

The background of the entire page is a composite image. It shows a pair of human hands, one from the top and one from the bottom, gently cupping a small, glowing Earth. The Earth is depicted with realistic colors of blue oceans and brown/green landmasses, but it also has a fiery, orange-red glow emanating from its surface, suggesting a hot or burning planet. The background is a deep space scene with numerous small, bright stars and some larger, hazy nebulae in shades of orange and blue.

ASSOCIATION OF POPULATION CENTERS

2020

An Independent Group of Universities and Research Centers

ASSOCIATION OF POPULATION CENTERS

2020 Resource Guide

Greetings –

On behalf of the Association of Population Centers (APC), I am proud to share with you the 2020 edition of the **APC Resource Guide**, a compendium of individual profiles of the nation's premier independent population research organizations. In these pages you will find a comprehensive overview of the current state of population science including research subject matter, interdisciplinary and cross-institutional collaborations, and applications to real-world decision-making and policy development.

Founded in 1991, the Association of Population Centers is an independent group of university-based centers and private sector research organizations whose mission is to:

- Foster collaborative demographic research and data-sharing
- Translate basic population research for public policy decision-makers
- Provide educational and training opportunities in population studies

Approximately 40 distinct entities comprise the APC, including broad-based population centers as well as several centers focused specifically on aging populations. All the centers are by design interdisciplinary, drawing faculty and research staff from diverse fields such as demography, economics, geography, medicine, public health, biology, public policy, and sociology. Scholars at APC centers conduct research on the individual, societal and environmental implications of population change. Their diverse interests include topics such as retirement, minority health, aging, adolescent health, childcare, immigration and migration, family formation and dissolution, fertility, morbidity and mortality, post-disaster resilience and population forecasting. This research, in turn, serves to inform planning, policy formulation and decision-making at the local, regional, national and even international levels.

APC centers rely on an array of public and private funding sources to support their scientists' research. *The National Institute on Aging* and the *Eunice Kennedy Shriver National Institute of Child Health and Human Development* at the *National Institutes of Health* provide most of the competitive federal funding for demographic research. *The National Science Foundation* and the *Agency for International Development* are two other important sources of federal support. Population researchers also rely on accessible data produced by the *Census Bureau*, the *National Center for Health Statistics*, the *National Center for Education Statistics*, and the *Bureau of Labor Statistics* to conduct their research.

For more information about the Association of Population Centers, please visit www.popcenters.org.

Sincerely,

Kathleen Cagney, Ph.D.

President

Mission Statement

Berkeley CEDA promotes the discovery and dissemination of knowledge on the economics and demography of aging. We support the infrastructure and pilot studies necessary for larger research projects; the expansion of national and international networks of researchers; and the development of methods for the analysis of state-of-the art, often-longitudinal, social science data. Through publications, conferences, and public appearances, Berkeley CEDA's affiliates share their findings with policy makers, other academics, and the general public. Berkeley CEDA is one of eleven centers on the economics and demography of aging nationwide supported by the National Institute on Aging.

popcenter.berkeley.edu
popcenter@demog.berkeley.edu
(P): 510.643.1270
(F): 510.642.8674

Mission Statement

The Berkeley Population Center facilitates interdisciplinary collaboration and innovation in population research, while providing essential and cost-effective resources in support of the development, conduct, and dissemination of our work. Our center enhances the quality and quantity of population research conducted at Berkeley; and develops new research capabilities to advance population research through innovative approaches.

Mission Statement

CCPR research increases scientific knowledge of population dynamics and their effects on reproductive and population health. Future improvements in public health require deeper understanding of the demographic and social determinants of health and, conversely, the effects of health on population dynamics and socioeconomic status. CCPR research seeks to understand these processes to improve public health.

University of California, Irvine
Social Science Plaza B 3215
Irvine, CA 92697
cpip.uci.edu
(P): 949.824.8851

Mission Statement

The Center for Population, Inequality, and Policy at UCI is focused on advancing research on socioeconomic factors that directly impact inequality. Faculty in the center investigate the causes and consequences of this inequality as well as policies and other strategies designed to improve well-being of the less advantaged – including employment, education, health, housing and income. UCI researchers across the social sciences, public health, education, social ecology, and natural sciences have a track record of high-quality population research on inequality – research that spans disciplinary boundaries and important areas of public policy.

Mission Statement

The Leonard and Gretchan Broom Center for Demography facilitates research and training in social demography and population studies, with particular emphasis on social and economic inequalities and health disparities. Key issues explored by Center Associates include inequalities across social groups defined by gender, sexuality, race/ethnicity, and immigration status; population-environment interactions; the determinants of population health; migration flows; spatial demography; and the allocation of resources within and among families, workplaces, schools, and other social institutions.

Key Areas of Research

- **Family Demography**
- **Biodemography and Evolution**
- **Environment, Population, and Health Dynamics**
- **Sex and Gender**
- **Education and Health**
- **Immigration, Race and Ethnicity**

Domestic Research Projects

- Health costs of upward mobility among Latino/a American young adults
- Extreme fire weather hazards and resilience in coastal Santa Barbara, California
- Health centers' impact on access to care and health
- Gender segregation in science, technology, engineering and mathematics
- Opinion dynamics in social networks
- Cheating and money manipulation
- Women in economics: Stalled progress
- Perceived discrimination and poor health
- Weight stigma, BMI and psychological and physical health
- Gender and housework norms
- Gender gaps in the effects of childhood family environment
- Increasing the share of Black college graduates in engineering or computer science

International Research Projects

- Offspring migration and parents' well-being in Mexico
- Social stratification of Afro-descendant population in Mexico
- Liberal egalitarian gender attitudes in 34 African countries
- Gender relations and gender ideologies in Middle Eastern and North African countries
- Brain atrophy, cognitive impairment and Alzheimer's in a low CVD-risk population
- Prevalence and correlates of vertebral fracture among Bolivian forager-farmers
- Reducing emissions from deforestation and forest degradation in Guatemala
- Spatial variability in adolescent childbearing in rural Honduras
- Assessing the costs and benefits of cultural practices
- Coital frequency and male concurrent partnerships during pregnancy and postpartum in Ghana
- Breast milk DHA content and cognitive performance in 28 nations
- Differences in Tsimane children's growth outcomes and associated determinants
- Child-directed speech frequency in a forager-farmer population
- Mobile phone services for agricultural decision-making in Kenya
- Co-resident children and the allocation of work

International Research Projects cont'd

- Fostering, children's education and work in north-western Tanzania
- Variability in urban population distributions across Africa
- Varieties of indigeneity in Latin America
- Racial intermarriage in the Americas

Regional Research Projects

- Using medication purchases to measure health consequences of air pollution
- Agricultural productivity and worker health: The hidden costs of extreme heat
- The impact of HIV self-testing programs on men who have sex with men in Atlanta and Seattle
- Landscape simplification and insecticide use
- Health, health care, and health research of migrants
- An optimization approach for equitable bicycle share station siting
- Spatial analytics for enhancing street light coverage of public spaces
- When incentives backfire: Spillover effects in food choice
- Health and healthcare for migrants and migrant families in the United States
- Human geo-social interaction patterns and vaccination strategies in an urbanized area
- Variability of gas prices in Santa Barbara County

In the News

- *New York Times*, June 11, 2019: "Why Women, but Not Men, Are Judged for a Messy House," covers Sarah Thébaud's research on gender differences in accountability for housework.
- *ScienceAlert*, November 11, 2018: "This Scientist Has a Warning About the WEIRD Problem in Psychology Research," covers Michael Gurven's research on the benefits of studying isolated indigenous populations.

Population Research Center

Margaret Weden, *Acting Director*

RAND Corporation

1776 Main Street
Santa Monica, CA 90407-2138
www.rand.org/well-being.html
Contact: mweden@rand.org
(P): 310.393.0411, ext. 7966
(F): 310.260.8155

Mission Statement

The RAND Population Research Center (PRC) is dedicated to the scientific advancement of research to inform public policy and decision making about frontier issues in population science. Its four key areas of research promote multidisciplinary innovations in theory, primary data collection, statistical and demographic methods and analysis. PRC draws its members from across the social and physical sciences, as well as medicine and public health. The RAND PRC provides a supportive setting for its scholars to pursue policy-driven population research aimed at improving social and economic well-being in the U.S. and around the world.

Departmental Affiliations

- Economics, Sociology, and Statistics
- Behavioral and Policy Sciences
- Engineering and Applied Sciences
- The Pardee RAND Graduate School

Number of Faculty

Affiliates: 50

Key Areas of Research

- **Child and Family Policy**
- **Fertility and Reproductive Health**
- **Health and Human Capital Across the Life Course**
- **Population Health**
- **Populations, Climate Change and Environmental Hazards**

Domestic Research Projects

- American Life Panel Survey
- EgoWeb
- Adult Social Networks and Wellbeing
- DoD Active Duty Women's Health Survey
- Economic Context and Marital Outcomes Over Time
- Effect of Social Security Disability Insurance on Health of Non-disabled Spouses
- Estimating the Future Availability of Family Care for Alzheimer's Disease in the U.S.
- Federal School Nutrition Policies, Student Food Insecurity and BMI
- Food Choice and Childhood Health
- Forecasting Survival by Socioeconomic Status and Implications for Social Security Benefits
- Human Migration Modeling
- Impact of Over-the-Counter Availability of Emergency Contraception on Uptake, Pregnancy, and Births
- Linking Health Outcomes to Community Resilience
- Modeling the Coupled Dynamics of Influenza Transmission
- Microsimulation of Obesity Policies
- Natural Experiment of Neighborhood Revitalization and Cardiometabolic Health
- Neighborhood Change: Impact on Sleep and Obesity-Related Health Disparities
- Park Rx, Physical Activity and Other Health Benefits for Low Income Children
- Population Reproduction of Poverty at Birth from Surveys, Censuses, and Birth Registries
- Prospective Study of Racial and Ethnic Disparities in Chronic Pain and Pain Burden
- Surveillance Systems to Monitor Mental and Behavioral Health after an Emergency
- State Policies and Neonatal Abstinence Syndrome
- Transition to Adulthood within its Life Course and Intergenerational Context
- Urban Revitalization and Long-term Effects on Diet, Economic and Health Outcomes

International Research Projects

- Estimating the Returns to Provider Human Capital
- Examining Facilitating Factors for Safe, Voluntary, and Sustained Post-Conflict Refugee Returns
- Harmonizing of Cross-National Studies of Aging to HRS
- Impact of Conflict on Mental Health and Risk Behaviors of Palestinian Youth
- Improving Perinatal Outcomes using Conditional and Targeted Transfers
- Integrating Information about Aging Surveys
- Integrating Counseling to Transform HIV Family Planning Services
- Mopati: A Pilot HIV Treatment Partner Intervention in Botswana
- Scaling Up Early Childhood Development Interventions in Rural Kenya
- South Africa's New Central Chronic Medicine Program: Assessing the Clinic, Patient, and Community Impact
- Vaccine Beliefs and Decision Making

Regional Research Projects

- Chevron Appalachian Partnership Initiative
- Evaluation of the 2020 Census in California
- Healthy Futures: Improving the Health and Wellbeing of Children in Greater Rochester
- Housing Initiative Evaluation for the CA Inland Empire
- Mapping Workforce Certificate and Degree Pathways in Ohio
- Schools, Neighborhoods, & the Transition to Adulthood: A Policy Lab with Wake County Public Schools
- Study of Trauma, Resilience, and Opportunity

Research to Policy

Population Center (CUPC)**
Institute of Behavioral Science
483 UCB Boulder, CO 80309-0483
www.colorado.edu/ibs/cupc/
CUPC@colorado.edu
(P): 303.492.5548
(F): 303.492.2151

Mission Statement

CUPC brings together an interdisciplinary community of scholars, across three University of Colorado campuses, dedicated to research and training in population science with broad focus on health, migration and environmental demography. By providing administrative, technical and development support, CUPC facilitates collegial interaction and nourishes collaboration across several departments, institutes, and universities. An important aspect of the Center is a high level of collaboration between faculty and graduate students. Center affiliates explore demographic processes in the US and a variety of international settings while applying their expertise to yield high quality, policy-relevant research and training. Current initiatives focus on large-scale research initiatives, complex data collection efforts, and new methodological and statistical approaches.

Departmental Affiliations

- Anthropology
- Economics
- Environmental Studies
- Geography
- Health and Behavioral Sciences (CU Denver)
- History
- Institute for Behavioral Genetics
- Integrative Physiology
- Psychology and Neuroscience
- Sociology

Number of Faculty Affiliates:
54 faculty across 3 CU campuses

Key Areas of Research

- Child and Adolescent Transitions to Healthy Adulthood
- Gene-Environment Interplay and Health
- Environmental Demography
- Health and Health Behavior Disparities
- Historical Demography
- Reproductive Health and Health Policy
- Migration and Spatial Demography
- Population Health and Socioeconomic Trends in Rural America

Domestic Research Projects

- Adolescent substance abuse and risky sexual behavior
- Health lifestyles among children and youth
- Social norms and teen pregnancy
- Genome-wide association models of body-mass index
- Genetic risks, pathways to adulthood, and health inequalities
- Social and genetic epidemiology of health behaviors
- Age, period, and cohort models of obesity disparities and mortality
- Medical decision-making
- Impact of contraceptive access on life course outcomes
- Migration and climate change
- Geo-located micro data for high spatial resolution population studies
- Environmental inequality in urban areas
- Community resilience following disasters
- Changes in racial health differences across periods and cohorts
- Migration in the 1930s: Beyond the Dust Bowl
- Environmental implications of land use change in the Great Plains
- Gender and HIV
- Natural resource use among HIV-impacted households
- Immigrants' mobility in response to labor demand conditions
- Health outcomes of Mexican immigration to the United States
- Neighborhoods and spatial models for small area estimation with census data
- Health and demographic trends in rural America

International Research Projects

- Decentralized governance, health care systems, and health in Honduras
- Conditional cash transfers, education, and young adults in Nicaragua
- Climate change and migration in Mexico
- Cohort change, educational disparities, and smoking in Europe
- Epidemiology of non-communicable diseases in South Africa

International Research Projects Cont'd

- Changing environmental conditions and societal conflict in East Africa
- Adolescent problem behavior in informal settlements in Kenya
- HIV, aging, and livelihoods in rural South Africa
- HIV and fertility, and HIV after 40, in South Africa and Malawi
- Long-term effects of family planning interventions for health in rural Bangladesh
- Children's migration and the health of elderly kin in East Asia
- Drinking water and arsenic poisoning in Bangladesh
- World economy and greenhouse gas emissions
- Role of population size, composition, and distribution in global climate change
- Migration and Natural Resource Livelihoods in South Africa
- Methodological innovation to preserve confidentiality in Health and Demographic Surveillance Sites
- Adaptation to climate change in East Africa

Regional Research Projects

- Population, the environment, and migration on the U.S. Great Plains
- Built and social environment and the health in Denver neighborhoods
- Access to medical marijuana and substance use in Colorado
- Wildfire mitigation risks and policies in the American West
- Teen pregnancy prevention among Native Americans

Research to Policy

- Climate change mitigation in low-income communities
- Evaluating the impact of ART access on health in South Africa
- Effect of Removal of Planned Parenthood from the Texas Women's Health Program
- Health policies to increase physical activity in the Rocky Mountain region
- Eliminating agricultural greenhouse gas emissions in the Great Plains region
- Extending a successful maternal, neonatal, and child health program into the government health system in Bangladesh

In the News

- Amanda Stevenson's article, *Effect of Removal of Planned Parenthood from the Texas Women's Health Program*, was cited in an MSN article regarding federal government actions to restore funding to Texas programs that excludes Planned Parenthood. Jan 2020

POPULATION RESEARCH CENTER

THE UNIVERSITY OF CHICAGO

Kathleen A. Cagney, *Director*

The Population Research Center

The University of Chicago
1155 East 60th Street, 3rd Floor
Chicago, IL 60637
popcenter.uchicago.edu

Mission Statement

The Population Research Center at the University of Chicago is an interdisciplinary research center designed to facilitate high-quality population research within its signature theme—human and social capital in the urban context—and conducted by its researchers in economics, sociology, health, and other disciplines.

Departmental Affiliations

- Chicago Booth School of Business
- Computation Institute
- Department of Comparative Human Development
- Department of Economics
- Department of Public Health Sciences
- Department of Psychology
- Department of Sociology
- Harris School of Public Policy Studies
- Pritzker School of Medicine
- School of Social Service Administration

Number of Research Faculty:

70 (+9 Research Affiliates)

Key Areas of Research

Signature Theme: Human and Social

Capital in Urban Context

- Sex and reproductive health
- Economics, education, and labor market outcomes
- Health and disease across the lifespan
- Measurement and methods

Domestic Research Projects

- Variable Selection Model for Studying the Predictive Validity of Measures of Classroom Quality
- Enhancing Sleep and Physical Activity in the HRS Family of Studies
- Advancing Spatial Evaluation Methods to Improve Healthcare Efficiency and Quality
- Disparities in Reproductive Health
- Developing Tools to Engage Adolescent Men who have Sex with Men
- Getting on Track Early for School Success: Formative Assessment and Instruction of Mathematics in Preschool Classrooms
- Models of Infectious Disease Agent Study (MIDAS) Research Network
- Health and Economic Development
- Determinants of Subsidy Stability and Continuity of Child Care in Illinois and New York
- General Social Survey (GSS)
- National Social Life, Health, and Aging Project (NSHAP)
- National Longitudinal Survey of Youth 1997 (NLSY97)
- Human Capital and Economic Opportunity Global Working Group
- Data-driven Multiscale Coupled Urban Systems Modeling and Urban Sensing
- Activity Space, Social Interaction and Health Trajectories in Later Life
- Network on the Determinants of Life Course Outcomes
- Suicide Clusters in Schools and Communities

International Research Projects

- Internal and International Migration in Asia, Africa and Latin America
- Social Protection and Labor Market Outcomes in South Africa: Employment and Youth Transitions to the Marketplace
- Following Up for Better Health: Improving Non-Communicable Disease Compliance in Urban India
- Evaluation of USAID/Uganda Literacy and Health Education Program
- Optimizing Prevention Approaches for Children Reintegrating from Orphanages in Azerbaijan
- Public (Mis)perceptions in the U.S. and China

Regional Research Projects

- Oral Health in Community Context: Health Status and Access to Care on Chicago's South Side
- An Urban Sciences Research Coordination Network for Data-Driven Urban Design and Analysis
- Strengthening Mentoring Programs for At-Risk Youth Through Human Capital Supports: A Large-Scale Randomized Field Experiment in Chicago
- Underground Gun Markets in Chicago
- Southside Health and Vitality Studies (University of Chicago Medical Center)
- Diabetes and Aging in a Multi-Ethnic Population
- Translational Research at the University of Chicago
- Contraceptive Use Among Teens
- Paths to Purposeful Parenting: A Pilot Study Leveraging Neuroscience and Technology to Promote Low-Income Parents' Attention and Focus
- Addressing Truancy through a Descriptive Social Norms Intervention
- Oral Health, Systematic Health, Well-Being and the Social Sciences
- Development of an Urban-Scale Instrument for Interdisciplinary Research

Research to Policy

- Charlie Catlett and Kate Cagney work on Array of Things, a collaborative effort among leading researchers, local government, and communities in Chicago, to collect real-time data on the city's environment, infrastructure, and activity.
- David Meltzer and Harold Pollock serve as Faculty Directors of University of Chicago's Health Lab. The Health Lab partners with civic and community leaders to identify, evaluate, and scale programs and policies that improve health outcomes for low-income and disadvantaged urban residents.
- Luc Anselin uses data science to examine geographic disparities in healthcare and serves as Director of the Center for Spatial Data Science.

Johns Hopkins University
3505 North Charles Street
Baltimore, MD 21218
(P): 410-516-2361
hpc@jhu.edu

Mission Statement

The HPC aims to facilitate innovative research that combines core strengths in social scientific research, public health research, biomedical and biostatistical research, engineering, and computer sciences. We support methodological developments that extend beyond traditional demographic methods. We promote interdisciplinary research that is translational and can inform policy makers. We place a priority on the development of early stage and early established investigators.

Departmental Affiliations

HPC comprises faculty associates from seven schools: Krieger School of Arts and Sciences, Bloomberg School of Public Health, School of Medicine, School of Nursing, Whiting School of Engineering, School of Education, and Carey School of Business.

Number of Faculty

Affiliates: 66

Key Areas of Research

- **Poverty and Inequality**
- **Sexual and Reproductive Health**
- **Family, Maternal and Child Health**

Domestic Research Projects

- Factors That Influence the Implementation and Effectiveness of a Patient Safety Bundle to Reduce Low-Risk Cesarean Sections (Creanga)
- The Decline in Women's Employment (Moffitt)
- A Proposal to Continue a National Data Program for the Social Sciences (Morgan)
- Identifying and Engaging Urban HIV Infected and Uninfected YBMSM In Care (Decker)
- Creating Moves to Opportunity (DeLuca)
- Statistical Methods to Improve Reproducibility and Reduce Technical Variability in Heterogeneous Multimodal Neuroimaging Studies of Alzheimer's Disease (Crainiceanu)
- A Structural HIV Prevention Intervention Targeting High-risk Women (Stuart)
- Analyzing Opioid Prescribing Limit Policies (Stuart)
- Evaluation of Harm Reduction Outreach and Capacity Building Project (Sherman)
- Danger Assessment Tool (Campbell)
- Housing Affordability and Child Health (Pollack)
- Hard-to-Reach Populations: Ending the AIDS Epidemic (Wawer)
- Impact of Supplemental Immunization Activity Campaigns on Health Systems (Helleringer)
- Performance Monitoring and Accountability/Agile (PMA/Agile) (Tsui)
- A Generalized Diabetes Networking Tool to Enhance Social Support for Patient Self-Management (Surkan)
- Testing the myPlan App to Prevent Dating Violence with Adolescents (Glass)
- Stress and Mortality Among Black Men (Thorpe)
- Housing and Healthy Child Development (Newman)
- Achieving Health for All: Success Stories Inspired by Alma-Ata (Bishai)
- Characterizing Resiliencies to Physical Stressors in Older Adults (Bandeem-Roche)
- Growing Up Great- The Way Forward (Moreau)

International Research Projects

- The Impact of Ebola Infection on Demographic and Social Outcomes in Sierra Leone (Anglewicz)
- Wa'Kan Ye'Zah: Enhancing Caregivers' and Children's Well-Being Through an Evidence-Based and Culturally Informed Prevention Intervention (Haroz and Campbell)

International Research Projects Cont'd

- Using Mobile Technology to Supplement Existing Non-Communicable Disease Risk Factor Surveillance in Low and Middle Income Countries (Ahmed)
- Gender Barriers to NCD Prevention (Decker)
- Improving the Measurement of Adolescent and Adult Mortality in Low-Income Countries (Helleringer)
- Feasibility of Measuring HIV-Related Mortality During Population-Based Surveys in Africa (Helleringer)
- Strengthening Capacity to Address Gender-Based Violence in WHO's Emergency Work (Glass)
- Validating African Brain Powered Games for Neurodevelopmental Assessment of HIV Affected Ugandan and Malawian Children for Use on a Mobile Network Platform (Taha)
- Global Age Patterns of Under-Five Mortality (Liu)

Regional Research

- Maryland Maternal Health Innovation Program (Creanga and Ahmed)
- High School Success and Postsecondary Readiness in Baltimore City (Stein)
- HIV Surveillance and Prevention (Jennings and Marcell)
- Study of Divestment and Abandonment in Baltimore, Maryland (DeLuca)

Research to Policy

- Senator Andrew Jones, R-Centre, of Alabama, put forward an opioid education bill—the Patient Opiate Risk Education Act—that would require medical practitioners to educate patients about the addiction and health risks involved with prescription opioids. Senator Jones cited the findings of a study by recent HCPDS postdoctoral researcher Lyndsey Rolheiser, PhD, faculty member S V Subramanian, PhD, and a colleague that identified his congressional district as having the highest opioid prescription rate in the United States.
- The Alfred P. Sloan Foundation has funded the development of a book project that gathers an interdisciplinary community of top scholars to examine how the contexts that shape individuals' likelihood of working longer are changing across cohorts, and how some population groups—especially racial minorities and lower-income workers—are impacted more than others. The resulting volume of new research (to be published in 2021) has the potential to influence public policies that improve the workplace for older employees, and to increase the public's understanding of aging and labor force challenges.
- Currently, public policy decisions in India are based on data that is collected and reported at broader levels (e.g., districts or states) and does not align with the geopolitical units represented by elected politicians. Faculty member S V Subramanian, PhD, and visiting scientist Rockli Kim, ScD, have been awarded a \$2.2 million dollar grant by the Bill & Melinda Gates Foundation with the aim of leveraging novel geospatial and statistical methodologies in order to provide policy makers in India with more precise and targeted health data on their constituents.

www.nber.org

Mission Statement

The mission of the NBER Center is to develop, coordinate and advance research by economists on health and aging issues. Center research considers the health and wellbeing of people as they age, how health and wellbeing are affected by the changing environment in which people live, and what interventions might be effective in improving health and wellbeing.

Departmental Affiliations

The NBER is a consortium of economists from research universities around the country. The Center's researchers are drawn largely from the NBER's aging and health care program areas.

Mission Statement

The Office of Population Research (OPR) at Princeton University has fostered research and training in population since it was founded in 1936 as the world's first population research center. Our mission is to provide the resources and environment that will result in the creation and dissemination of fundamental demographic knowledge and the highest quality learning opportunities for doctoral and postdoctoral trainees.

CORNELL POPULATION CENTER

Kelly Musick, *Director* • Parfait M. Eloundou-Enyegue, *Associate Director*

Cornell University

MVR Hall
Ithaca, NY 14853
www.cpc.cornell.edu
population@cornell.edu

(P): 607.255.1960

(F): 607.255.4071

Mission Statement

CPC coordinates and promotes national and international population research, encourages cross-disciplinary innovation, supports grant-getting, provides cutting-edge demographic training to students and postdocs, and disseminates research findings to policy practitioners and the public.

Grant Development Program

CPC's Grant Development Program supports grant submissions to population-related external funding agencies through mentorship, training, and feedback on work-in-progress.

Seminar Series and Events

CPC hosts a seminar series that expands networks of population scientists and brings innovations in population research to campus. Other regular events include methods mini-courses, conferences, and an annual workshop for population scholars from Upstate New York.

Undergraduate and Graduate Demography Minors

CPC's multidisciplinary training program provides students with opportunities to develop fundamental demographic tools and insights from a range of perspectives.

Frank H. T. Rhodes Fellowship Program

CPC runs a postdoctoral training program with generous support from the Atlantic Philanthropies' endowment in honor of former Cornell president, Frank H. T. Rhodes.

Key Areas of Research

- Families and Children
- Health Behaviors and Disparities

Research to Policy

- W. Brown addressed state concerns about data being weaponized against unauthorized immigrants.
- Cawley studied how beverage taxes and food portion size impact consumption.
- B. Cornwell worked on the study of older adults and how health and social connectedness are linked in later life.
- Eloundou-Enyegue contributed to the U.N.’s Global Sustainable Development goals and assessment of current trends in global development to chart a better future.
- Enns and Wildeman analyzed the prevalence of incarceration in families.
- Figueroa studied the social and behavioral determinants of health, with a focus on children’s energy-balance behaviors in underrepresented and low-income communities.
- Musick examined persistent inequalities in parenting and earning penalties.
- Reyes addressed mitigating poverty through the formation of extended family households.
- Vilhuber contributed to updates of the American Economic Association policy aimed at improving replicability in research.
- Williams studied how statelessness, citizenship, and out-migration contributed to stratification among rural elderly in the Highlands of Thailand.

Guttmacher Center for Population Research Innovation and Dissemination

Kathryn Kost, *Director* • Ann Moore, *Associate Director*

Guttmacher Institute

125 Maiden Lane, 7th Floor
New York, NY 10038
guttmacher.org/population-center
popcenter@guttmacher.org

(P): 212.248.1111
(F): 212.248.1951

Mission Statement

The Guttmacher Institute is a leading research and policy organization committed to advancing sexual and reproductive health and rights in the United States and globally. The Guttmacher Center for Population Research Innovation and Dissemination enhances the quality of research carried out at the Institute by providing opportunities for interdisciplinary idea generation, building the skills of a new generation of scientists, and encouraging collaboration among center affiliates and with external colleagues. It also ensures that the Institute's work and data are made available to a wide range of audiences.

Number of Affiliates

- 19 doctoral-level
- 43 total

Research to Policy

- Monitored reproductive health policy developments nationally and in each state
- Using several channels, including the Guttmacher Institute's policy journal, the *Guttmacher Policy Review*, brought data and research to public policy debates on sexual and reproductive health issues
- Used data and analyses by Guttmacher researchers to assess the potential impact of moves to dismantle the network of safety-net family planning providers and reshape the Title X national family planning program

Key Areas of Research

- **Fertility preferences, pregnancy intentions and pregnancy outcomes**
- **Sexual behavior, contraceptive use and contraceptive services**
- **Adolescent sexual and reproductive health**
- **Policy impacts on reproductive health outcomes**
- **Measurement of fertility-related behavior and pregnancy outcomes**

Domestic Research Projects

- Monitoring the incidence of unintended pregnancy and studying the consequences of unintended childbearing for parents and children
- Calculating new estimates of contraceptive failure for a variety of methods and population subgroups, developing a theoretical model of contraceptive failure
- Monitoring trends in the use of contraception, including long-acting methods and use of more than one method
- Measuring key reproductive health indicators among immigrant women
- Calculating a pregnancy risk index to understand the impact of sexual activity and contraceptive use on adolescent fertility
- Conducting a national census of the nation's network of publicly funded family planning service providers
- Documenting the need for family planning and other reproductive health services in the United States, the adequacy of services to meet those needs, and the benefits from such services
- Studying publicly funded family planning clinics and clients to document the impact of policy changes
- Conducting a census of all known abortion providers in the United States to assess the number of abortions and abortion rates at both the national level
- Developing new techniques and improving existing methodologies for measuring the completeness of abortion reporting in our nation's primary fertility-related surveys
- Conducting a nationally representative survey of abortion patients in the United States
- Conducting a survey of workers in sexual and reproductive health and rights organizations about their experiences with sexual harassment at work to produce prevalence estimates for the field
- Institutionalizing reproducibility and transparency processes across quantitative and qualitative projects

International Research Projects

- Analyzing the incidence, trends and safety of abortion regionally and worldwide
- Quantifying the impact on sexual and reproductive health services of the *Global Gag Rule*

International Research Projects Cont'd

- Calculating unintended pregnancy estimates globally
- Documenting cost of unsafe abortion in countries with highly restrictive abortion laws
- Exploring women's use of misoprostol for induced abortion when they acquire it through the informal sector
- Documenting adolescents' use of abortion-related services in selected countries in sub-Saharan Africa
- Measuring abortion-related near-miss maternal mortality in Kenya
- Advancing methods for studying the use of abortion-related near-miss maternal mortality in fragile states
- Using the platform of the Guttmacher-Lancet Commission to help develop a broader and evidence-based vision for SRHR worldwide over the next 15 years
- Identifying sexual and reproductive health research needs in fragile states
- Measuring abortion incidence and complications in Ghana and Indonesia using new methods
- Conducting comparative work on abortion in South Asia
- Estimating the incidence of post-abortion complications and trends in contraceptive use and abortion in India
- Estimating the costs of providing comprehensive maternal and reproductive health care globally and for specific countries
- Describing the quality of safe abortion and post abortion care in the Ghanaian health system and the factors influencing quality of care
- Continuing to invest in the scientific training of colleagues from developing countries

In the News

Regional Research Projects

- Producing state unintended pregnancy rates
- Documenting abortion incidence and services in states and metropolitan areas
- Tracking state-by-state adolescent pregnancy and childbearing trends
- Investigating the impact of federal and state policy changes on the provision of family planning services and on individuals' access to contraception
- Documenting current contraceptive use patterns across states

POPULATION COUNCIL

Ideas. Evidence. Impact.

Julia Bunting, OBE, *President*

Population Council

One Dag Hammarskjöld Plaza
New York, NY 10017
Tel: +1 212 339 0500
Fax: +1 212 755 6052
pubinfo@popcouncil.org
www.popcouncil.org

Mission Statement

The Population Council, an international, nonprofit, nongovernmental organization, seeks to improve the well-being and reproductive health of current and future generations around the world and to help achieve a humane, equitable, and sustainable balance between people and resources. This mission is accomplished through three program areas: Reproductive Health; HIV and AIDS; and Poverty, Gender and Youth.

Number of Faculty

Affiliates: 80 PhD-level staff

Key Areas of Research

- **The well-being of vulnerable populations, especially girls and women (girls' education, child marriage, FGM)**
- **Sexual and reproductive health and rights (contraception, abortion, STIs, HIV, maternal mortality)**
- **Demographic trends and their consequences (including the environment and climate change)**
- **Development of sexual and reproductive health technologies**

International Research Projects

- Evidence to end FMG/C: generates quality evidence to accelerate abandonment of female genital mutilation/cutting (FGM/C) within one generation
- Breakthrough Research: data and evidence to integrate social and behavior change approaches into health-related government and NGO programming
- Project SOAR: generates critical evidence to improve HIV prevention, care, and treatment policies and programs around the world
- The Evidence project: implementation science to strengthen, scale up, and sustain family planning services to reduce unintended pregnancies worldwide
- Powering Progress in Girls' Education: mapping the ecosystem of policymakers, practitioners, researchers and advocates working in global girls' education, synthesizing what works, and identifying opportunities to scale up successful interventions and investments
- Frontline Health: supporting the strengthening of frontline health worker programs in seven countries to improve health services for underserved populations

Organizational Collaborations

Numerous collaborations with local and national organizations in developing countries

Research to Policy

- The Council’s research on worker health in Cambodia included assessing the policy landscape, garment worker needs and living conditions, and outcomes of ongoing programs. The research galvanized efforts to prioritize reproductive health access, resulting in new Ministry of Labor and Vocational Training guidelines to include related services in workplace infirmaries.
- Population Council researchers collaborated with the Tanzanian National AIDS Control Programme to demonstrate the acceptability of and identify opportunities for introducing oral pre-exposure prophylaxis (PrEP) for adolescent girls and young women. Study results are informing the Tanzanian national rollout of PrEP.
- Population Council research to improve the evidence base on female genital mutilation/cutting (FGM/C) found that nearly 40% of cases in Egypt are now being performed by health care professionals. The National Population Council in Egypt thus approved integration of anti-FGM/C content into medical school curricula across the country.

Duke University

Mission Statement

The Duke University Population Research Institute (DUPRI) is an interdisciplinary research organization bringing together researchers from biological, mathematical, psychological, statistical, sociological, economic and policy sciences at Duke. The Institute seeks to advance knowledge in the areas of demography and population science, to expand the current boundaries of demographic investigation through highly innovative interdisciplinary research, and to foster the development of the next generation of researchers.

Mission Statement

At the Carolina Population Center (CPC) we believe that understanding how and why populations change over time is key to advancing the well-being of all people. Our faculty, staff, and students conduct research on population, health, aging, and the environment, and share data and findings that push the field forward and train the next generation of population scholars.

Mission Statement

IPR nurtures population and health research at Ohio State University in four broad areas: Sexual and Reproductive Health; Family Demography; Mortality and Health over the Life Course; Migration. IPR furthers research in these areas by:

- Technical advice and workshops that advance the skills of IPR affiliates in employing four analytical, methodological, spatial and contextual approaches: inter-generational and life course analysis, biomarker measures, and administrative data;
- Serving as a bridge between the behavioral and biomedical departments at OSU;
- Cultivating faculty strength in population and health in Anthropology, Economics, Geography, Psychology, Sociology, Public Policy, Human Sciences, Statistics, Public Health, Nursing, and Agricultural, Environmental, and Development Economics;
- Fostering new large-scale collaborative multidisciplinary research projects that can compete successfully for external funding;
- Involving and mentoring junior faculty and nurturing their interests and skills;
- Providing demographic training for students across diverse but allied disciplines.

Number of Faculty Affiliates: 55

Key Areas of Research

- Sexual and Reproductive Health
- Family Demography
- Mortality and Health over the Life Course
- Migration

Domestic Research Projects

- Consequences of marriage and cohabitation on health and well-being
- Neighborhood and social context effects on adult health and adolescent risk behavior
- Geographic analysis of health
- Immigration to the U.S. and health outcomes
- Gender differences in higher education
- Consequences of student debt for young adult transitions
- Environmental exposures and health
- Contraception and the prevention of STIs and unintended pregnancy
- Bayesian methods for socio-spatial point patterns and networks
- Family contexts, physiological stress and health in children
- Effects of violence exposure on neural development, risk behavior, and health
- Activity space and social networks in later life: Dynamics of changing health
- Family migration and early life outcomes
- Mechanisms underlying sexual minority health disparities in the United States
- Cross-substance policy influences on trajectories of youth marijuana and tobacco use
- Effects of state-level policy implementation on opiate abuse and mortality
- Postpartum family planning
- Automation of verbal autopsy cause coding
- Establishment of the national couples health and time use study
- The all or nothing marriage? Marital functioning and health among individuals in same and different-gender marriages
- Immigrant health (dis) advantage in the labor market
- Cigarette smuggling, taxes, and substitution between cigarettes and E-cigarettes
- Exploring the intersection of food insecurity, food sourcing and family demography
- The role of motherhood biographies in midlife women's health
- Applying machine learning to identify immigrant enclaves
- Overdue: Low-income debt, child

International Research Projects

- Family migration and early life outcomes
- Fertility decline in Africa and the Arab region
- Promoting condom use in established unions in Vietnam
- New methods for ascertaining cause of death in Africa

International Research Projects Cont'd

- Demand for modern contraception in sub-Saharan Africa: New methods, new evidence
- Food security in Nicaragua
- Social contexts, stress and non-communicable disease risk factors across the life course: a pilot study in Nicaragua

Regional Research Projects

- Adolescent health & development in context: Franklin County
- Ohio Longitudinal Data Archive (OLDA): State of Ohio
- Spatial analysis of infant mortality in Ohio
- Ohio Policy Evaluation Network (OPEN)

Mission Statement

The Population Research Institute is a multidisciplinary center that delivers resources that support innovative population research. PRI promotes a dynamic, talented, and collaborative research community with over 100 faculty researchers. Established over four decades ago at the Pennsylvania State University (PSU) and funded by the National Institutes of Health (NIH) since 1992 with generous supplemental support from PSU, this vibrant, multidisciplinary center provides strategic resources to support innovative, high impact population research.

Key Areas of Research

- **Communities, Neighborhoods and Spatial Processes**
- **Migration, Immigration and Immigrant Integration**
- **Families, Networks and Wellbeing in a Changing World.**
- **Population Health**
- **Social Determinants of Health Disparities**

Domestic Research Projects

- Benefit Generosity, Specialty Drug Use, and Other Health Service Use in Medicare
- Connecting Population Health Scientists across Disciplines: Generating Evidence, Informing Research Translation and Fostering a Culture of Health
- Economic Context and Health over the Lifecourse
- Economic Restructuring, Demographic Change, And Income Inequality In Rural America
- Educational Integration Across Generations Among Mexicans and Other National Origin Groups
- Exploring How State Education Policies in the Use of School Punishment and Special Education Affect Racial and Socioeconomic Disparities: A Multilevel and Longitudinal Study
- Family contexts, racial and ethnic characteristics, and the implications of adoption for the wellbeing of children
- Friendship Networks and Emergence of Substance Use
- Generalizability and Replicability of Twitter Data for Population Research
- Illegal Immigration, Immigration Enforcement Policies, and American Citizens' Victimization Risk
- Multivariate Regression with Respondent-Driven Sampling Data
- National Assessment of Victimization Risk and Crime Reporting Among U.S. Citizens and Non-Citizens
- Residential Characteristics and Child Health and Well-Being
- School Attendance Zone Boundaries and the Connection to Neighborhoods, Segregation, and Access to Educational Opportunity
- Social Network Interventions to Reduce Race Disparities in Living Kidney Donation
- System and Social Determinants of the Health of Foster Children
- Vocabulary and Reading Difficulties in Preschool and 1st Grade and their Consequences for Mathematics and Science Achievement

International Research Projects

- Crossnational Comparisons of Kinlessness and Health: Past, Present and Future
- Family Migration Context and Early Life Outcomes
- Fathers' Time Spent with Sons and Daughters
- People, Place, and Payments in a Complex Human-Environment System
- Pharmacy Antimicrobial Stewardship and Economic Program (PhASE) for Community Pharmacists in Kathmandu Valley, Nepal
- Promoting Research and Discovery on Global Religion

Regional Research Projects

- Activity space and measuring environmental exposure in behavioral research
- Big Data and Network Analysis of Children's Health
- Economic Implications of Pennsylvania's Foreign-Born Population
- Emerging Adulthood for Foster Care Youth
- Food Insecurity Among Homeless and Precariously Housed Children and Families
- Marcellus Shale Income Gains (MSIG) Natural Experiment
- Pursuing Opportunities for Long-term Arctic Resilience for Infrastructure and Society
- Pennsylvania Population Network

Mission Statement

The PSC's mission is to remain a national and world leader in research and training. Our goal is to link core research in the social and behavioral sciences to issues on the growth and structure of human populations and the role of socioeconomic stratification and human/social diversity in population health. The PSC is characterized by continuity, innovative and high-quality population-related research and maintains a flexible research infrastructure that enhances interaction, builds collaborations and encourages understanding of evolving issues. The Training program is a leader in the preparation and mentoring of Ph.D.'s and Post-Doctoral fellows and reflects a vision of the population sciences and health in which a strong background logic of demographic process is the gateway to an array of topics of public/scientific interest.

Key Areas of Research

- **New Dynamics of Population Diversity**
- **Demography**
- **Human Resources and Endowments**
- **International Population Research**
- **Population and the Environment**
- **Big Data and Population Science**

Domestic Research Projects

- Migration and US Fertility Patterns
- Social Determinants of Population Health Inequality
- Labor Markets and Productivity
- Stagnation in US Mortality Decline
- Effectiveness of Behavioral Economics and Environmental/Structural Strategies/Interventions
- Built Environment Effects Well-Being
- STD transmission and intervention

International Research Projects

- **South America:** Healthcare Workforce and Quality Outcomes; Impact of Early Life Undernutrition
- **Asia:** Prenatal Ambient Air Pollution (China); Population-Level Educational Innovations and Reforms Reducing Social Inequality and Increase Well-Being of Korean Youth; Poverty, Productivity and Cognitive Function; Sanitation and Social Norms (India)
- **Africa:** Malawi Longitudinal Study of Families and Health; Interventions to Reduce Engagement in Risky Behaviors and Improve Health Outcomes, HIV Risks During Transition to Adulthood; The Influence of Social Networks on HIV-Related Behaviors; HIV Prevention Strategies for Individuals in Rural High-HIV Prevalence Contexts; The Acceptability of HIV Testing and Counseling; Effectiveness of Economic Incentives Promoting HIV Testing and Care Among High-Risk Men in Rural Uganda; RCT of Text Messaging to Increase Medication Adherence and Care Retention in Young HIV+ Ugandans

Regional Research Projects

- Smarter Big Data for a Healthy Pennsylvania
- Spatial Analysis of Census Tracts in Philadelphia to Assess Supply of Primary Care Providers to Determine Population Characteristics and Disparities Associated with Variations in Geographic Access
- Urban Ecological Intervention: Stabilize Abandoned Properties to Reduce Stress, Sexually Transmitted Diseases, Violence and Premature Mortality
- Elimination of Nonmedical Vaccine Exemptions
- Estimate the Population Prevalence of NJ Youth with a Developmental Disability Using Sample Survey Data

In the News

- A Buttenheim was quoted in the *New York Times* (9/23/2019) on “How Anti-Vaccine Sentiment Took Hold in the United States”; appeared on WHYY Radio Times (4/2019) and Minnesota Public Radio.
- AL Duckworth wrote “How Reading A Good Book Can Make You A Better Person” for the *Philadelphia Inquirer* (9/17/2019), co-authored an article in the *Washington Post* (4/17/2019); was interviewed about her career journey by *Forbes* (5/7/2019).
- The Behavior Change for Good Initiative, started in 2017 by A Duckworth and K Milkman, received a \$2 million donation to continue how behavioral science can teach people to be healthier, better educated, and more responsible with their finances.
- A Lareau joined a conversation on *KPCC Radio* about unequal access to the resources necessary for “intensive parenting.” (1/6/2020)
- A Venkataramani’s study in *JAMA Pediatrics* (2018) on DACA eligibility was cited by a Mexican Government and a U.S. Supreme Court brief. (10/3/2019); He was recognized by the *American Journal of Public Health* for co-writing one of the best papers of the year, “Economic Vulnerability Among US Female Health Care Workers: Potential Impact of a \$15-per-Hour Minimum Wage,” with KEW. Himmelstein. (2/1/2019)
- D Aldana Cohen discusses eco-apartheid in *The Nation* (7/26/2019), gave a two part interview to *Real News Network* (3/1/2019), co-authored an article in *The Guardian* (2/7/2019) and was quoted in *The Atlantic* (2/19/2019), the *Pacific Standard* (2/27/2019) and *Jacobin Magazine* (2/5/2019) about the Green New Deal.
- D Roberts wrote the forward, “Abolition Constitutionalism,” for the *Harvard Law Review’s* Supreme Court Issue. (11/8/2019); She writes about the continued prevalence of eugenics in *The Philadelphia Inquirer*. (5/1/2019); Was interviewed by *NPR* about the case of Marshae Jones, who was indicted on manslaughter charges after her fetus was shot by another woman. (6/30/2019)
- D Culhane was quoted in a *USA Today* (8/14/2019) article and appeared on *60 Minutes* (12/1/2019) with Anderson Cooper.
- I T Elo appeared in NBC 10 features on mortality and longevity and the upcoming 2020 Census. (1/30/2020)
- HP Kohler discusses U.S. birth rates in a *Marketplace* podcast (1/25/2019) and is quoted in *Time Magazine* (5/15/2019) and *Popular Science* (12/11/2019).
- J Kable co-led a new study in *Psychological Science* and was discussed in a *Philadelphia Inquirer* article. (1/3/2019)
- KG Volpp and co-authors published an article in *Harvard Business Review* about gamification programs in behavioral health. (5/7/2019)
- L H Aiken and M D McHugh’s research in *Health Affairs* was quoted in the *New York Times*. (6/8/2019)
- M Guillot and alum C Payne’s new way of measuring life expectancy published in *Population Studies* was featured in *Science Daily*. (8/22/2019)
- OS Mitchell authored an article in *The Hill* about the Butch Lewis Act currently before congress. (6/27/2019)
- P Gonalons-Pons’ work has been cited in the *Philadelphia Inquirer* in an article regarding the National Domestic Workers Bill. (1/2/2019)
- W Roth was featured in a *Huffington Post* article about the role of DNA kits like 23andMe in perceptions of race and identity. (9/19/2019)

Mission Statement

The Population Studies and Training Center promotes and supports innovative research on the causes and consequences of population size, composition, distribution, and wellbeing in the U.S. and globally. The Center carries out this mission by providing state-of-the-art facilities and research support to associates; maintaining a forum for intra- and interdisciplinary exchange on population science; supporting a high-quality graduate and postdoctoral training program; mentoring a diverse and inclusive community of population scholars at Brown; engineering and seeding promising new areas of population research; and developing cross-unit collaborations on campus and with partners in Rhode Island (RI) and around the world.

Mission Statement

The mission of the Population Research Center (PRC) is to provide the resources and culture that are necessary to facilitate the highest level of population-related research through the submission of federal and foundation grants, the training of graduate students and postdoctoral scholars, the production and publication of population-related knowledge, and the dissemination of this work through scholarly meetings, presentations, workshops, teaching, media outlets, and the web. The PRC is an NICHD-funded center.

The Yun Kim Population Research Laboratory

E. (Eddy) Helen Berry, *Director*

Utah State University

Department of Sociology,
Social Work and Anthropology
0730 Old Main Hill
Logan, UT 94322-0730
sociology.usu.edu/
populationresearchlab.aspx
eddy.berry@usu.edu
(P): 435-797-1230
(F): 435-797-1240

Mission Statement

Since its inception in 1968, The Yun Kim Population Research Laboratory (PRL) has served as a center for demographic research and training at Utah State University. Today, the primary mission of the PRL is to stimulate and support quality scientific research on a range of population issues affecting our state, nation and world. Research productivity among our faculty facilitates another key mission of the PRL – to train and mentor the next generation of applied demographers and population scholars through the M.S. and Ph.D. programs in Sociology. Through seminars and research support, the PRL serves to create a vibrant community of population scholars at Utah State University.

Departmental Affiliations

Key Areas of Research

- U.S. and international migration
- Population health and quality of life
- Mortality determinants and longevity forecasts
- Social inequality and health disparities
- Social determinants of obesity
- Family challenges facing the U.S. and Southeast Asia
- The demographic consequences of labor market disruptions
- Maternal and child health
- Neighborhood effects on population health
- The demography of aging
- The demography of disability
- The demography of LGBTQ+ populations

Domestic Research Projects

- Migration and spatial patterns of disability
- The impact of obesity on mortality among U.S. adults
- Associations between job quality and divorce risks
- Aging, ethnicity and land use change in rural communities
- Gendered immigration patterns in new U.S. destinations
- Mother's nonstandard employment and children's health
- Sleep deprivation and dietary choices among U.S. adolescents
- The impact of "bad jobs" on marriage
- Ethnic variation in associations between short sleep duration and obesity among U.S. adolescents
- Food insecurity, functional limitation and mental health among U.S. adults
- Racial health disparities among Mexican Americans and other Latinx subgroups
- Physical and mental health outcomes of LGBTQ+ individuals
- Black immigrant's health outcomes by country of origin
- Goal striving stress and mental health among people with disabilities
- Disability stigma and health outcomes among older couples
- Multidimensional disparity indices using the County Health Rankings & Roadmaps

International Research Projects cont'd

- Gender differences in the association between marriage and health in South Korea
- Health consequences of nonstandard employment in East Asia
- Nonstandard employment and a shift from breadwinner families to dual-earner families in Japan
- Family status and children's well-being in South Korea
- Age, period and cohort effects on suicide mortality in Japan and South Korea
- Bride kidnapping and labor migration in Kyrgyzstan
- Educational differences in early childbearing: a cross-national comparative study
- Demographic and social determinants of natural decrease in Mexico and Brazil
- Critical understanding of rural aging nationally and internationally

Regional Research Projects

- Social, economic and environmental causes and consequences of demographic change in rural America
- Ethnic disparities in influenza vaccination rates
- Early family building behaviors and subsequent well-being
- The impact of educational attainment on type-2 diabetes
- Determinants of overweight and obesity among adolescents
- Transgenerational impacts of maternal characteristics on child growth trajectories
- Health and wellness needs and challenges with the Extension system in Utah
- Food insecurity among people with disabilities in the Intermountain West
- Predictors and mechanisms of gender inequality in higher education in Utah

Center for Health Trends and Forecasts

at the Institute for Health Metrics and Evaluation

Christopher J.L. Murray, *Director*

Institute for Health Metrics and Evaluation
2301 Fifth Ave., Suite 600
Seattle, WA 98121
(P): +1-206-897-2800
(F): +1-206-897-2899
chtf@uw.edu
www.healthdata.org/chtf

Mission Statement

The mission of the Center for Health Trends and Forecasts is to pilot groundbreaking research on the trends, determinants, and impact of health, aging, longevity, and disease and injury burden among older adults. The Center works to develop a strong international network of emergent leaders in research from across social sciences who are using health data alongside data on social determinants, economics, and a host of other potential sources to develop valuable findings that could not be derived simply from within one discipline.

Center for Public Information on Population Research

Linda A. Jacobsen, *Director* • Mark Mather, *Associate Director*

Population Reference Bureau

1875 Connecticut Avenue, NW
Suite 520
Washington, DC 20009
www.prb.org/cpipr
ljacobsen@prb.org
(P): 202.483.1100
(F): 202.328.3937

Mission Statement

The Center for Public Information on Population Research (CPIPR) at the Population Reference Bureau (PRB) serves as the Coordinating Center for the NICHD Population Dynamics Centers Research Infrastructure Program to improve the translation and dissemination of major findings from population dynamics research, and to improve communication and cooperation across the Centers.

Key Activities

As a Coordinating Center, our activities include:

- Facilitating coordination and cooperation across the NICHD-funded Population Dynamics Research Centers to enhance the productivity and scientific impact of the Centers and of population dynamics research overall.
- Translating and disseminating major peer-reviewed findings, methods, and perspectives from population dynamics research to other scientists, and to nontechnical audiences including policymakers, program directors, practitioners, educators, journalists, and students.
- Developing and maintaining a Population Dynamics Research Centers website that includes nontechnical summaries of recent research from the Population Dynamics Centers.
- Promoting Population Dynamics Centers research through Twitter, Facebook, and other social media platforms.
- Organizing workshops at professional meetings and providing training materials that empower Population Dynamics Centers researchers to effectively communicate their own research results to policy, media, and nontechnical audiences.
- Collaborating with Population Dynamics Research Centers and other organizations to organize and host symposia, Congressional Briefings, or other events to raise the visibility of population dynamics research and link major findings to important policies and programs.

Mission Statement

The Center for Demography and Ecology (CDE) is a multi-disciplinary cooperative for social scientific demographic research and graduate training at the University of Wisconsin–Madison. CDE affiliates produce demographic research and data in the center's five research areas: fertility, families, and households; health and the life course; the demography of inequality; biodemography; and spatial and environmental demography.

Center for Demography of Health and Aging

Jason Fletcher, *Director*

University of Wisconsin–Madison

4412 Sewell Social Sciences
1180 Observatory Drive
Madison, WI 53706
cdha.wisc.edu
cdha@ssc.wisc.edu
(P): 608.262.9836

Mission Statement

The Center for Demography of Health and Aging (CDHA) at the University of Wisconsin–Madison aims to increase the understanding of behavioral processes related to health and aging. CDHA's interdisciplinary research program creates links between social demography, biomedical, and epidemiological research on health and aging. Research at the center focuses on five major themes: aging and the life course; biodemography; determinants of disparities of aging trajectories; health economics and health services research; and impacts of place on aging processes.

Departmental Affiliations

- Afro-American Studies
- Agricultural & Applied Economics
- Applied Population Laboratory
- Bacteriology

- Nursing
- Obstetrics and Gynecology
- Operations and Information Management
- Ophthalmology and Visual Sciences
- Population Health Sciences
- Psychology
- Risk and Insurance
- School of Social Work
- Sociology
- Statistics

Key Areas of Research

- Aging and the life course
- Biodemography and Social Genomics
- Determinants of disparities of aging trajectories
- Health economics and health services research
- Impacts of place on aging processes

Domestic Research Projects

- A Novel Longitudinal Study of the Association between the Gut Microbiome and Aging
- Applying Biodemographic Methods to Advance our Understanding of Socioeconomic Risk Factors for Alzheimer's Disease
- Building Relationships between Researchers and the Community to Increase African American Participation in Alzheimer's Disease Research
- Collaborative Cross of the Microbiome and Metabolic Disease
- Community-Academic Aging Research Network
- Data Science Hub for UW–Madison
- Educational and Early Life Predictors of Mild Cognitive Impairment: New Evidence about Mediators and Moderators from High School & Beyond
- Employer Incentives in Return-to-Work Programs: Evidence from Workers' Compensation
- Epidemiology of Age-Related Hearing Loss
- Family and Birth Cohort Effects on the Aging Senses
- Genomic and Metabolomic Data Integration in a Longitudinal Cohort at Risk for Alzheimer's Disease
- Improving Quality Report Cards Through Inclusion of Consumers Preferences
- Life Course Determinants of Epigenetic Age Acceleration and Subsequent Dementia
- Linking 1940 U.S. Census Data to Five Modern Surveys of Health and Aging
- Medicaid Expansions and Formal and Informal Care for the Elderly
- Neighborhood Socioeconomic Contextual Disadvantage and Alzheimer's Disease
- Neighborhood Socioeconomic Disadvantage and Medicare's 30-Day Rehospitalization Policy: Limiting Rehospitalization Disparities by Informing Policy Design and Implementation
- Nursing Home Use Expectations & Wealth Accumulation Among the Elderly
- Researching Epigenetics, Weathering, Aging & Residential Disadvantage (REWARD) (all new added in pink)
- Robust Mendelian Randomization Methods to Identify Causal Risk Factors for Alzheimer's Disease
- Social-Biological Dimensions of ADRD Risk and resilience in a Native American Cohort
- Social Stressors, Allostatic Load, and Disparities in Cognitive Aging
- SSDI and Intergenerational Economic Mobility

Domestic Research Projects Cont'd

- Testing Gene-environment Interactions without Measuring the Environmental Factor
- The Impact of Medicare Part D on Retirement Plans
- The Importance of Place in Determining Health and Mortality at Older Ages
- The Importance of Place of Birth in Determining Old Age Cognitive Decline
