populations and LGBTQ+ communities, with a focus on reducing health disparities.

Regional Research Projects

- We conduct research on the U.S.–Mexico border that has included some of the first work documenting sex trafficking of underaged girls and HIV, cyber-sexual harassment of adolescent girls in the region and the role of deportation in girls’ vulnerabilities, and gender-based violence during migration and upon entry into the United States among undocumented women and asylum seekers.

International Research Projects

- Our team has large-scale gender equity and empowerments survey measurement development and training to support generation of next-generation scholars in this field and with a focus on building a cadre of LMIC scholars in Africa and South Asia.
- We have led, advised, and/or analyzed data from varied large-scale survey studies with innovative and adapted gender-equity and empowerment measures in the areas of gender norms and early adolescence, adolescent mental health and well-being, family planning and childbearing, maternal and child health, women’s economic empowerment, women’s political leadership, women’s peace and justice, early child development and education (including childcare quality), and gender and climate.
- We are developing and scaling up family planning and maternal and child health interventions, as well as HIV/STI prevention and gender-based violence prevention, using an agency and empowerment approach and implementation science methodologies that support decolonization of global health research and practice.
- We conduct research with men and boys on traditional gender role ideologies and engagement in health interventions for family planning and maternal and child health, as well as prevention of violence and discrimination.

Research to Policy

Our California and LMIC-based survey research described above has led to a number of important policy efforts:

- In the United States and elsewhere, our work on reproductive coercion has led to policy change in family planning counseling that includes assessment and consideration of male partner violence and control over women’s use of contraception and abortion.
- Globally, our work on gender roles and early adolescence has led to country-level changes in adolescent strategies to recognize early adolescence (ages 10–14) as a time of early development of harmful attitudes and behaviors, which can be rooted in traditional gender role norms.
- Our research on domestic violence against immigrant women in the United States has led to greater protections for immigrant women via the U-Visa, authorized in the federal Violence Against Women Act.
- Our research on child marriage in South Asia guided India’s Adolescent Strategy, and we are now using our research to support gendered perspectives in the updating of this policy with consideration of right to marital choice for women and girls.
- Our research on sexual violence and mobility in India has supported programs focused on sexual harassment of women in public spaces and on public transport in India, and we continue to engage with government on policies and reporting mechanisms in this area.

# broom center for demography

University of California, Santa Barbara

Susan Cassels, *Director* • Shelly Lundberg, *Associate Director*

## University of California, Santa Barbara

North Hall, Room 2127  
Santa Barbara, CA 93106-9210  
www.broomcenter.ucsb.edu  
scassels@geog.ucsb.edu

### Mission Statement

The Leonard and Gretchan Broom Center for Demography facilitates research and training in social demography and population studies, with particular emphasis on social and economic inequalities and health disparities. Key issues include inequalities across social groups defined by gender, sexuality, race, ethnicity, and immigration status; population–environment interactions; the determinants of population health; migration flows; spatial demography; and the allocation of resources within and across families, workplaces, schools, and other social institutions.

### Number of Faculty

Boulder, CO 80309-0483  
www.cupc.colorado.edu  
CUPC@colorado.edu  
(P): 303.735.2057

## Mission Statement

CUPC brings together an interdisciplinary community of scholars, across three University of Colorado campuses, dedicated to research and training in population science with broad foci on health, migration, and environmental demography. By providing administrative, technical and development support, CUPC nourishes collaboration and intellectual community across several groups, departments, institutes, and universities. CUPC is highly interdisciplinary and draws on scholars from sociology, geography, economics, anthropology, political science, and the health sciences. An important aspect of the Center is its first-class mentorship program and collaboration between faculty and graduate students. Center affiliates explore demographic processes and their impacts on health, the environment, and other societally relevant outcomes in the United States and a variety of international settings while applying their expertise to yield high quality, policy-relevant research and training. Current efforts also focus on complex data collection efforts, and advances in the computational social sciences.

# Center on Healthy Aging Behaviors and Longitudinal Investigations

David Meltzer, *Director*

## The University of Chicago

5841 S. Maryland Avenue, MC 1005  
Chicago, IL 60637  
[www.chess.uchicago.edu/active-research-grants/niap30chablis](http://www.chess.uchicago.edu/active-research-grants/niap30chablis)  
[kbogue@bsd.uchicago.edu](mailto:kbogue@bsd.uchicago.edu)  
(P): 773.702.4401

## Mission Statement

The goal of CHABLIS is to promote a sustained research and infrastructure development program and leverage longitudinal data, from both observational and interventional studies, to examine how demographic and economic factors facilitate or suppress individual healthy aging behaviors (HABs) and, in turn, influence outcomes among older adults over the life course. Through this infrastructure, we aim to enhance and lead innovation in the demography and economics of aging and cultivate the next generation of leaders in social science approaches to aging research with attention to demographic methods and approaches.

Number of Faculty

- **Individual Healthy Aging Behaviors**
- **Family, Networks, and the Life Course**
- **Aging in Community and Larger Social Contexts**
- **Health Outcomes at the Hospital, Neighborhood, and Municipal Levels**
- **Measurement and Methods for Longitudinal Studies on Aging**
- **Models of Care for Medically and Social Complex Older Adults**
- **Integration of Systemic and Oral Health**
- **Personalized Medicine and Preemptive Pharmacogenetic Testing (including in minority populations)**

## Domestic Research Projects

- National Social Life, Health, and Aging Project
- Vitamin D Supplementation in U.S. Communities
- Developing a Longitudinal Measurement Metric and Risk Prediction Model to Identify Medicare Patients at High Risk of Hospitalization With Persistent Cost-Related Medication Nonadherence and Improve Insurance Coverage
- Sensory Health Trajectories Among Older Adults in U.S. Health Care Spending, Mortality, and the Macroeconomic and Distributional Effects of Health Inequality at Older Ages
- The Rise and Consequences of Alternative Work Arrangements for the Aging Workforce
- The Significance of Race, Skin Color, and Discrimination for Health and Aging
- Universal Early Screening for Alzheimer's Disease and Related Dementia via Automated Deep-Pattern Discovery in Past Medical Encounters

## Regional Research Projects

- Comprehensive Care Physician Program and Comprehensive Care, Community, and Culture Program
- A Randomized Controlled Trial of the Effects of Oral Health on Systemic Health, Oral Health, and Health Care Costs Among Older Adults
- Moderate or High-Dose Vitamin D Supplementation
- Longitudinal Improvement in Loneliness in the High-Need Population Using Group Visits as Support Group Intervention
- Assessing Health and Burden Among Caregivers of Older Adults at High Risk for Hospitalization
- Sleep Disturbance and Depressive Symptoms in People Living With Mild Dementia: The Mechanistic Role of Cortisol
- Piloting the Mind Over Matter Program for Urinary and Bowel Incontinence in Chicago
- The Effect of the Doctor–Patient Relationship on Advance Care Planning and End-of-Life Care
- Circadian Biology of the Endocannabinoid System in Aging
- Comparison of Hospital-Associated Disability in Elderly Hospitalized Patients Before and During the COVID-19 Pandemic
- Using 24-hour Ambulatory Blood Pressure Monitoring to Examine Association Between Blood Pressure Phenotypes and Cognitive Impairment Among African Americans

## Regional Research Projects (cont'd)

- Impact of Pharmacogenetics in a High-Utilizer Program for Older Adults at Increased Risk of Hospitalization

## Research to Policy

- Tamara Konetzka leads research on the drivers of nursing home quality, how public reporting of quality changes the behavior of providers and consumers, and the unintended on consequences of home-based long-term care and post-acute care. She has testified before the U.S. Senate on COVID-19 and nursing homes.
- David Meltzer is PI of the Comprehensive Care Physician (CCP) Program, which reintegrates inpatient and outpatient care under one provider for patients at high risk of hospitalization. The Physician-Focused Payment Model Technical Advisory Committee in the Office of the Assistant Secretary for Planning and Evaluation voted to recommend a payment model developed to encourage the uptake of CCP models across the country.

Lawrence, KS 66045-3129  
ipsr.ku.edu/contact.shtml  
kpc@ku.edu  
(P): 785.864.3701

Mission Statement

The Kansas Population Center is a new center focused on integrating research in rural demography, big data, and population health for those living in the middle of the country. Our focus is using big data to understand how systems and organizations either help or hinder the health and wellbeing of rural (and rural adjacent) communities. We welcome members from other universities in Kansas, the Midwest, and elsewhere who have similar research interests. We plan on starting a virtual seminar series in the Fall 2023 for individuals interested in related topics, and welcome suggestions for seminar speakers.

- Barriers and Facilitators to COVID-19 Testing Among Women Who Use Drugs
- Better Together
- Equitable and Integrated Well-Child Care
- Cardiovascular Disease in Pregnancy and Postpartum in Maryland
- Comparison of Firearm-Related Intimate Partner Homicide in Texas and Maryland: Prevalence, Identification of Those at Risk, and the Effect of Firearm Regulations
- Examining the Effects of Gender Norms on HIV/STI Risks Among Adolescents in Baltimore
- Housing Mobility, Environmental Exposures, and Asthma Morbidity Among Low-Income Minority Children

Regional Research Projects (cont'd)

- Integrated Health Interventions for Students
- Social, Ethical, and Behavioral Factors in the Return to School Among Underserved Communities in Maryland

International Research Projects

- Infertility Fears, Stigma, and Consequences in Low-Resource Countries
- Early Prenatal Intervention for Prevention of Mental Disorders in Pakistan
- Innovative Analytics to Estimate Child Mortality for Low- and Middle-Income Countries
- Global Early Adolescent Study
- Indian Human Development Survey
- Improved Adolescent Mental Health via an Economic and Gender Equality Intervention
- Preventing Intimate Partner Violence in Kenya
- Surviving an Epidemic: Families and Well-being, Malawi

Research to Policy

- National Academy of Sciences report “A Roadmap for Reducing Child Poverty,” of which Robert Moffitt was a central contributor, was a key influence on the inclusion and expansion of the Child Tax Credit in the 2021 American Rescue Plan Act.
- The Administration for Children and Families and Department of Education June 14, 2022 “Federal Letter” cites Christina Bethell’s Child and Adolescent Health Measurement Initiative and Well Visit Planner to support the importance of getting all children in for well-child visits and engaging cross-state partners in doing so.
- Sarah Szanton’s CAPABLE project was a model for the HUD Older Adult Home Modification Program which assists nonprofit organizations, state and local governments, and public housing authorities to support home modifications and repairs for low-income elderly homeowners, allowing them to “age in place,” rather than move to nursing homes or other assisted care facilities.
- Nick Papageorge’s work showing the importance of students having same-race teachers was cited in the development of the Augustus Hawkins Educational Centers of excellence by the U.S. Department of Education.
- Oregon recently passed ballot measure 114 requiring handgun purchasers to get a license and a ban on large capacity magazines. The ballot measure and advocacy were informed by research led by Elizabeth Stuart and collaborators on the impact of licensing and background checks for gun violence.
- Stefanie Deluca’s research examining why landlords have been reluctant to participate in the HUD housing choice voucher program contributed to the design of the bipartisan Choice in Affordable Housing Act of 2021 (s.1820), which included provisions to increase the number of landlords who accept vouchers from potential renters.
- Emily Agree is a member of the National Academy of Sciences Committee on Population where she is leading a workshop n programs to support aging in place with dementia.

# Harvard Center for Population and Development Studies

Lisa Berkman, *Director* • Jason Beckfield, *Associate Director*

**Harvard University**  
9 Bow Street  
Cambridge, MA 02138  
[www.hsph.harvard.edu/cpds](http://www.hsph.harvard.edu/cpds)  
[popcenter@hsph.harvard.edu](mailto:popcenter@hsph.harvard.edu)  
(P): 617.495.2021

## Mission Statement

Our mission is to improve well-being around the world by better understanding the interaction of demographic changes with social, political, and economic development. In service of this mission, we produce population-based evidence to improve policy and public discourse to create healthy and resilient societies.

Number of Faculty  
**Affiliates: 73**

## Departmental Affiliations

- Center for Geographical Analysis
- Department of Economics
- Department of Psychology
- Department of Sociology
- Faculty of Arts and Sciences
- FXB Center for Health & Human Rights
- Graduate School of Design
- Graduate School of Education
- Institute for Quantitative Social Science
- Kennedy School of Government
- Medical School
- T.H. Chan School of Public Health

## Key Areas of Research

- **Aging Societies**
- **Social Demography**
- **Work and Well-being**
- **Population Dynamics of Climate Change**

## Domestic Research Projects

- The Fulfillment Center Intervention Study: Focusing on Workers in Fulfillment Centers (who are disproportionately Black and Latinx) in the E-Commerce Segment of the Warehousing and Storage Industry Who Are Often Subject to Systemic Health Inequities
- Is Working Longer in the U.S. in Jeopardy? Development of the Book, *Overtime: America's Aging Workforce and the Future of Working Longer* (Oxford University Press, September 2022)
- Work and Well-being Initiative: A Multi-Disciplinary Research and Policy Initiative Designed to Develop and Implement Evidence-Based Workplace Change for Worker Well-being
- Policing and the Educational Performance of Minority Youth: Examining the Consequences of Neighborhood and School-Level Exposure to Broken-Window Policing Strategies and Tactics for the Educational Outcomes of Minority Youth

## International Research Projects

- Health and Aging in Africa: A Longitudinal Study of an INDEPTH Community in South Africa (HAALSI)
- Cognitive Function, Alzheimer's Disease and Related Disorders in the HAALSI Cohort
- Cumulative Socioeconomic Exposures, Cash Transfer Interventions, and Later-Life Cognitive Decline and Dementia Risk in a Low-Income Region of South Africa
- India Policy Insights: Improving the Lives and Health of India's People by Analyzing Data at Micro and Macro Policy Units, Visualizing the Data on a Public, Online Platform, and Better Implementing Precision Public Policy and Governance in India

## Research to Policy

- Faculty affiliate S. V. Subramanian has led the launch of a first-ever interactive policy dashboard for India's 543 Parliamentary Constituencies (PCs). This publicly available tool provides health, nutrition, and development data that specifically aligns with the political units represented by India's democratically elected Members of Parliament (MPs), public officeholders responsible for overseeing effective policy implementation for their constituents. By capturing and depicting these critical PC indicators at a more granular level, the aim is to greatly enhance the quality of political dialogue that MPs can have with their constituents around the issues that are most pressing in their communities.
- Faculty affiliate Laura Kubzansky served as a subject matter expert to the U. S. Surgeon General's Office in the development of a "Framework for Workplace Mental Health and Well-Being," an initiative identified as a Current Priority of the U.S. Surgeon General. The Framework promotes "Five Essentials" to guide employers on how to better support employee well-being and mental health and has been made available to the public via a website. Kubzansky, a core member of the Work and Well-Being Initiative (WWBI), a joint initiative at HCPDS and MIT, represented WWBI by sharing insights regarding evidence-based strategies on how to create work environments that can foster worker health and well-being. In addition, WWBI's freely available Employer Toolkit—a practical set of tools that employers can use to improve worker health, and boost employee engagement, retention, and productivity—is cited multiple times as a resource on the Surgeon General's Framework website.

## Research to Policy (cont'd)

- Director Lisa Berkman and Visiting Scientist Beth Truesdale edited a volume published by Oxford University Press in which nearly 30 thirty experts across the fields of economics, sociology, psychology, political science, and epidemiology tackle the expectations and myths that Americans can (and should) just delay retirement and work longer in preparation for a lengthier lifespan. *Overtime: America's Aging Workforce and the Future of Working Longer* explores the impact of increasing economic and social inequalities, precarious working conditions, family caregiving responsibilities, poor health, and age discrimination, and exposes the shortcomings of policies that narrowly focus on one-size-fits-all solutions. Since its launch in September, the book's findings have been featured at events sponsored by AARP, the National Academy of Medicine, and the Brookings Institution, and covered in such media outlets as NPR, CNN, Forbes, The Washington Post, The Nation, and The Hill.

(P): 617.868.3900

## Mission Statement

The mission of the NBER Center is to develop, coordinate and advance research by economists on health and aging issues. Center research considers the health and wellbeing of people as they age, how health and wellbeing are affected by the changing environment in which people live, and what interventions might be effective in improving health and wellbeing

Number of Faculty  
**Affiliates: 100+**

## Departmental Affiliations

- The NBER is a consortium of economists from research universities around the country. The Center's researchers are drawn largely from the NBER's aging and health care program areas.

## Key Areas of Research

## Key Areas of Research

- **Research Data Ecosystem**
- **Best Practices for Preservation and Dissemination of Research Data**
- **Techniques for the Effective Protection of Confidentiality**
- **Tiered Access Modalities for Restricted Data, Including Physical and Virtual Enclaves, Online Application and Analysis, and Training for Restricted Access Data**
- **Dissemination of Multiple Types of Data, Including EEG, GIS, Qualitative, and Video**
- **Life Course Research on Substance Use, Crime, and Violence**
- **Data Recovery and Harmonization**
- **Record Linkage**
- **Aging and Biodemography**
- **Historical Demography**

ICPSR partners with federal agencies and foundations to preserve and disseminate research data. These thematic collections (<https://myumi.ch/rqy2A>) support cutting-edge social and behavioral science and build data literacy. By preserving high-value data, these collections increase the return on investments in scientific data collection and increase the transparency and reproducibility of social science. ICPSR provides training in research methodology and best practices in data stewardship through its Summer Program in Quantitative Methods of Social Research (<https://myumi.ch/5W9V8>), regular webinars, its YouTube channel (<https://myumi.ch/bRmW2>), and other outreach. ICPSR creates novel data resources and undertakes research that improves the management and quality of data. ICPSR is the host for the Single Application Portal for restricted data for the federal statistical system mandated by the Evidence Act (<https://myumi.ch/J8nR2>).

### ICPSR's Thematic Collections

- Archive of Data on Disability to Enable Policy and Research (<https://myumi.ch/gNpER>)

- Assessing the Efficacy of Cannabis Compositions in Providing Chronic Pain Relief and Improving Overall Quality of Life
- A Community-Based Participatory Trial to Increase Stroke Treatment
- Children and the U.S. Justice System
- Criminal Justice Administrative Records System
- Economic Distress and Growing Educational Disparities in Life Expectancy: Weathering, High Effort Coping, and Despair
- Effects of Financial Sanctions in the Criminal Justice System
- The Effect of Letters of Recommendation in the Youth Labor Market (New York City)
- Effects of Unintended Pregnancy on Children
- The Impact of Texas's Additional Days in a School Year Initiative on Student Learning Loss
- Local Jail Reporting Program Pilot Test
- Health and Retirement Study
- Long-Term Mobility and Well-being of New Orleans Residents after Hurricane Katrina
- Ideological Roadblocks to Diversity in STEM
- Impact of Relationship Factors on Physical and Psychological Health and Well-being
- Monitoring the Future

### Regional Research Projects

- Enhancing Energy Assistance in Michigan
- Social Determinants of COVID-19 in Ford Employees in Southeastern Michigan: A Longitudinal Study
- Curation, Linkage, and Dissemination of the Flint Registry
- The Effects of Unintended Pregnancy on Children
- Detroit Metropolitan Area Communities Study
- Incorporating Marginalized Voices to Reimagine U.S. Surveillance Infrastructure for Public Safety: A Detroit Case Study
- Universal Strengths–Based Parenting Support in Pediatric Health Care for Families With Very Young Children Following the Flint Water Crisis

### International Research Projects

- Understanding the Connections Among Genes, Environment, Family Processes, and Mental Health (Nepal)
- Intergenerational Influences on Marriage, Contraception, and Childbearing (Nepal)
- Expansion of Noncommunicable Disease Research Capacity in Thailand With Outreach to Indonesia

### International Research Projects (cont'd)

- Energy Transition and Environmental Change in East and Southern Africa's Coupled Human, Terrestrial, and Atmospheric Systems (Malawi)
- Migration, Family Context, and Child Health (Nepal)
- Family Migration Context and Early Life Outcomes (Nepal)
- Improving Learning: Developing Measures of Accountability and Evaluating Their Association With Students' Gains in Achievement in Nepal
- Poverty and Resilience in the Aftermath of Disaster (Mozambique)
- HIV Prevention and Care for Couples in South Africa

### Research to Policy

- Jeffrey Morenoff's investigation into the 2020 census population count in Detroit yielded striking findings: undercounts of people and housing in Detroit—with half a trillion dollars of federal funding for Detroit and Michigan at stake. He provided [testimony](#) before the U.S. Senate including ideas for improving census accuracy moving forward.
- The expanded Child Tax Credit was back before Congress amid research from PSC researchers Natasha Pilkauskas, Katherine Micheltore, and H. Luke Shaefer, with Nicole Kovski, presenting evidence on the benefits of the 2021 credit.
- The Detroit Metro Areas Community Study (DMACS), co-led by past PSC director Jeffrey Morenoff, is a reliable source for timely and relevant public opinion data in a changing Detroit.
- The "loneliness epidemic" is more than a health issue; PSC Trainee Sofia Hiltner's research will help enable policy responses to social isolation.
- Transportation security is essential to economic mobility. PSC faculty associate Alexandra Murphy created a new transportation insecurity index, a project that grew from PSC seed funding, and has found that 1 in 4 adults in the United States experience transportation insecurity.
- The Criminal Justice Administrative Records System (CJARS) program, created by PSC faculty associate Michael Mueller-Smith, aims to transform criminal justice research nationwide. CJARS provides tools to support the process of collecting, harmonizing, and linking data made available by the disparately organized jail system in the United States, creating knowledge that could be used to inform policy discussions about justice system reform.
- PSC Brown Bag Series: Relevant presentations from the past year—"Sex-Selective Abortion Bans: Structural Stigma, Xenophobia and the Birth Outcomes of Asian Immigrants," "Do Federal Place-Based Policies Improve Economic Opportunity in Rural Communities?" and "Self-reported Visual Difficulty and Daily Activity Limitations: The Moderating Role of Neighborhood Characteristics"

### Mission Statement

The Life Course Center (LCC) at the University of Minnesota is an incubator for innovative research on the demography and economics of aging. As an NIA-supported University-wide cooperative, LCC recruits and fosters connections among researchers across disciplines; develops leading-edge collaborative pilot studies on aging contexts, trends, dynamics, and disparities; provides technical and administrative support for research development; and supports a research network to leverage large-scale population data to advance interdisciplinary scholarship on social determinants and contexts of aging and health.

Number of Faculty  
**Affiliates: 147**

### Departmental Affiliations

- Epidemiology and Community Health
- Family Social Science
- Health Policy and Management
- History
- Humphrey School of Public Affairs
- Institute of Child Development
- Law School

- IPUMS International Historical Geographic Information System

## Research to Policy

- In March 2022, LCC Member Dr. Carrie Henning-Smith was invited to provide testimony to the U.S. Senate Committee on Agriculture, Nutrition, and Forestry on rural health care and quality of life. She provided written and oral testimony and answered questions from several U.S. Senators.
- In July 2022, Dr. Henning-Smith was invited to participate in a roundtable discussion with members of the U.S. House Select Committee on Economic Disparity and Fairness in Growth, where she spoke on the connection between rural health equity and economic well-being.
- Dr. Henning-Smith has also been asked to consult on a variety of COVID-19 relief efforts, including addressing rural inequities and vaccine distribution efforts. These have included consultations with and presentations for the CDC, briefing the White House COVID Equity Task Force, consultations with the HHS Region 5 director, and consultations with the Minnesota Department of Health. Dr. Henning-Smith was also an invited speaker at an AARP policy round table on supporting caregivers during COVID-19 in 2021.

Research to Policy

- COVID-19: Vaccines and Equity: MPC Member Elizabeth Wrigley-Field met regularly with the Minnesota Department of Health COVID-19 data and COVID-19 equity teams using research to help assess the strength and weaknesses of different geographic measures used in the state’s equity metrics. Wrigley-Field also collaborated with tribal leaders and researchers, the Coalition of Asian-American Leaders, and the Director of the Minneapolis Office of Immigrant and Refugee Affairs. The vaccine equity research influenced the vaccine work of Minnesota health systems, working directly with the state, health systems, and community vaccination groups.
- Rural Maternal and Infant Health: In March of 2022, the federal Rural Maternal and Obstetric Modernization of Services (MOMS) Act was signed into law. MPC Member Dr. Katy Kozhimannil led the research that underpins this legislation and worked closely with multiple U.S. Senators and the Senate Rural Health Caucus on the content of the bill since its initial introduction in 2016. The Rural MOMS Act takes important steps toward understanding the root causes of maternal mortality and developing solutions to improve maternal care in rural areas and communities of color. This bipartisan legislation was co-sponsored by Sen. Tina Smith (D-MN) and Sen. Lisa Murkowski (R-AK).

Mission Statement

The Office of Population Research (OPR) at Princeton University has fostered cutting-edge research and training in population science since it was founded in 1936. It is one of the world’s oldest existing population research centers. Our mission is to provide the resources and environment that will facilitate the creation and dissemination of fundamental demographic knowledge about U.S. and global population characteristics, dynamics and policies, as well as the highest quality learning opportunities for doctoral and postdoctoral trainees.

- Estimating Environmental Mobility in Urban Areas of Latin America and the Caribbean: Implications and Directions for Policy

## Research to Policy

- Dr. Christopher Wimer and colleagues at the Center on Poverty and Social Policy (CPSP) found that the monthly Child Tax Credit (CTC) in effect from July to December 2021 moved 3 million children out of poverty and reduced food insecurity.
- Dr. Liz Ananat and colleagues at CPSP showed that the expansion of the CTC did not reduce parental employment, addressing a key concern about the policy.
- Dr. Kimberly Noble's research on the effects of poverty on child development was a touchstone of the policy debate in support of the CTC, repeatedly cited in the New York Times, as was Dr. Jane Waldfogel's research on the CTC.

## Mission Statement

CPC coordinates and promotes national and international population research, encourages cross-disciplinary innovation, supports grant-getting, provides cutting-edge demographic training to students and postdocs, and disseminates research findings to policy practitioners and the public.

## Grant Development Program

CPC's Grant Development Program supports grant submissions to population-related external funding agencies through mentorship, training, seed funding, and administration.

## Seminar Series and Events

CPC hosts a seminar series that expands networks of population scientists and brings innovations in population research to campus. Other regular events include methods mini-courses, conferences, and an annual workshop for population scholars from Upstate New York.

## Undergraduate and Graduate Demography Minors

CPC's multidisciplinary training program provides students with opportunities to develop fundamental demographic tools and insights from a range of perspectives. In addition to coursework, the training core offers professional development, research support, and guided mentorship.

# Guttmacher Center for Population Research Innovation and Dissemination

Kathryn Kost, *Director* • Ann Moore, *Associate Director*

## Guttmacher Institute

125 Maiden Lane, 7th Floor  
New York, NY 10038  
[www.guttmacher.org](http://www.guttmacher.org)  
[popcenter@guttmacher.org](mailto:popcenter@guttmacher.org)  
(P): 212.248.1111

## Mission Statement

The Guttmacher Institute is a leading research and policy organization committed to advancing sexual and reproductive health and rights (SRHR) in the United States and globally in ways that help create more just and equitable societies. We do this through positioning SRHR as essential to the achievement of health and development goals; examining the social determinants of health that underlie SRHR inequities to continue to make disparities seen; and elevating the centrality of legitimate science and evidence in the public discourse.

The Guttmacher Center for Population Research Innovation and Dissemination enhances the quality of research carried out at the Institute by providing opportunities for interdisciplinary idea generation, supporting innovation in research approaches, building the skills of a new generation of scientists, and encouraging collaboration and partnerships with external colleagues. It also ensures that the Institute's work and data are made available to a wide range of audiences.

## Key Areas of Research

- **Measurement of Abortion Incidence in the United States and Worldwide**
- **Large Scale Data Collection and Surveillance of Key Reproductive Health Indicators**
- **Studies Designed to Measure Policy Impacts on Reproductive Health Outcomes**
- **Measurement of Fertility-Related Behavior, Preferences, and Pregnancy Outcomes**
- **Sexual Behavior, Contraceptive Use, and Access to Reproductive Health Services**
- **Adolescent Sexual and Reproductive Health**
- **Monitoring the Incidence of Pregnancy at the National and State Levels**
- **Developing Model-Based Estimates of Contraceptive Failure**
- **Monitoring Trends in the Use of Contraception, Nationally and at the State Level**

## Domestic Research Projects

- Tracking the Provision of Sexual and Reproductive Services in Publicly Funded Family Planning Clinics
- Documenting the Impact of Changes in Federal and State Policies and Laws on Provision of Reproductive Health Services and Access to Care
- Developing New Methods for Measuring Abortion Incidence
- National and State-Level Pregnancy Statistics, Including Pregnancy Desires
- Abortion Incidence and Services in States and Metropolitan Areas
- State and County-Level Tracking of Contraceptive Needs and Services

## Regional Research Projects

- Investigating the Impact of Federal and State Policy Changes on the Provision of Family Planning Services and on Individuals' Access to Contraception
- Documenting Current Contraceptive Use Patterns Across States
- Producing Estimates of the Potential and Realized Impacts of States' Restrictive Abortion Policies on Access to Abortion Care
- Advancing Methods and Documenting Abortion Incidence Worldwide, Including in Humanitarian Settings
- Producing Model-Based Estimates of Incidence and Trends in Unintended Pregnancy and Abortion Worldwide
- Supporting Capacity Building With Partners in Africa to Conduct and Disseminate Abortion Incidence Studies
- Measuring Perceptions of Abortion Legality in Colombia
- Documenting the Experiences of Access to and Use of Abortion Medications via Informal Vendors in Colombia

## International Research Projects

- Measuring Knowledge of and Access to Menstrual Regulation, Abortion, and Post-Abortion Care Among the Rohingya Residing in Bangladesh
- Using the Platform of the Guttmacher–Lancet Commission to Help Develop a Broader and Evidence-Based Vision for SRHR Worldwide Over the Next 15 Years
- Estimating the Need for and Coverage, Costs, and Impact of Providing Comprehensive Contraception, Pregnancy-Related, and Newborn Health Care in Low- and Middle-Income Countries
- Understanding Marginalized Adolescents' Access to and Use of Sexual and Reproductive Health Care in Selected Districts in Uganda and Mozambique
- Monitoring Abortion Law Reform in Argentina

## Research to Policy

- Monitored and Disseminated Tracking of U.S. Reproductive Health Policy and Legal Developments Nationally and in Each State
- Disseminated Data and Research Findings Through Media and Other Channels to Inform Public Policy Debates on Sexual and Reproductive Health Issues
- Used Data and Analysis by Guttmacher Researchers to Assess the Impact of the Supreme Court's Decision in *Dobbs v. Jackson Women's Health Organization* on Sexual and Reproductive Health and Rights
- Supported Evidence-Based Policy Analysis Through Continual Updating of the Institute's Data Center and Rapid Dissemination of New Findings

## Population Council

1 Dag Hammarskjold Plaza, Floor 3  
New York, NY 10017  
www.popcouncil.org  
jdewaard@popcouncil.org

## Mission Statement

We generate ideas, produce evidence, and design solutions to improve the lives of underserved populations around the world.

We take a multidisciplinary, intergenerational, life-cycle approach that contributes to four global goals, including the connections between them:

1. Ensure sexual and reproductive health, rights, and choices
2. Empower adolescents and young people to reach their full potential
3. Achieve gender equality and equity
4. Pursue justice in the face of climate and environmental changes

Number of Faculty  
**Affiliates: 80**

# Population Council

Jack DeWaard, *Scientific Director* • Thoai Ngo, *Vice President*

## Key Areas of Research

- **Sexual and Reproductive Health, Rights, and Choices**
- **Empowering Adolescents and Young People to Reach Their Full Potential**
- **Gender Equality and Equity**
- **Justice in the Face of Climate and Environmental Changes**

## Domestic Research Projects

- We have three offices with multiple ongoing projects in the United States: Washington, DC; New York, NY (including our Center for Biomedical Research)

## Regional Research Projects

- Breakthrough Research: Catalyzing Social and Behavior Change by Conducting Research and Evaluation and Promoting Evidence-Based Solutions to Improve Health and Development Programs Around the World
- Baobab Research Program Consortium: Filling Gaps in Evidence to Enhance Sexual and Reproductive Health Programming Among Vulnerable Populations in Refugee Settings in the East and Horn of Africa
- Abriendo Futuros: Promoting Autonomy and Empowerment Among Maya Girls and Adolescents in Mexico, Through Nurturing Learning in Intercultural Safe Spaces Facilitated by Female Maya Youth Mentors, Fostering Intergenerational Dialogue, and Sharing Both Knowledge and Resources Among the Community
- Ending FGM: Supporting Africa-Led Movements to End FGM/C by Providing Data and Improving Measurement
- Evidence for Gender and Education Resource: Powering the Girls' Education Sector With Data and Evidence

## International Research Projects

- We have international offices or affiliate organizations with multiple ongoing projects in 13 countries (including the United States): Bangladesh, Egypt, Ethiopia, Ghana, Guatemala, India, Kenya, Mexico, Nigeria, Pakistan, Senegal, Zambia

## Research to Policy

- The Evidence for Gender and Education Resource (EGER) published the Girls' Education Roadmap for governments, NGOs, researchers, and donors, providing a framework for how to prioritize and align investments with the most urgent needs. In the past year, EGER also published results of a multi-country study on the gendered effects of COVID-19 school closures as well as findings showing that significant gaps remain in our understanding of which interventions improve girls' education and skills.
- We supported an Africa-led movement to end female genital mutilation, publishing evidence on what works, developing a research agenda, and convening the FGM Data Hub to enable accountability and evidence use. We evaluated and developed programs to prevent child marriage and conceptualized a simplified framework for evidence-based interventions and investments. We also published insights on what interventions, especially group-based interventions, show promise in economically empowering adolescent girls and young women in low- and middle-income countries.

## Research to Policy (cont'd)

- We helped to integrate family planning into worker health and livelihood programs in Egypt; documented the perspectives of policymakers in Ghana to improve HIV self-testing and national HIV programs; and scaled our Research and Analyses for Scientific Transformation and Advancement (RASTA) consortium in India to strengthen programs and policies on family planning and reproductive health.
- To ensure data are used for evidence-based decisions and investments, the Population Council's GIRL Center launched the Adolescent Atlas for Action (A3), a suite of tools that gives governments, donors, and advocates the information they need to build effective and sustainable programs and policies.
- On the biomedical front, scientists at our Center for Biomedical Research have been developing contraceptives and multipurpose prevention technologies that meet people's diverse needs and lifestyles. Highlights in the past year include an NIH grant to develop the first nonhormonal vaginal ring to prevent pregnancy and HIV, Phase 2 clinical trial for Nestorone®/Testosterone male contraceptive gel, and a partnership with a nonprofit pharmaceutical firm on a dual prevention pill to prevent both pregnancy and HIV in a single tablet.

Syracuse, NY 13244  
<https://asi.syr.edu/caps>  
CAPS@syr.edu  
(P): 315.443.2703

#### Mission Statement

The Center for Aging and Policy Studies is a collaboration between Syracuse University, Cornell University, and University at Albany. It aims to improve the health, well-being, and independence of older adults by conducting innovative and rigorous research, providing state-of-the-art training to scientists, and disseminating research findings to scientists, decision makers, and the public.

Number of Faculty  
**Affiliates: 45**

#### Departmental Affiliations

- Anthropology
- Biology
- Communication Sciences and Disorders
- Economics
- Epidemiology and Biostatistics
- Exercise Science
- Health Policy, Management, and Behavior
- Human Development and Family Science
- Policy Analysis and Management
- Psychology
- Public Administration and International Affairs
- Public Health, Food Studies, and Nutrition
- School of Social Work
- Sociology

#### Key Areas of Research

- **Population Health and Well-being**
- **Family and Intergenerational Supports**
- **Cross-Cutting: Policy, Place, and Specific Populations**

#### Domestic Research Projects

##### Population Health and Well-being

- Trends and Disparities in Health
- Mortality Among Adults With Developmental Disability
- Personality Traits and Age Trajectories of Health
- Impact of COVID-19 Policies on Psychological Health, Drug Overdose, and Suicide
- Health, Longevity, and Cognition Among Subgroups of Older Latino Adults
- Health and Economic Well-being of Older LGBT Adults
- Long-Term Health Effects of Military Service
- U.S. State Policy Polarization and Life Expectancy
- Race-Ethnic Disparities in Cognitive Function
- Rural-Urban Disparities in Health Care Access and Outcomes
- Vascular Aging in African American Adults
- Geographic Disparities in Substance Misuse and Mortality
- Hearing Loss, Technology, and Cognitive Function
- Life Course Influences on Cardiovascular and Metabolic Health
- Pay-for-Performance and Long-Term Care
- Food Insecurity, Food Policies, and Disability

##### Family and Intergenerational Supports

- Grandparenting, Grandparent Care Work, and Family Well-being
- Children's Help to Aging Parents During COVID-19
- Cognitive Function and Housing Transitions
- Older Adults' Activity Spaces, Social Networks, and Health
- Union Formation Among Elderly Couples
- Reciprocity in Parent–Child Relations Over the Adult Life Course
- Parental Health Decline and Adult Children Migration
- Social Disconnectedness and Isolation Among Older Adults
- Kin Support and Mortality Among Older Adults
- Technology and Intergenerational Communications
- Intergenerational Time and Money Transfers
- Social Security, Pensions, and Retirement Well-being
- Paid Family Leave and Nursing Home Use
- Medicaid Expansion and Older Mothers' Birth Outcomes

#### Regional Research Projects

- Cognitive Screening Tools for the Onondaga County Office for Aging
- Geographic Variation in Veteran Mortality
- U.S. State Policy Influences on Coding of Causes of Death
- Aging and Well-being in Rural America
- Geographic Variation in Drug, Alcohol, and Suicide Mortality
- Racial Segregation and Health in Philadelphia

#### International Research Projects

- Cross-National Differences in Provision of Care and Support to Older Parents
- Cross-National Differences in Experiences of LGBT Breast Cancer Survivors
- Family Relationships and Living Arrangements of Older Adults in China
- Stress and Health Problems Among Older Workers in the Netherlands
- U.S.–Finland Comparison of Women's Mortality

#### Research to Policy

- Jun Li gave an invited talk, “Disparities in Home Health Visits,” to the Quality Measures Technical Forum of the Centers for Medicare & Medicaid Services.
- Seth Sanders and Shannon Monnat met with federal statistical agencies, as part of the PAA Committee on Population Statistics, to discuss and provide input into federal data activities.
- Marc A. Garcia was an invited speaker at the National Hispanic Council on Aging 2022 virtual Capitol Hill briefing, “The End of a Pandemic? Implications for the Health and Well-being of Older Latinx Adults.”
- Shannon Monnat gave a congressional briefing on “Small Towns/Big Trends: Demographic Insights on Living, Working, and Thriving in Rural America.”
- Douglas Wolf, Shannon Monnat, and Jennifer Karas Montez published studies showing that certain types of U.S. state preemption laws increase people's risk of dying.
- The Hill (October 26, 2022) covered research by Jennifer Karas Montez, Shannon Monnat, and coauthors estimating the number of lives that could be saved by changing U.S. state policies.

contactdupri@duke.edu  
(P): 919.681.4993

## Mission Statement

The Duke University Population Research Institute (DUPRI) is an interdisciplinary research organization bringing together researchers from biological, statistical, behavioral, social and policy sciences at Duke. The Institute seeks to advance knowledge in demography and population science, to expand the current boundaries of demographic investigation through highly innovative interdisciplinary research, and to foster the development of the next generation of researchers.

Number of Faculty  
**Affiliates: 78**

- The Environmental Risk Longitudinal Twin Study in England and Wales

## International Research Projects

- Improving Response to Malaria Outbreaks in Amazon-Basin Countries
- Parenting Across Culture Study
- Population–Environment Dynamics in the Northern Peruvian Amazon

## International Research Projects (cont'd)

- Predictive Intelligence for Pandemic Prevention
- Social Networks and Child Malnutrition in Uttar Pradesh
- The SurVEy of HeALTH Trends (SEHAT) Study of Health Outcomes in the Aftermath of the COVID Pandemic in India

## Research to Policy

- Who are vaccine-hesitant or vaccine-resistant people? According to a five-decade longitudinal study of the developmental origins of vaccine intentions and attitudes, these intentions emerge from adverse childhood experiences that leave a legacy of mistrust and begin before secondary-school age. Education to prepare pupils to make decisions as adults about infection-reducing behaviors, including vaccinations, should be part of the national preparation strategy for future pandemics. (Terrie Moffitt)
- Chinese immigrants' stress responses to rising reports and personal experiences of anti-Asian discrimination during the COVID-19 pandemic in the United States add to the mental health burden of their acculturation process and other stressors related to pandemic worries, highlighting the heterogeneous mental health needs of the second largest immigrant group in the United States and the need for culturally sensitive public health interventions. (Giovanna Merli)

## Mission Statement

At the Carolina Population Center (CPC) we believe that understanding how and why populations change over time is key to advancing the well-being of all people. Our faculty, staff, and students conduct research on population, health, aging, and the environment, and share data and findings that push the field forward and train the next generation of population scholars.

- **Child, Adolescent, and Young Adult Development**

### Domestic Research Projects

- Contextual Determinants of Sexual Minority Health in the United States
- Unequal Parenthoods: Population Perspectives on Gender, Race, and Sexual Minority Disparities in Family Stress and Health During Crises
- The Coronavirus Pandemic: Predictors and Consequences of Compliance With Social Distancing Recommendations
- Fertility and the Pandemic: Changing Fertility Plans in an Era of Uncertainty and Stress
- Tracing the Health Consequences of Family Support During the COVID-19 Pandemic
- Consistency of Retrospectively Reported Fertility Data Across Time
- Health and Well-being Effects on Later-Life Divorce and Subsequent Repartnering
- Life Course, Relationship, and Situational Contexts of Teen Dating Violence
- Measuring Marriage and Divorce at the County Level
- Senior Hunger and Food Insecurity Infrastructure
- Mechanisms Underlying Desistance From Crime
- Social Influences on the Long-Term Cessation of Violence
- Mechanisms Underlying Sexual Minority Health Disparities
- Police Crime Database
- Gender, Race, and Sexual Minority Disparities in Family Stress and Health During Crises
- Older Adult Dementia Risk and Offspring Education
- Children's Help to Aging Parents in the Face of Health and Economic Challenges

### Regional Research Projects

- Minority Health in Ohio
- Social Determinants of Health in Ohio

### Research to Policy

- Wendy D. Manning and Krista K. Westrick-Payne collaborated on report (released October 2022) with the Human Rights Campaign to estimate projections of the share of the voting age population that identifies as LGBTQ. The team projects that by 2030, 1 in 7 voters will identify as LGBTQ. By 2040, 1 in 5 voters are projected to hold this identity.
- Kelly Balistreri serves on the executive committee for the Ohio Medicaid Assessment Survey (OMAS), a project that informs the Ohio Department of Medicaid and other health-associated state and local agencies in the development of strategies for improving health services to Ohio's population.

- Development-Induced Displacement and Women and Children's Well-being
- Family Migration Context, Socialization, and Children's Socioemotional Development in Nepal
- The Resilience of Food Security to Climate Shocks

### Research to Policy

- Jennifer Van Hook works with the Migration Policy Institute to produce estimates and demographic profiles of the unauthorized foreign-born population.
- Research conducted by Alexis Santos Lozano and colleagues and presented at the National Academy of Sciences highlighted how the implementation of differential privacy will affect our understanding of population composition.
- Erica Frankenberg discussed her research on magnet schools with Senator Murphy's office and advised the U.S. Department of Education on funding cycle guidelines for the magnet school assistance program.
- Erica Frankenberg and Christopher Fowler advised U.S. Department of Education officials on how data collection could be improved to better understand the effects of school boundary changes.
- Shedra Amy Snipes served on the National Advisory Council for Migrant Health. During the height of the COVID-19 pandemic, this group made recommendations that led the Health Resources and Services Administration to collaborate with CMS to legitimize tele-health as a reimbursable service and collect data on COVID prevalence, testing, and care among migrant farmworkers.

## Mission Statement

The PSC’s mission is to remain a national and world leader in research and training. Our goal is to link core research in the social and behavioral sciences to issues on the growth and structure of human populations and the role of socioeconomic stratification and human/social diversity in population health. The PSC is characterized by continuity, innovative and high-quality population-related research, and maintains a flexible research infrastructure that enhances interaction, builds collaborations, and encourages understanding of evolving issues. The training program is a leader in the preparation and mentoring of Ph.D. students and post-doctoral fellows and reflects a vision of the population sciences and health in which a strong background logic of demographic process is the gateway to an array of topics of public/scientific interest.

## Mission Statement

The Population Studies and Training Center promotes and supports innovative research on the causes and consequences of population size, composition, distribution, and well-being in the U.S. and globally. The Center carries out this mission by providing state-of-the-art facilities and research support to associates; maintaining a forum for intra- and interdisciplinary exchange on population science; supporting a high-quality graduate and postdoctoral training program; mentoring a diverse and inclusive community of population scholars at Brown; engineering and seeding promising new areas of population research; and developing cross-unit collaborations on campus and with partners in Rhode Island (RI) and around the world.

Austin, TX 78712  
www.liberalarts.utexas.edu/caps  
caps@utexas.edu  
(P): 512.471.7065

## Mission Statement

The overarching mission of the Center on Aging and Population Sciences (CAPS) is to galvanize novel research that illuminates how biological, psychosocial, and environmental factors intersect and cascade throughout the life course to generate disparities in health and well-being at older ages. The Center promotes collaborations among scholars, supports pilot projects to address complex aging and population health issues, and works to grow the number and diversity of researchers who study aging at all career stages.

- **Family Demography, Social Engagement, and Social Isolation**
- **Place, Aging, and Health**

## Domestic Research Projects

- Educational and Early-Life Predictors of Mild Cognitive Impairment
- How Gay, Lesbian, and Straight Spouses Influence Each Other's Mental, Physical, and Cognitive Health as They Age
- Education and Cognitive Functioning in Later Life: The Nation's High School Class of 1972
- Large-Scale Genomic Analysis of Aging-Related Cognitive Change Prior to Dementia Onset
- Engaging Care Partners in Fall Risk Management for Community-Dwelling Older Adults Living With Dementia
- Race/Ethnic Differences in Life Course Exposure to Death of Family Members and Consequences for Long-Term Health and Mortality Risk
- Health Disparities Among Aging Parents of Adult Children With Serious Conditions
- Developing an Imperceptible Electroencephalography At-Home Sleep Monitoring System for Cognitive and Clinical Research
- Digital Biomarker and Analytics for Cognitive Impairment With Mobile and Wearable Sensing
- Cognitive Screening Made Easy for Primary Care Providers
- Biological Aging Across the Life Course
- Social Context, the Life Course, and Genetic Transcription in Add Health
- Young Adult Caregivers of Aging Family Members in Different Ethnic/Racial Groups
- Language, Physical Activity, and Social Engagement in Daily Experiences in Late Life
- A Sociodemographic Profile of Bilingualism, Monolingualism, and Language Dominance in Older Mexican Americans in Relation to Changes in Cognitive Function Over a Twenty-Year Period
- Structural Racism, Discrimination, and Health Across the Life Course
- Daily Experiences and Well-being in Late Life: A Longitudinal Examination of Ecologically Valid Assessments of Older Adults' Daily Experiences
- Disability of a Family Member, Caregiving Behavior, and Caregiver Health Outcomes in Middle and Late Adulthood
- The Dynamics of Race Differences in Life Course Pathways Associated With the Risk of Alzheimer's Disease and Related Dementias
- Education and Financial Vulnerability Across the Adult Life Course During the COVID-19 Pandemic

## Regional Research Projects

- Biological Aging Among Older Sexual and Gender Minority Adults in the U.S. South
- Longitudinal Study of Mexican American Elderly Health
- Texas Prison Education Initiative at the University of Texas at Austin
- Discrimination Against Hispanic Adults and Risk of Cognitive Decline

## Regional Research Projects (cont'd)

- Neurocognitive Characterization of Mexican American Bilinguals and Monolinguals Presenting With Typical and Pathological Cognitive Aging
- Evaluating Longitudinal Changes in the Human Structural Connectome in Relation to Cognitive Aging
- Binational Study of the Dementia Trajectory and Living Arrangements in the United States and Mexico

## International Research Projects

- Aging in the Americas: An International Conference Series
- Life Expectancy Trends Among U.S. States and Peer Countries, 1980–2020: Estimating the Impact of the 2020 COVID-19 Pandemic on Widening Differences

## Research to Policy

- A research team led by Robin Hilsabeck published a policy paper for the Policy and Planning Committee of the National Academy of Neuropsychology regarding strategies for early recognition of cognitive impairment in older adults. The paper explains how the aging U.S. population will lead to an increase in cognitive impairment risk and informs policymakers about the importance of early identification.
- Karen Fingerman is chair of the Committee on Aging under the auspices of the American Psychological Association's Board of Psychology in the Public Interest which oversees issues related to aging in policy-related initiatives.
- Debra Umberson contributed to a report to the White House and Congress to highlight bereavement as a public health problem in the United States, with attention to the impact of family member deaths on American children and to state-level bereavement reports.
- Jacqueline Angel organized symposia on Contexts of Care in the Aging Latino Population with emphasis on optimizing dementia care for Mexicans and Mexican Americans.

## Mission Statement

Since its inception in 1968, The Yun Kim Population Research Laboratory (PRL) has served as a center for demographic research and training at Utah State University. Today, the primary mission of the PRL is to stimulate and support quality scientific research on a range of population issues affecting our state, nation, and world. Research productivity among our faculty facilitates another key mission of the PRL—to train and mentor the next generation of applied demographers and population scholars through the M.S. and Ph.D. programs in Sociology. Through seminars and research support, the PRL serves to create a vibrant community of population scholars at Utah State University.

- Multifaceted Causes of Poverty in Village Economies

## Research to Policy

- Using multiple sources of data and a statistical model that incorporates data source uncertainty, CSDE researchers estimate the true rate of infection in the U.S. with known certainty.
- CSDE researchers pooled multiple waves of the National Youth Risk Behavior Survey to reveal previously unreported differences across gender and race in the risk of suicide. The larger pool of data allowed researchers to observe that Black high school students are almost twice as likely as white students to attempt suicide without reporting any thoughts or plans. (Meghan Romanelli)
- Using federal data and a new database of community and nonprofit organizations, CSDE researchers described the geography of poverty alleviating institutions across urban, suburban, and rural areas, demonstrating the uneven presence of community-based nonprofits. Urban areas are far more likely to have a density of social support institutions, despite the higher prevalence of poverty and need in rural areas. (Scott Allard and Elizabeth Pelletier)
- CSDE researchers demonstrate how the 'Value of Statistical Life' is currently underestimated because of the omission of health needs. (Mark Long)
- Estimating cause-of-death data from U.S. prisons, CSDE researchers estimated that COVID-19 was 2.5 times higher than in the general U.S. population. (Neal Marquez)
- CSDE researchers have shown how milk produced by women with COVID-19 does not contain SARS-CoV-2 and is likely a lasting source of passive immunity via anti-RBD IgA. These results support recommendations encouraging lactating women to continue breastfeeding during and after COVID-19 illness. (Melanie Martin)
- Using novel social media data, CSDE researchers show how GoFundMe campaigns between 2016 and 2020 are concentrated in places where insurance coverage is lower and poverty rates higher. Additionally, those places are more likely to yield a higher rate of unsuccessful campaigns. (Nora Kenworthy and Mark Igra)
- Social media analyses coupled with geographic location of business data were used by CSDE researchers to show how Black businesses were both disproportionately and negatively affected by COVID-19 and associated economic shutdowns. (Bo Zhao)
- Using novel techniques to link administrative birth, hospitalization, and Child Protective Services (CPS) records, CSDE researchers show how entitlement receipt and poverty status are strongly associated with hospitalizations due to child maltreatment. (Rebecca Rebbe and Joseph Mienke)
- CSDE researchers demonstrate how COVID-19 disproportionately increased employment burdens on non-Whites who lost their jobs at higher rates than White men and non-Whites were far less able to work remotely. (Anjum Hajat and Trevor Peckham)

### Mission Statement

Established in 1947, the Center for Studies in Demography and Ecology (CSDE) supports the advancement of population science through research and training. As a federally funded research center with over 75 years of experience, CSDE scientists develop new demographic measures and methods, advance knowledge about population dynamics, generate new data and evidence to support population science, and train the next generation of demographers.

Cancer research scientist and childhood cancer survivor.

Follow

 Listen to article · 3 minutes

Youth in the U.S. have a much higher chance of dying than in other high-income countries. GETTY

Young people in the U.S. are less likely to make their 25th birthday than in any other high-income country, according to a new report.

The study was conducted using huge databases featuring records of 377,000 young people in the U.S. prior to the pandemic. The researchers found that people aged between 15 to 24 in the U.S. are twice as

# Center for Demography of Health and Aging

Jason Fletcher, *Director*

## University of Wisconsin–Madison

4412 Sewell Social Sciences  
1180 Observatory Drive  
Madison, WI 53706  
cdha.wisc.edu  
cdha@ssc.wisc.edu  
(P): 608.262.9836

## Mission Statement

The Center for Demography of Health and Aging (CDHA) at the University of Wisconsin–Madison aims to increase the understanding of behavioral processes related to health and aging. CDHA's interdisciplinary research program creates links between social demography, biomedical, and epidemiological research on health and aging.

## Number of Faculty

**Affiliates: 93**

## Departmental Affiliations

- Afro American Studies
- Agricultural and Applied Economics
- Bacteriology
- Biochemistry
- Biostatistics and Medical Informatics
- Communication Arts
- Economics
- Industrial Systems Engineering
- La Follette School of Public Affairs
- Political Science
- Population Health Sciences
- Psychology
- School of Education
- School of Human Ecology
- School of Nursing
- School of Medicine and Public Health
- School of Social Work
- School of Pharmacy
- Sociology/Community and Environmental Sociology
- Statistics
- Wisconsin School of Business

## Key Areas of Research

- **Aging and the Life Course**
- **Biodemography and Social Genomics**
- **Determinants of Disparities of Aging Trajectories**
- **Health Economics and Health Services Research**
- **Impacts of Place on Aging Processes**

## Domestic Research Projects

- Can the Earned Income Tax Credit Reduce Disparities in Intergenerational Health Mobility?
- Connecting Health to Concurrent Individual Socioeconomic Mobility and Community Opportunity
- Connecting Health to Productivity and the Role of Local Immigration Policies
- Early-Life Adversity Associations With Later-Life Epigenetic Profiles: The Multiethnic Study of Atherosclerosis
- Educational and Early-Life Predictors of Mild Cognitive Impairment: New Evidence About Mediators and Moderators From High School and Beyond
- Genomic and Metabolomic Data Integration in a Longitudinal Cohort at Risk for Alzheimer's Disease
- Life Course Determinants of Epigenetic Age Acceleration and Subsequent Dementia
- Neighborhood Socioeconomic Contextual Disadvantage and Alzheimer's Disease
- Retirement in the Context of Intergenerational Transfers
- The Effects of the Affordable Care Act Medicaid Expansion on Informal Care
- The Importance of Place in Determining Health and Mortality at Older Ages
- The Importance of Place of Birth in Determining Old Age Cognitive Health
- The Life Course Approach to Caregiving for Aging Parents: Role of Adverse Childhood Experiences
- Uncovering Life Course Constellations of Exposures Through Big Data on Place, Time, and Family Factors

## Regional Research Projects

- A Novel Longitudinal Study of the Association Between the Gut Microbiome and Aging (Wisconsin): Characterizing the Variations of Gut Microbial Composition With Advancing Age and Age-Related Chronic Inflammation and Associated Diseases Using the Wisconsin Longitudinal Study
- Researching Epigenetics, Weathering, Aging & Residential Disadvantage (Wisconsin): Exploring How Different Dimensions of Disadvantage Shape Health Disparities Through Epigenetic Mechanisms
- Robust Mendelian Randomization Methods to Identify Causal Risk Factors for Alzheimer's Disease (Wisconsin): Identifying Risk Factors for Alzheimer's Using the Wisconsin Registry for Alzheimer's Prevention
- Wisconsin Longitudinal Study 2020 and Beyond: An Expansion of the Wisconsin Longitudinal Study Examining How Early Exposures to Pollution and Toxicants Predict Mortality
- Wisconsin Longitudinal Study—Initial Lifetime's Impact on Alzheimer's Disease and Related Dementias (WLS-ILIAD Study): Tracking the Progression Into Dementia of Participants in the Wisconsin Longitudinal Study—Uncovering How the Early-Life Period Affects Dementia Risk, as Well as Adult Behaviors That Can Offset Risk

## International Research Projects

- Understanding the Importance of Place of Birth on Alzheimer's Disease Outcomes in the United States and UK: Uncovers the Relationship Between Place of Birth and Later Health by Focusing on Mobility and Early Exposures
- Latin American Mortality Database Supports the Study of Mortality Trends in Latin American Countries From 1848 to 2014
